

Welcome to the DISH POS app. In this tutorial, we show you how to adjust the connection settings of your device.

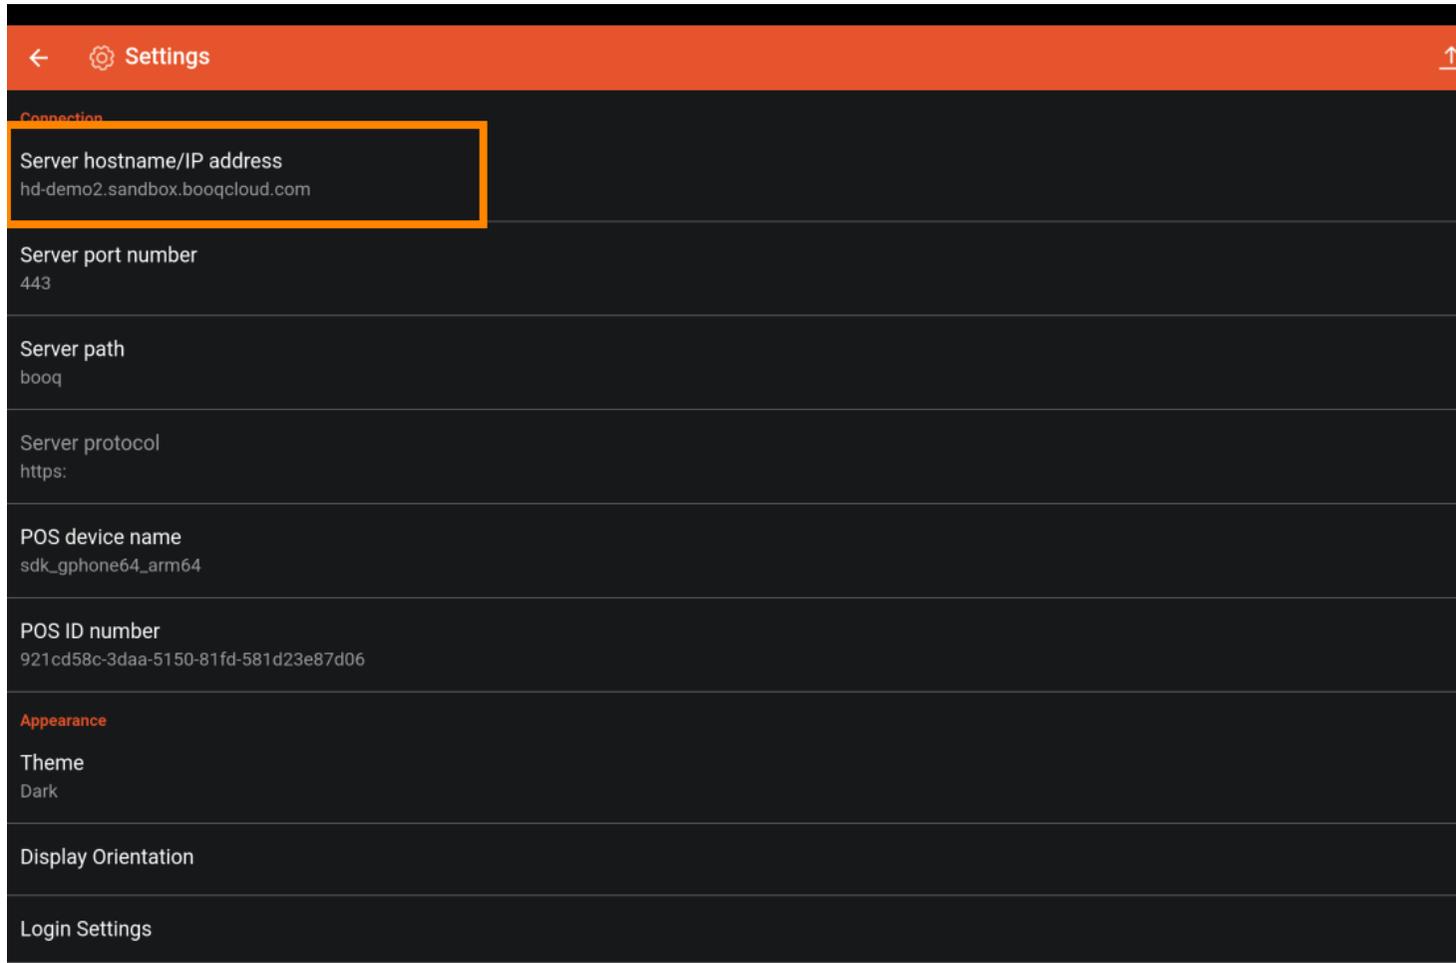

First, open the **menu**.

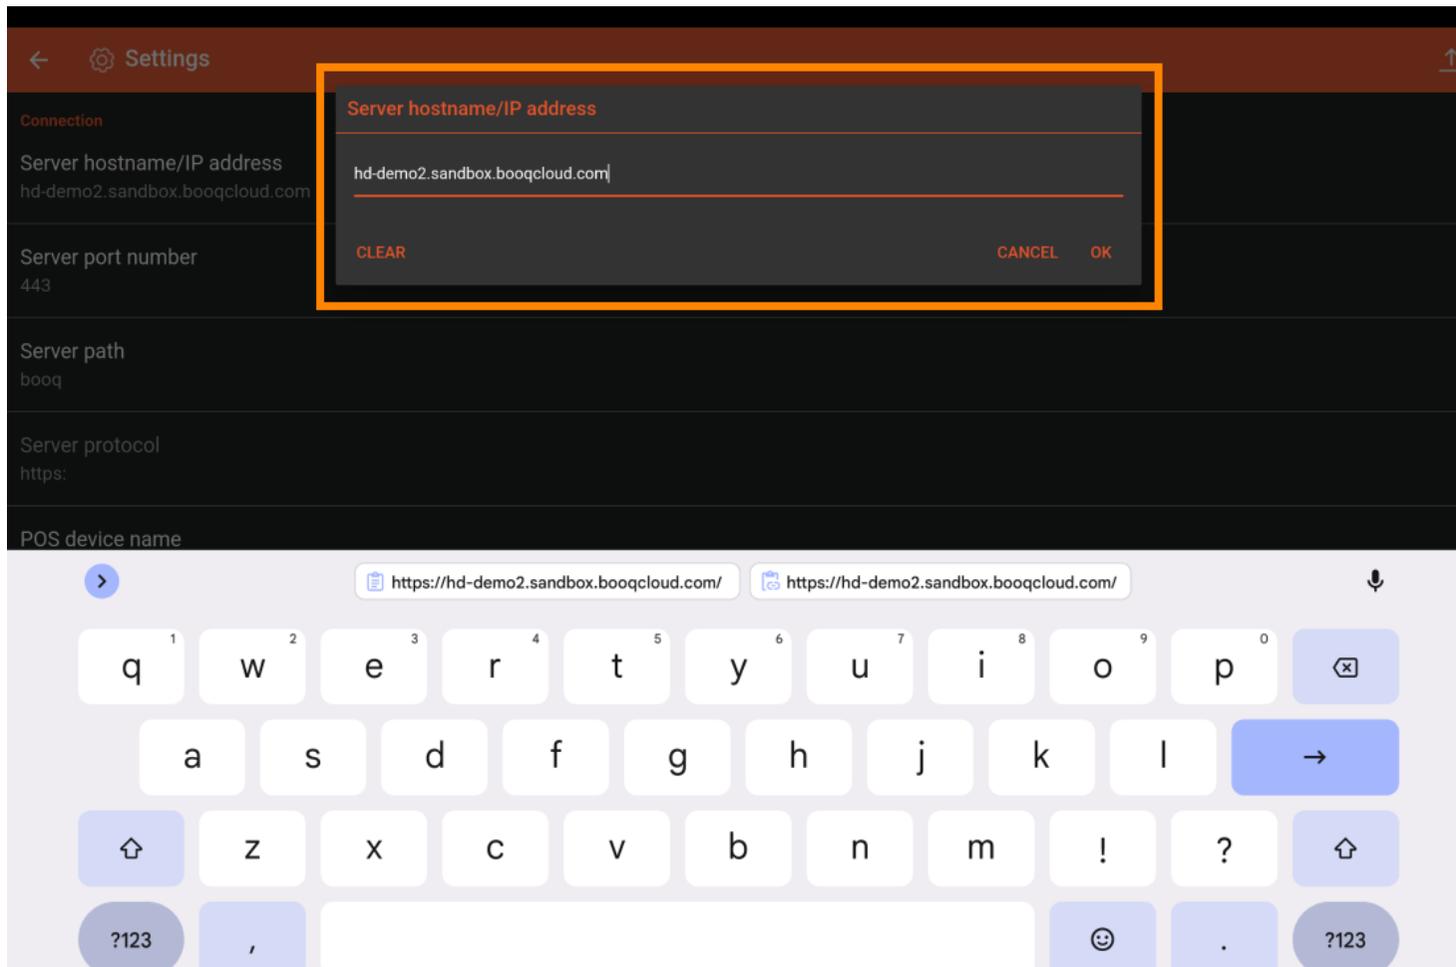

Then go to **Settings**.

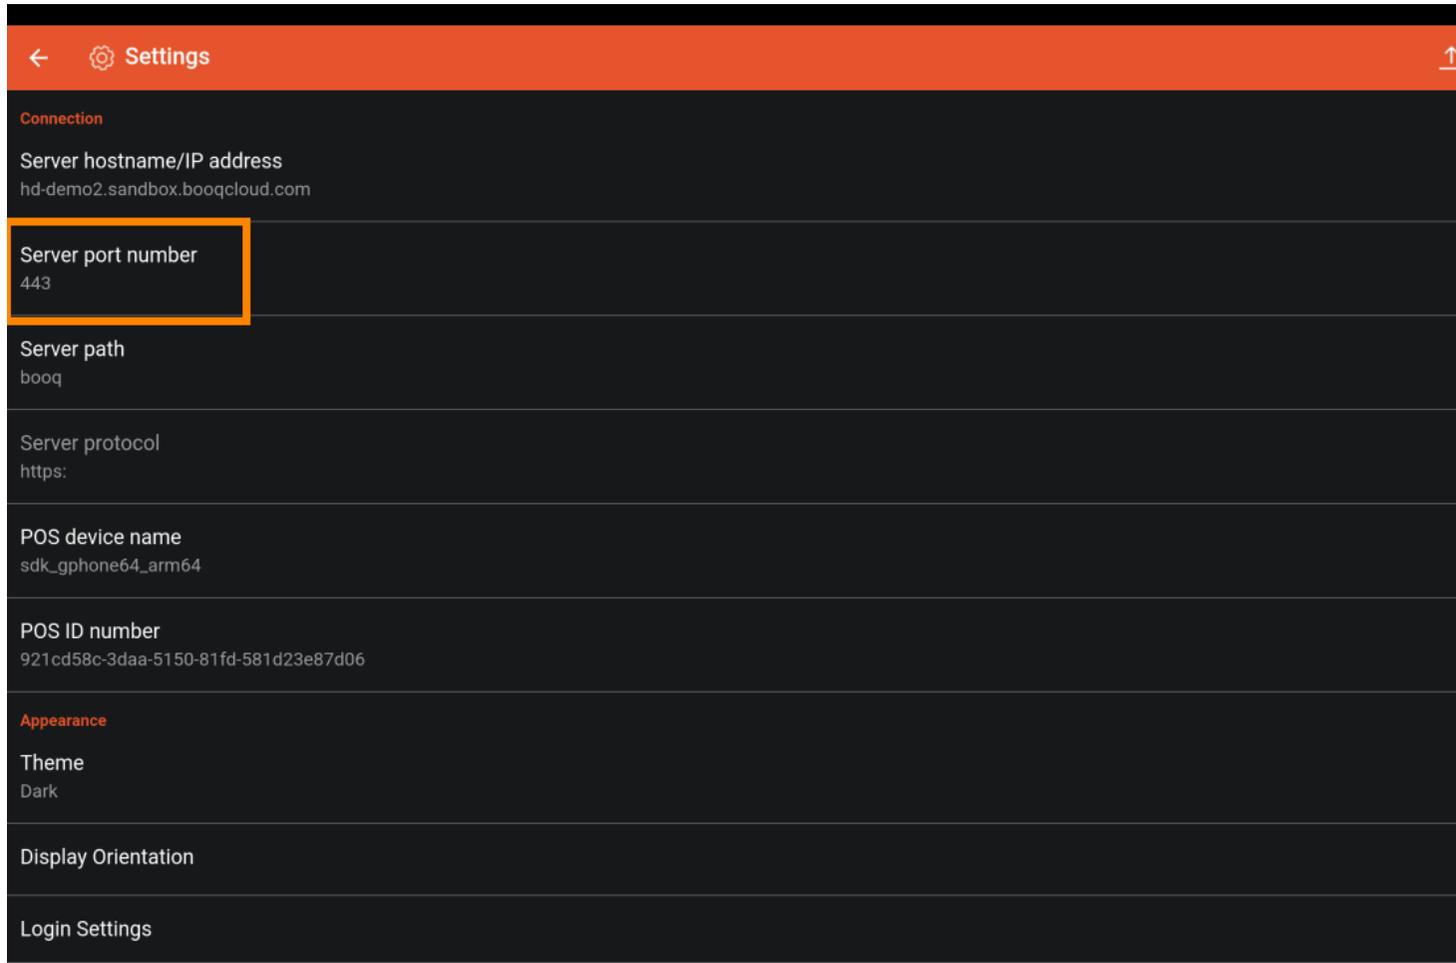

By selecting **Server hostname/IP address** you will be able to adjust this accordingly.

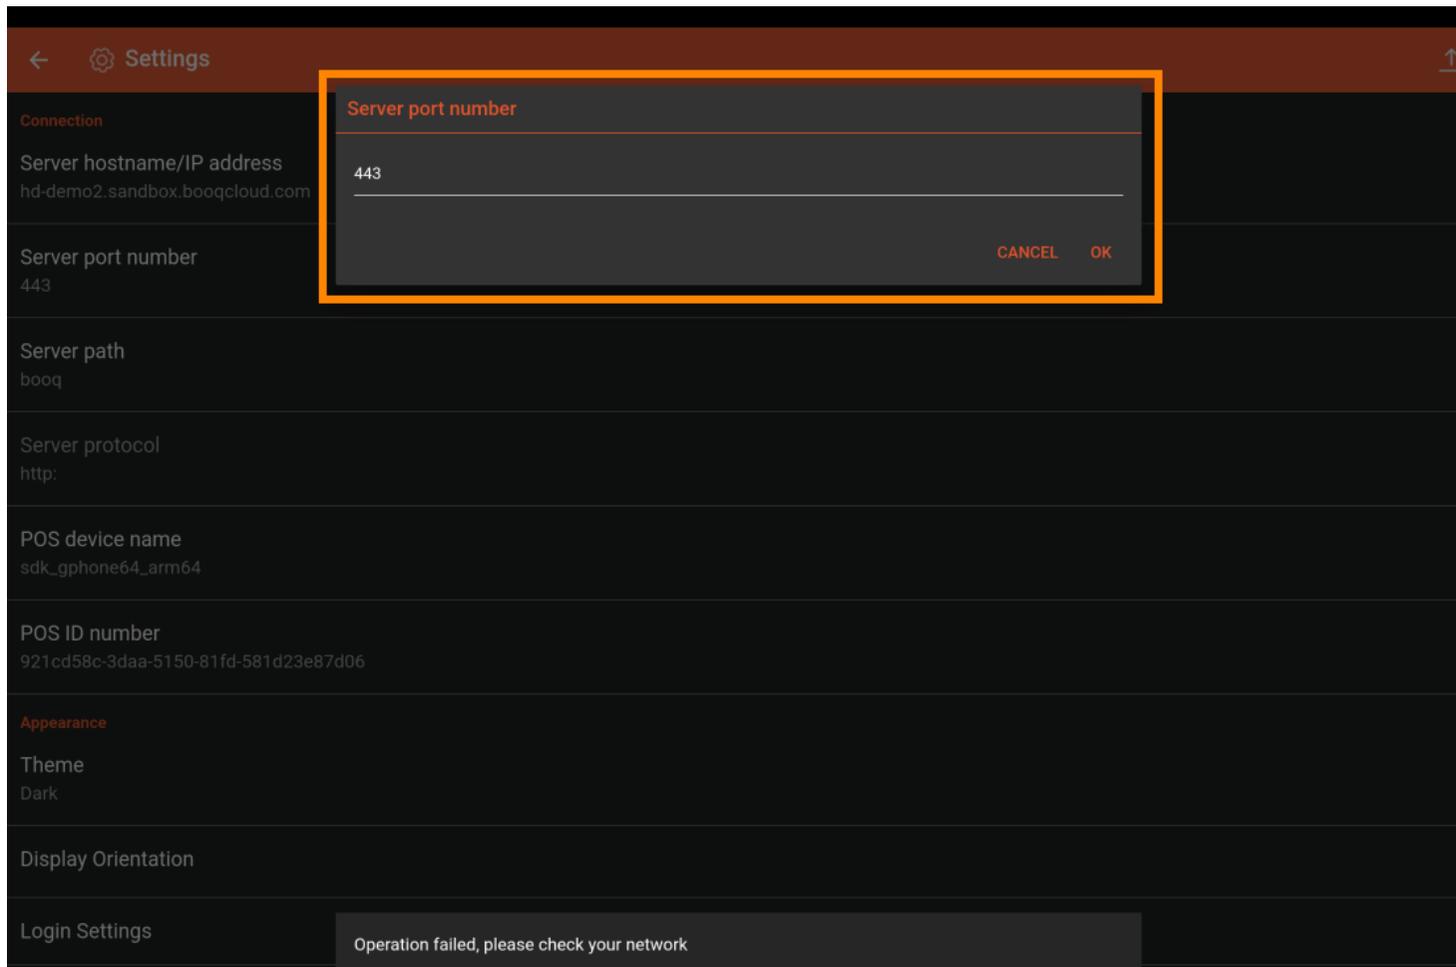

- 🔑 A pop-up will appear for changing the server/IP address. Then enter your new **server/IP address** and confirm the changes with **OK**.

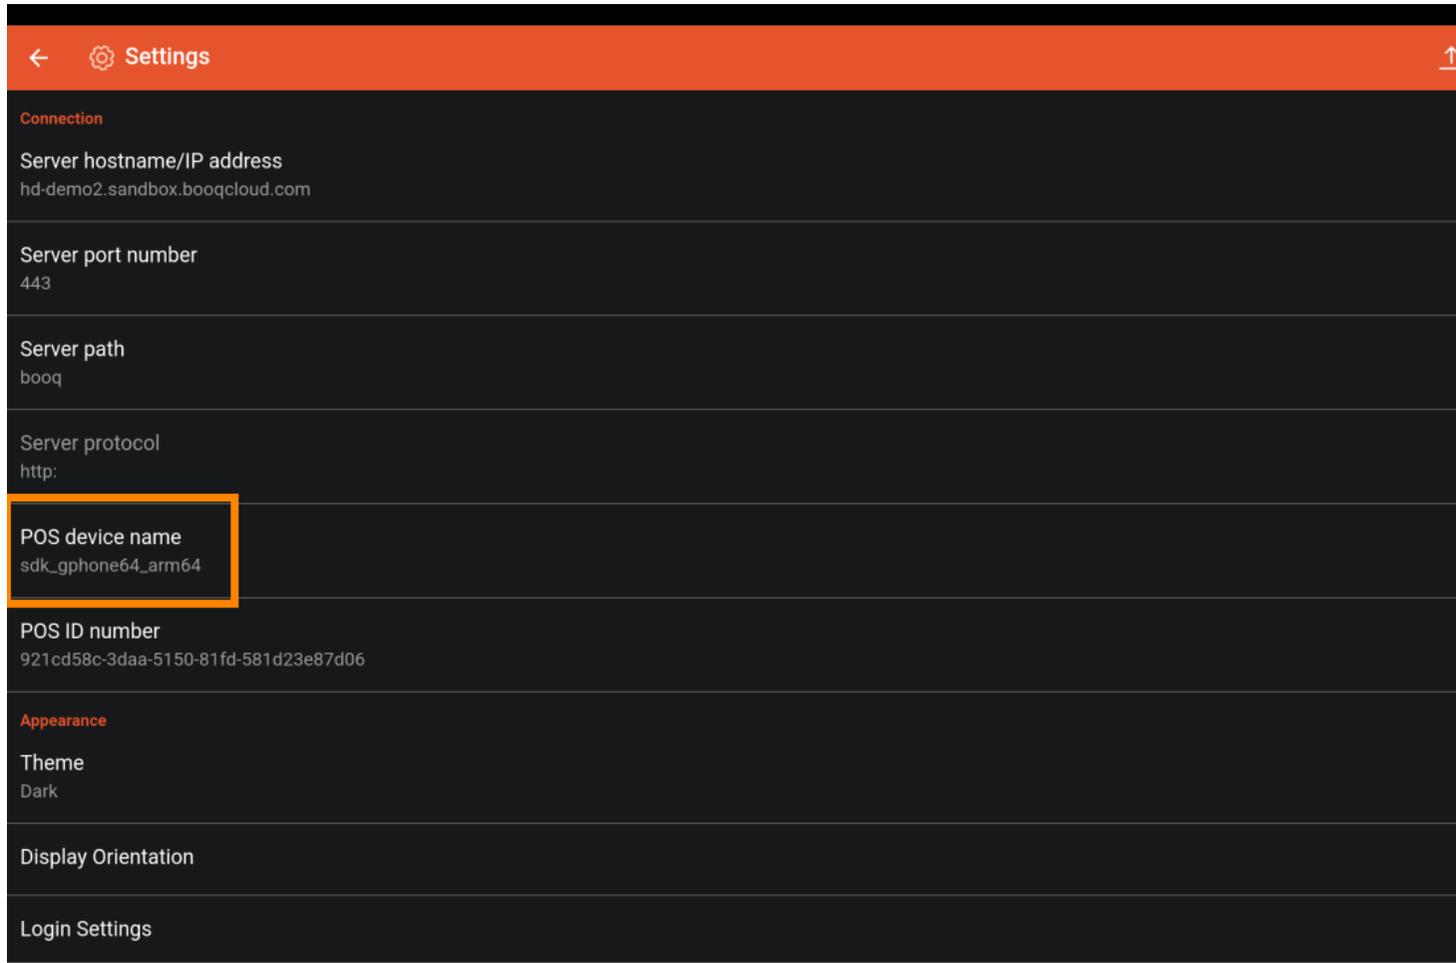

To adjust the port number of the server, tap on **Server port number**.

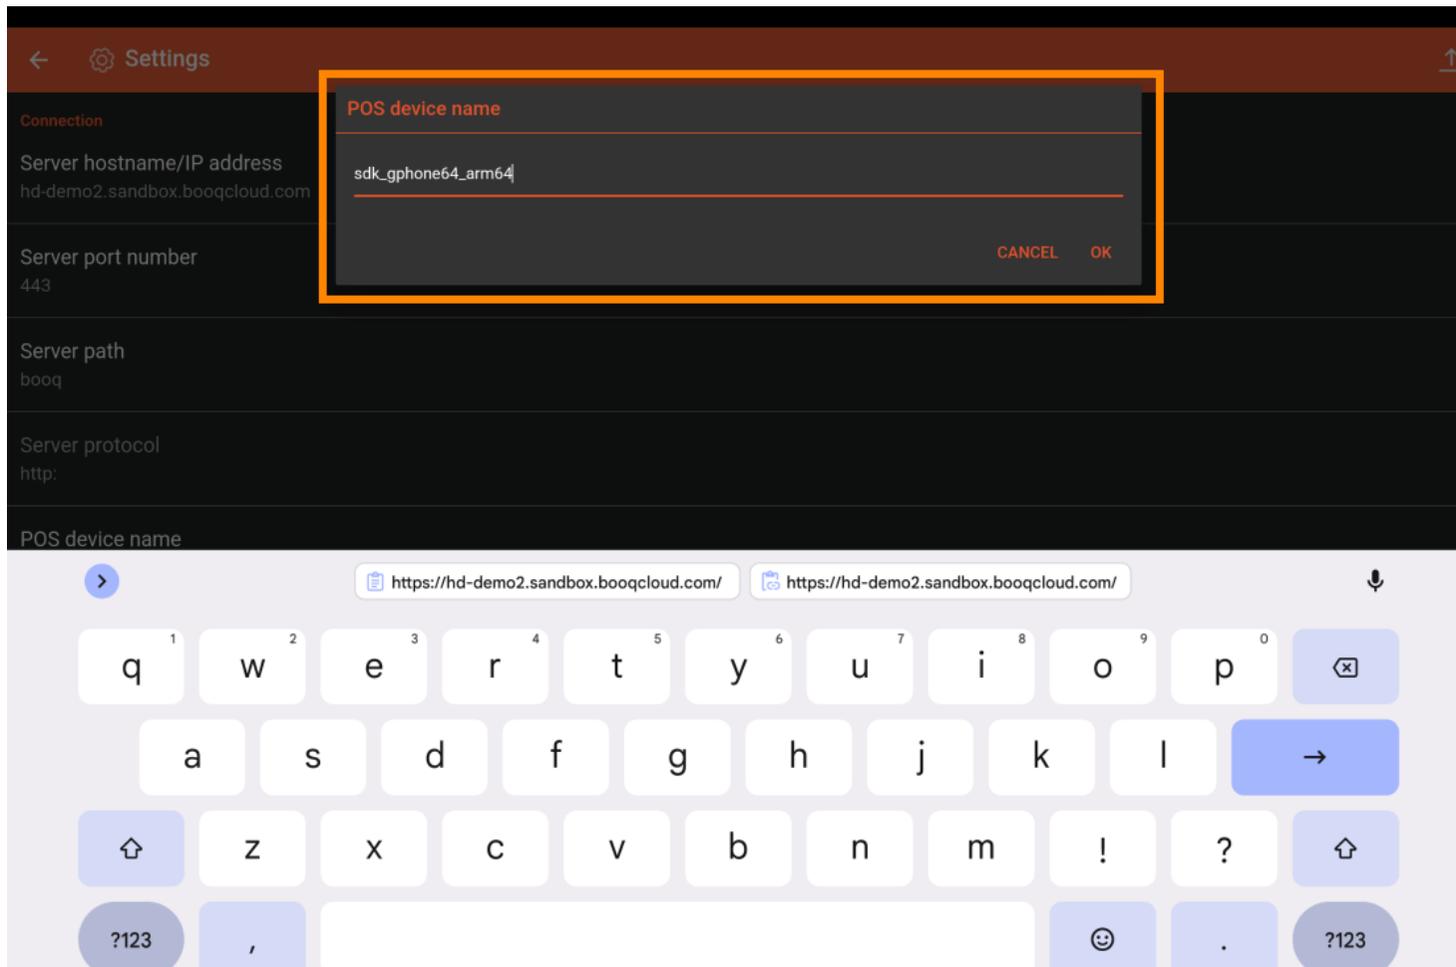

- 🔔 A pop-up will appear for changing the port number. Now enter your new **port number** and confirm the changes with **OK**. **Note: The default port is 8080.**

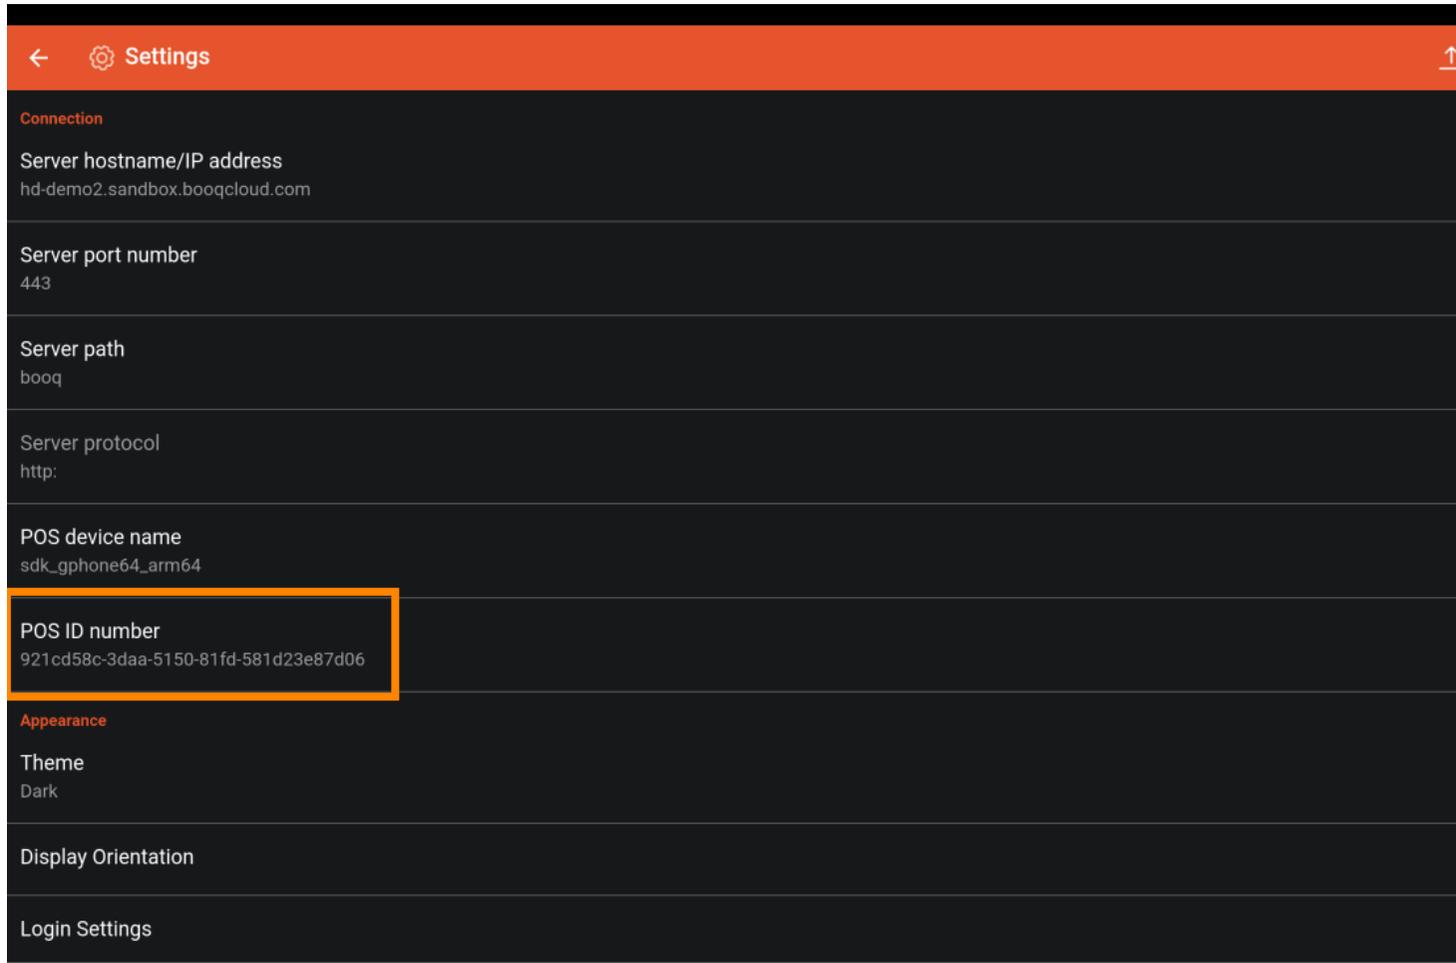

By tapping on **POS device name**, you will be able to change the current name of the device.

- 🔔 A pop-up will appear for changing the device's name. Now enter the new **name** and confirm the changes with **OK**.

 The unique ID of your device can be seen under **POS ID number**.

That's it. You completed the tutorial and now know how to adjust the connection settings of your device.
