

First visit your DISH Order Website of the restaurant and copy your **URL**.

The next step is to log in to your Instagram account and click on **edit profile**.

Now insert/type in your copied link at the **website** field.

👉 Scroll down and click on **submit** to save your settings.

The screenshot shows the Instagram account settings page. On the left is a navigation menu with options: Push Notifications, Manage Contacts, Privacy and Security, Login Activity, Emails from Instagram, and Switch to Personal Account. Below this is the Meta Accounts Center section. The main content area contains fields for Website, Bio, Personal Information (with a note: 'Provide your personal information, even if the account is used for a business, a pet or something else. This won't be a part of your public profile.'), Email, Confirm Email, Phone Number, Gender, and Similar Account Suggestions (with a checked box for 'Include your account when recommending similar accounts people might want to follow. [?]'). At the bottom of the settings area, the 'Submit' button is highlighted with an orange border, and there is a link for 'Temporarily disable my account'. The footer includes links for Meta, About, Blog, Jobs, Help, API, Privacy, Impressum/Terms/NetzDG/UrhDaG, Top Accounts, Hashtags, Locations, Instagram Lite, and copyright information: 'English © 2021 Instagram from Meta'.

Go back to your profile and click on the **link** to prove if the link is working.

 That's it. You've successfully link your DISH Order Website with your Instagram account.
