To make this properly work for existing reservations, please make sure that the overall amount of seats on the tables is the same as the amount of seats configured before.

Tables are assigned to specific areas. When you pause a whole area, all tables assigned to that area will be paused. This may make some of your future reservations invalid. Don't worry, you can just move them to other available table(s). When you deactivate a table for "reservable online", reservations made online won't be assigned to this tables. You can also assign tables a booking priority between 1 (high) and 3 (low). The tables with high priority will be preferred for incoming reservations.
