

Welcome to the DISH POS app. In this tutorial, we show you how to print reports from your tablet.

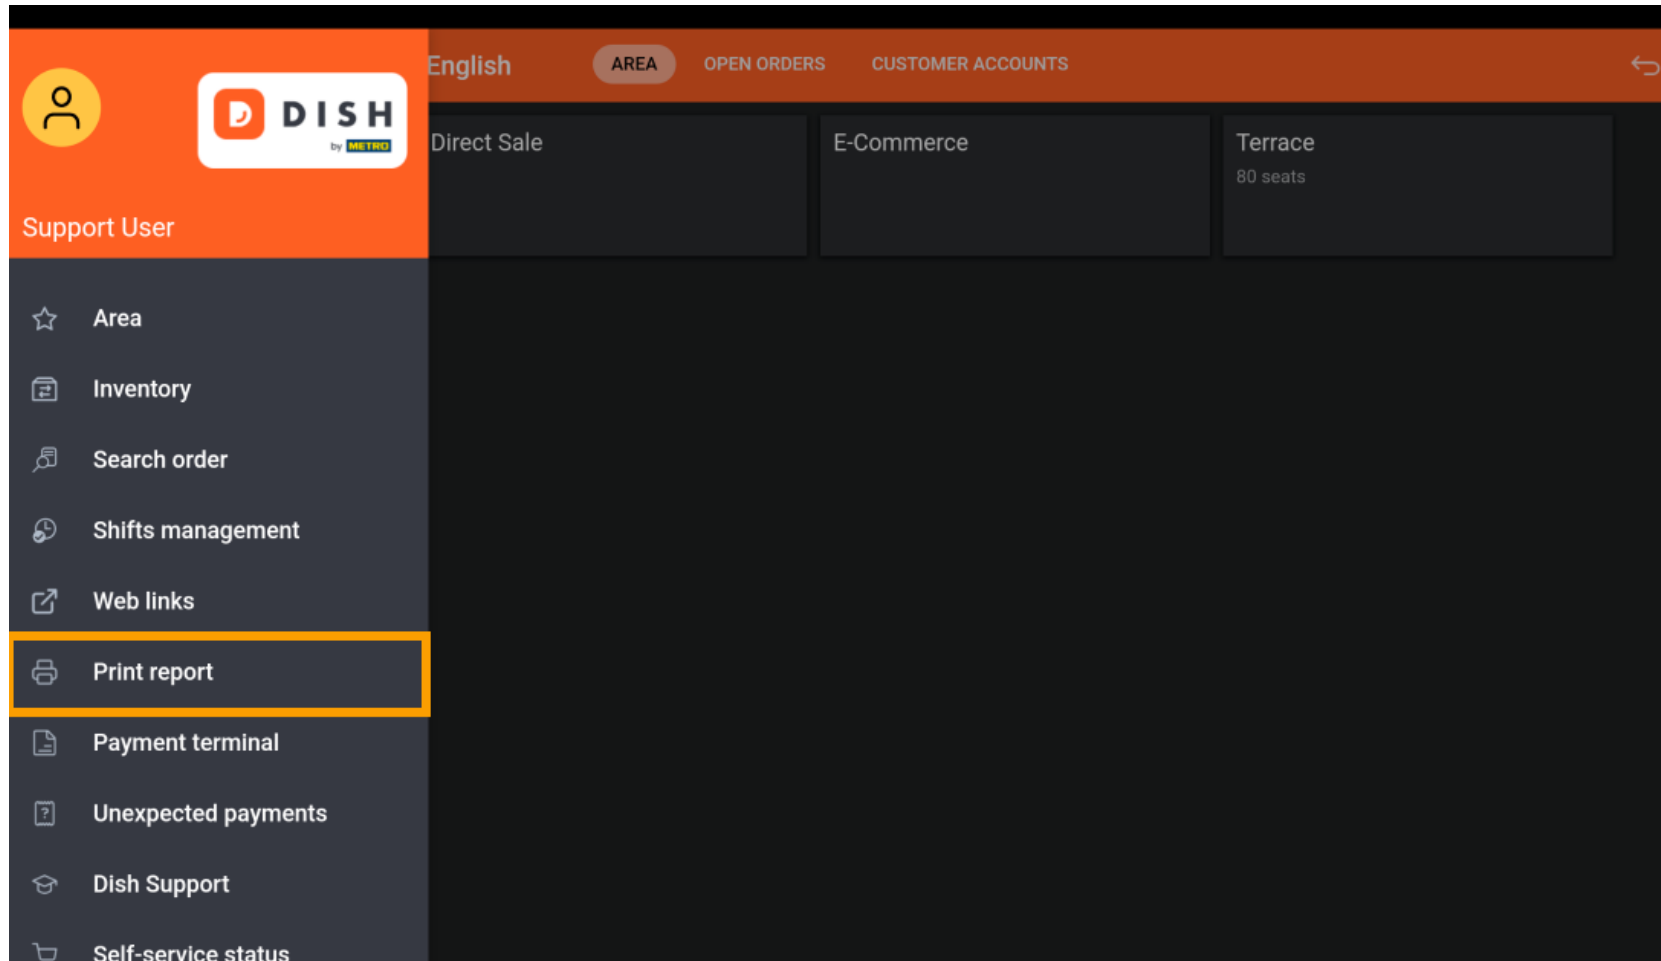

First, open the **menu**.

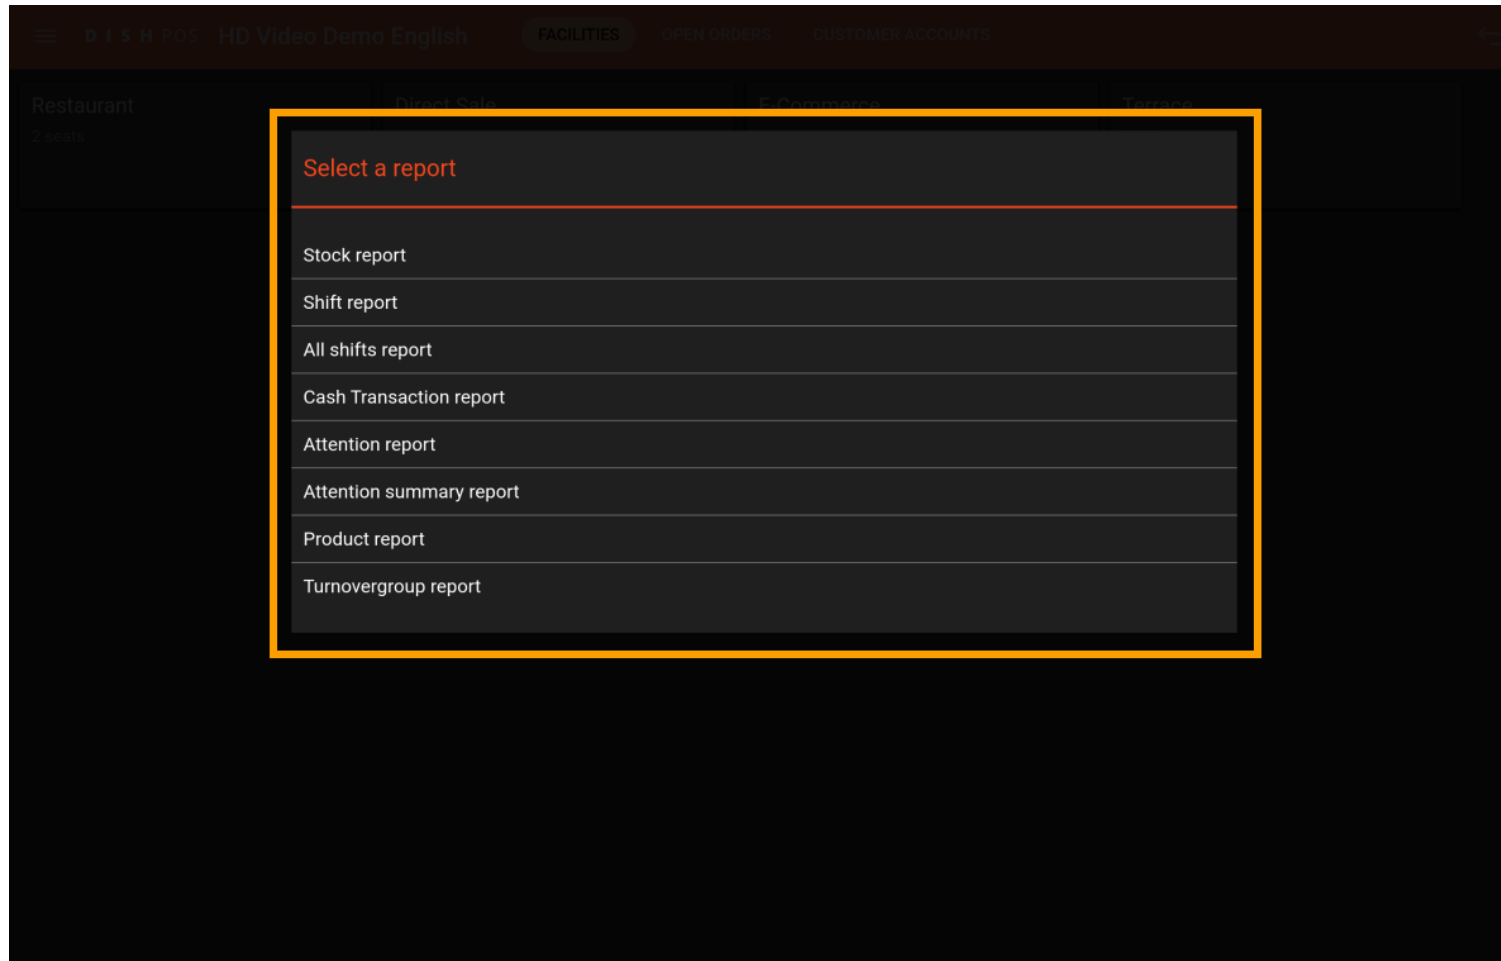

Then tap on **Print report**.

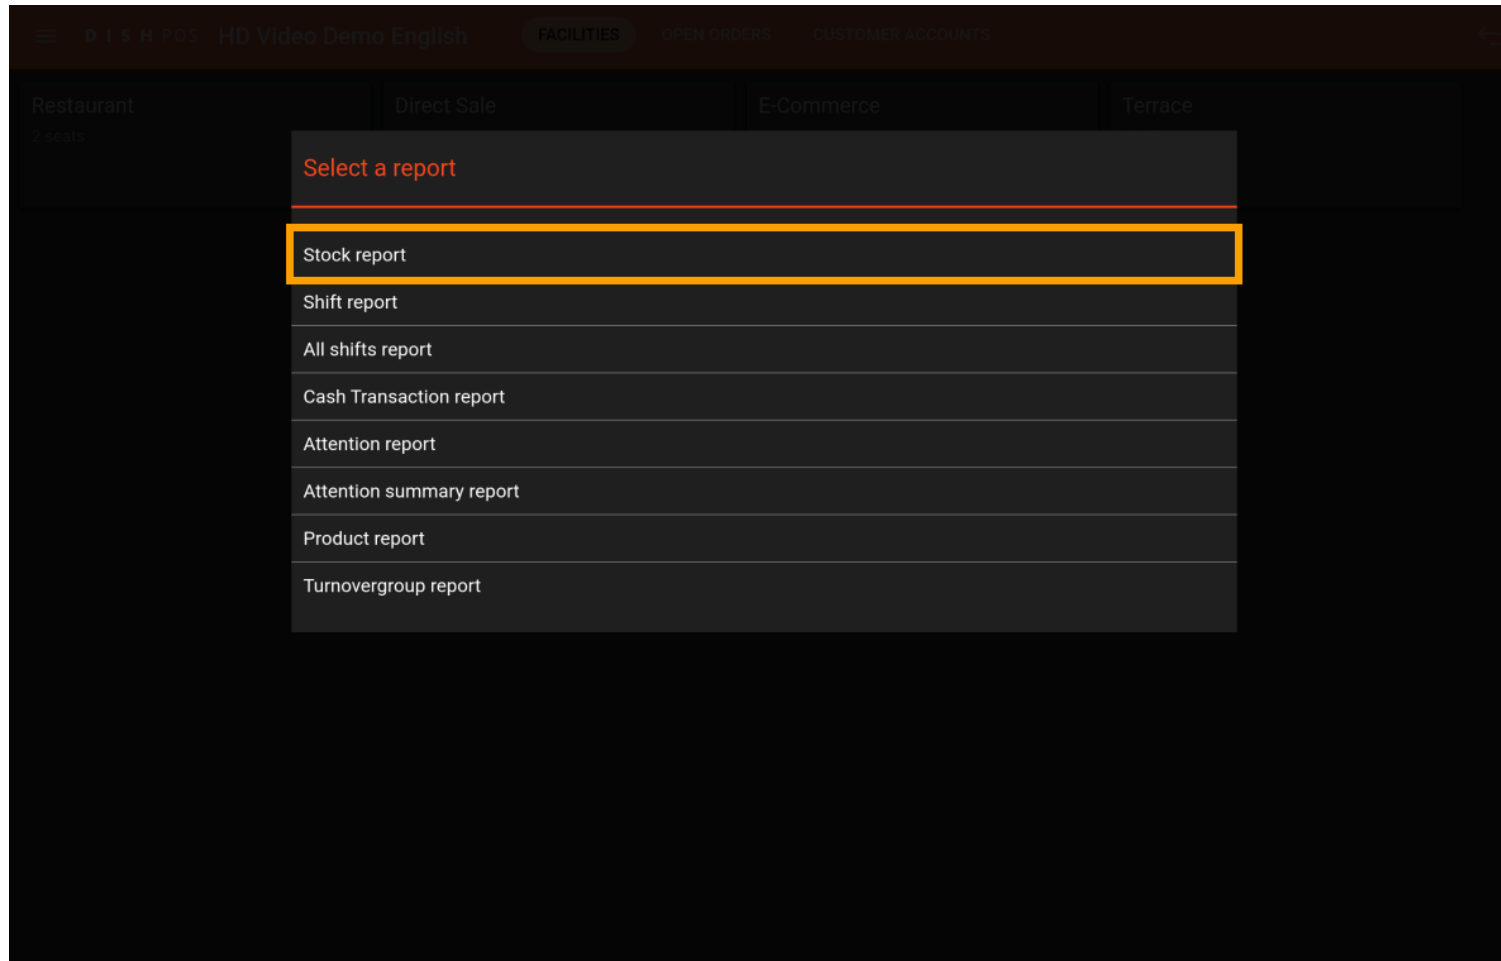

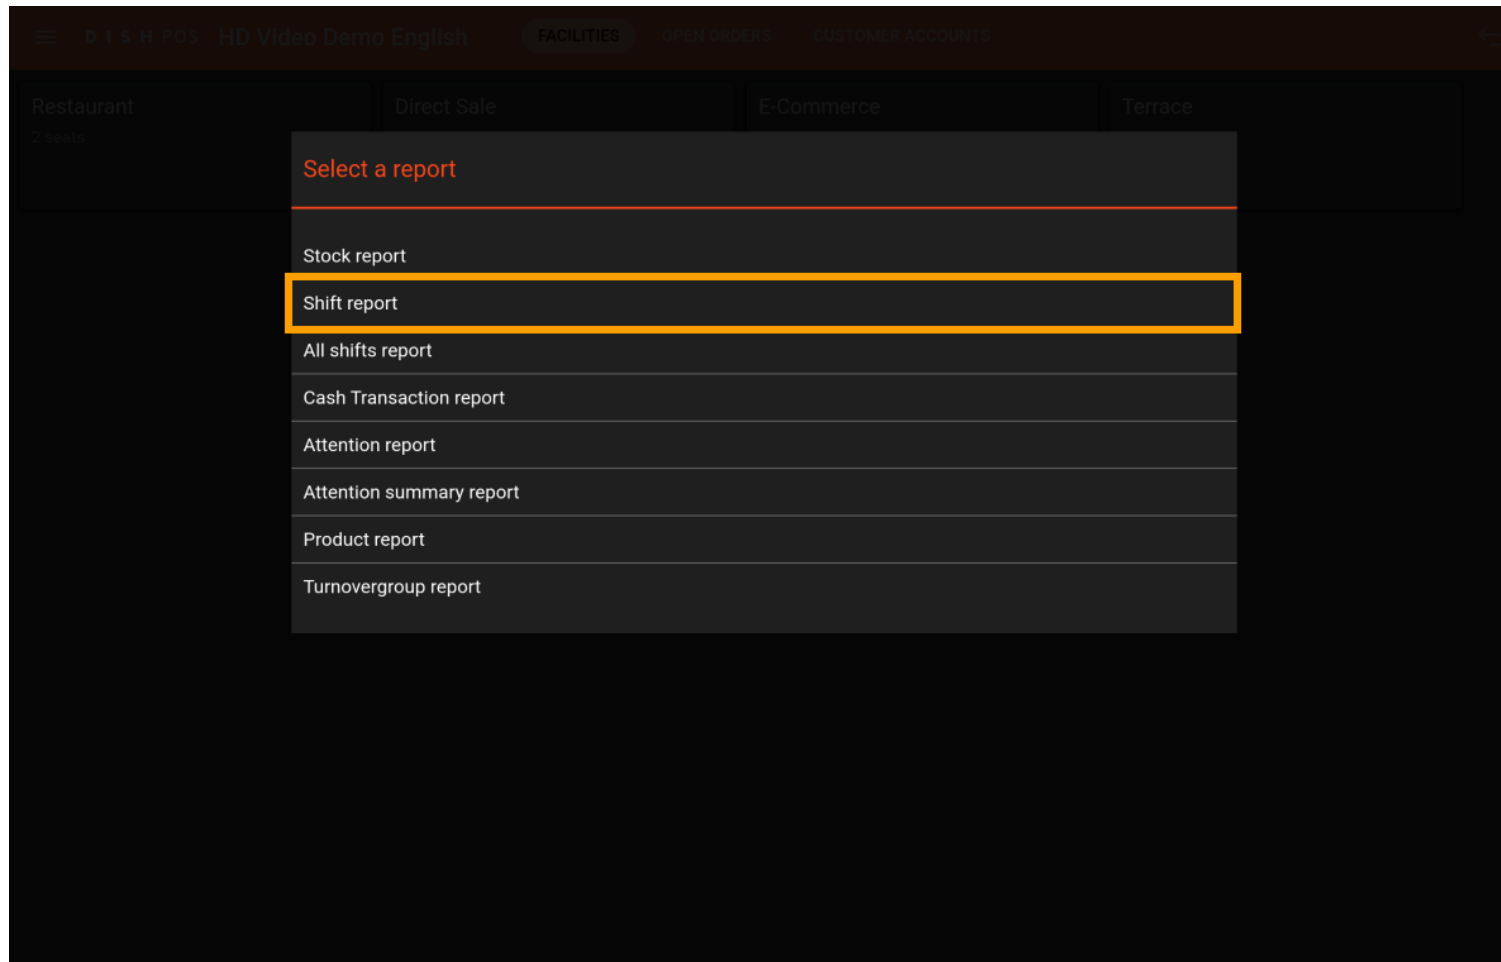

A pop-up will then appear with a list of available reports. Each report will be printed on the connected printer from the POS system. If you want to print it on a regular printer, you have to use the backoffice reports.

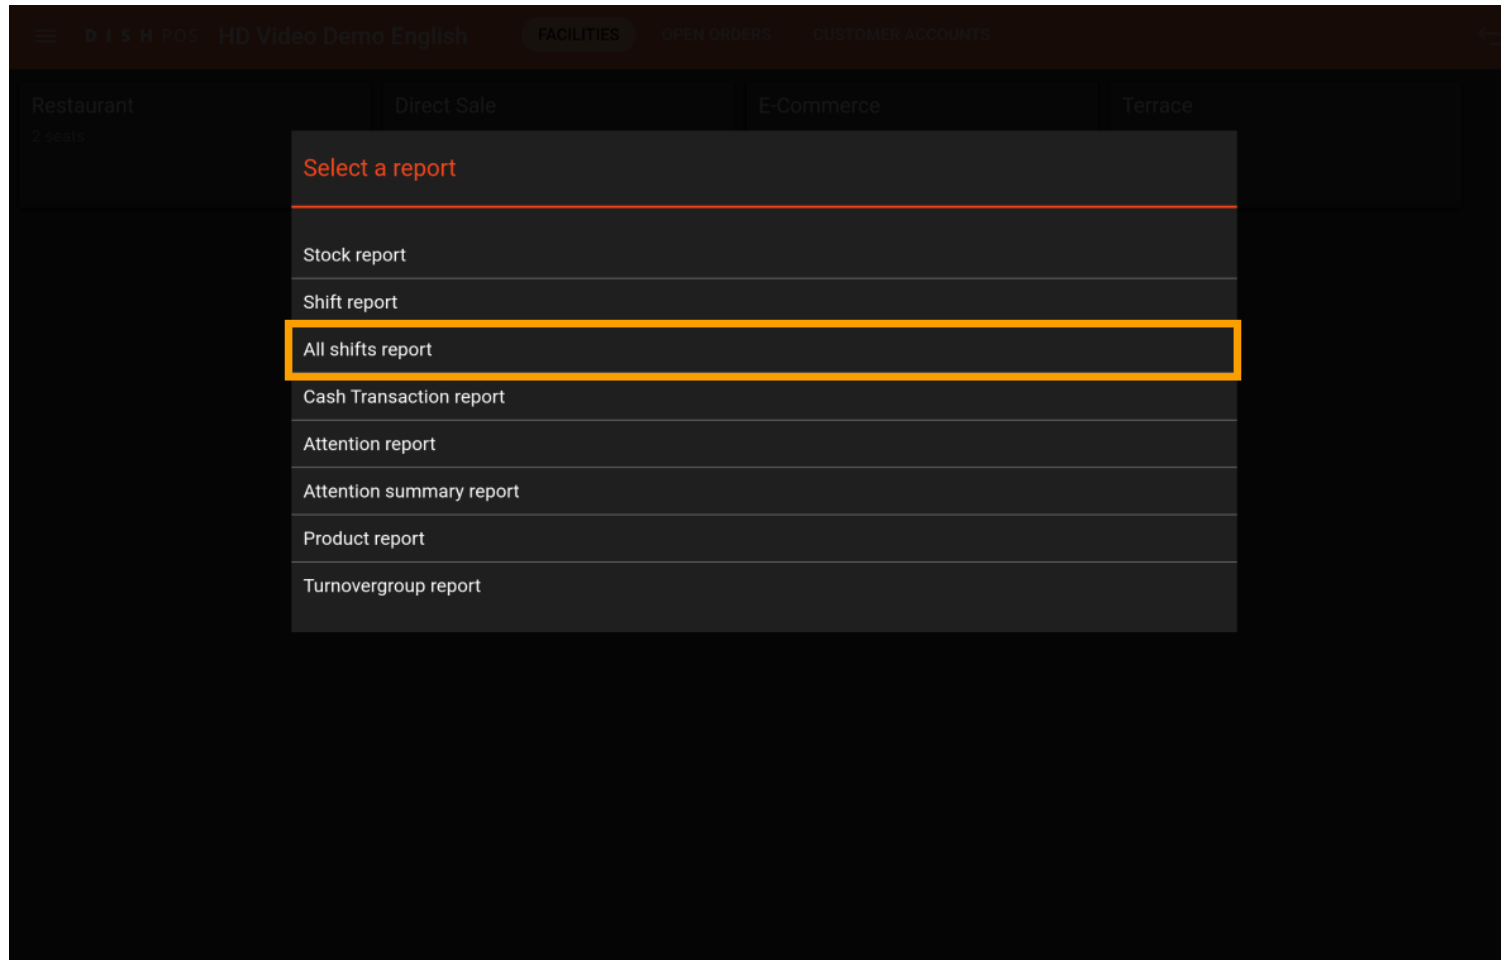

- 1 Select **Stock report**, to get a list of the product with a stock value.

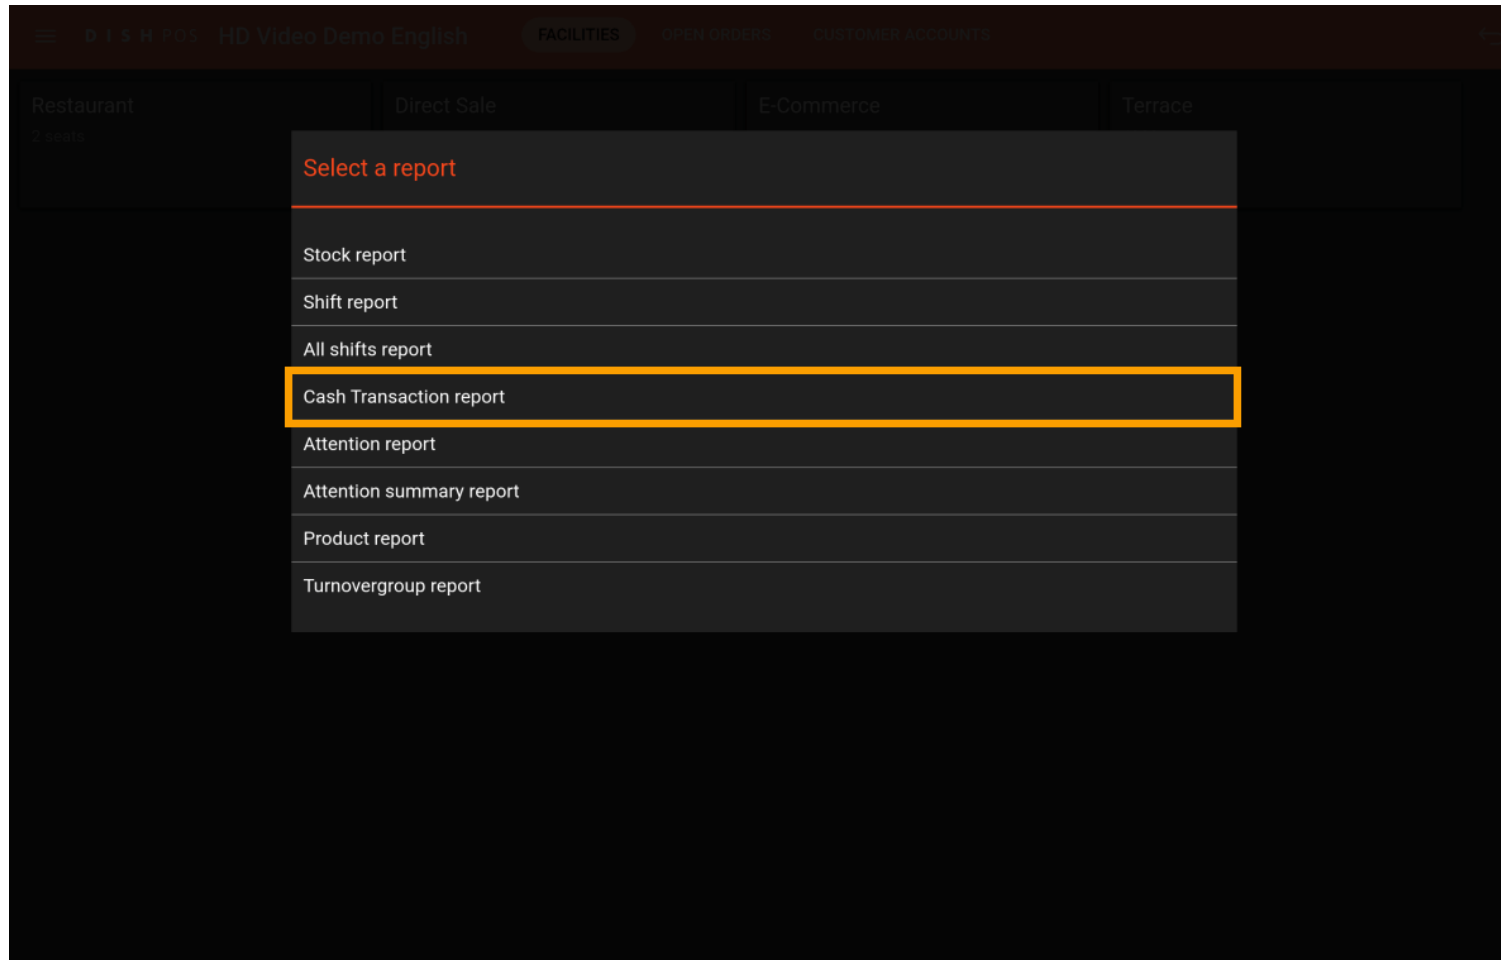

- By selecting **Shift report**, you get a report with the turnover and the payment methods for the user that is logged in.

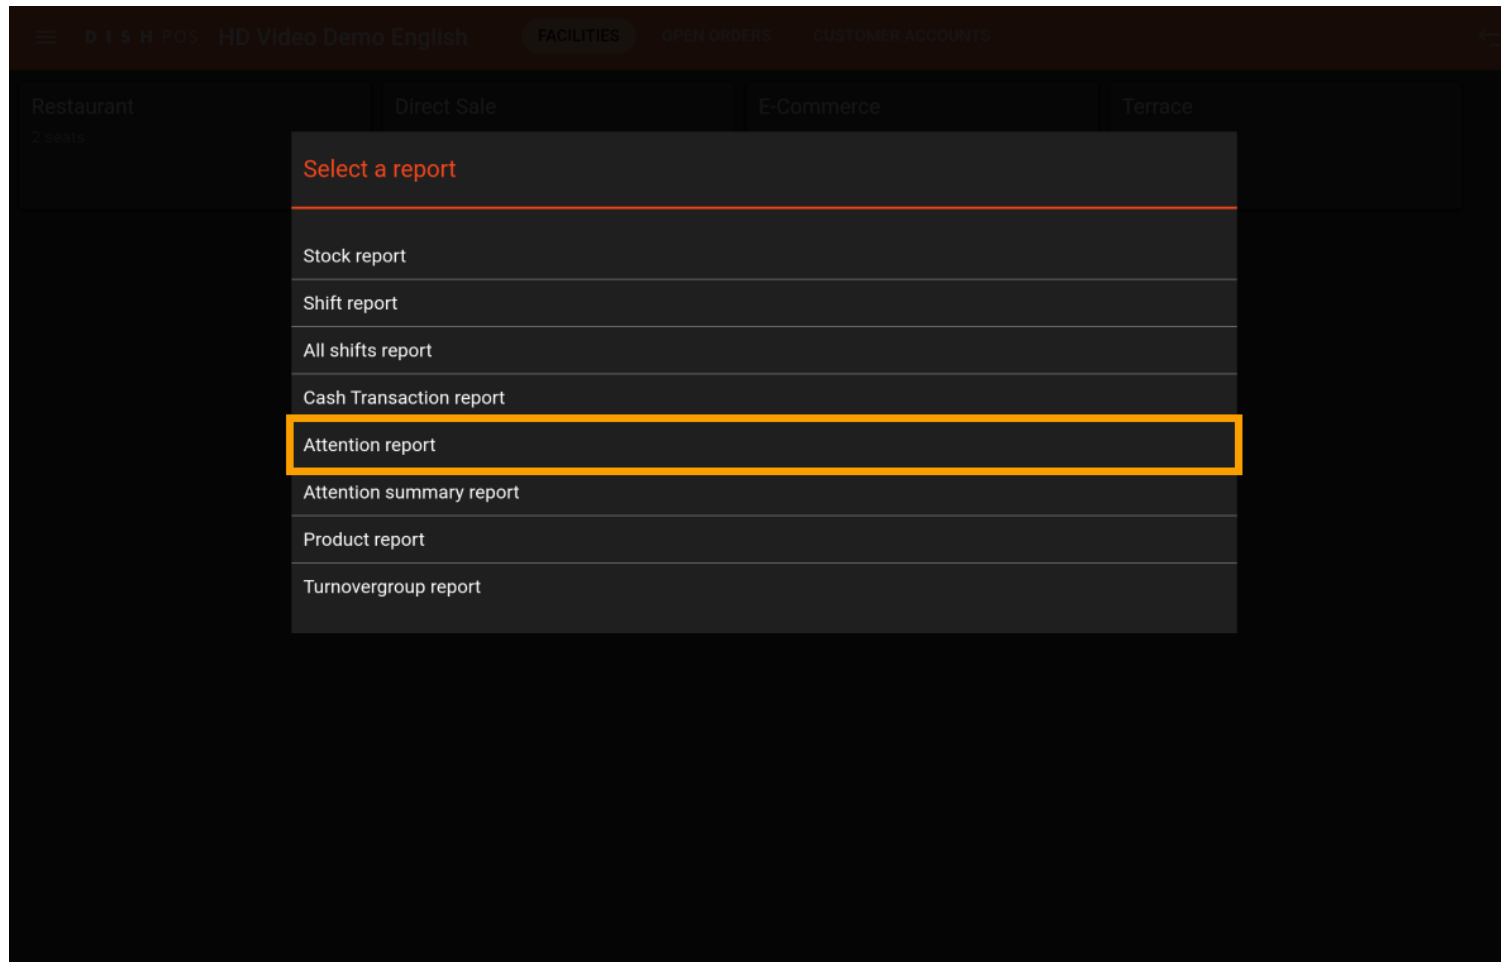

To print a report with the total turnover and details per waiter, tap on **All shifts report**.

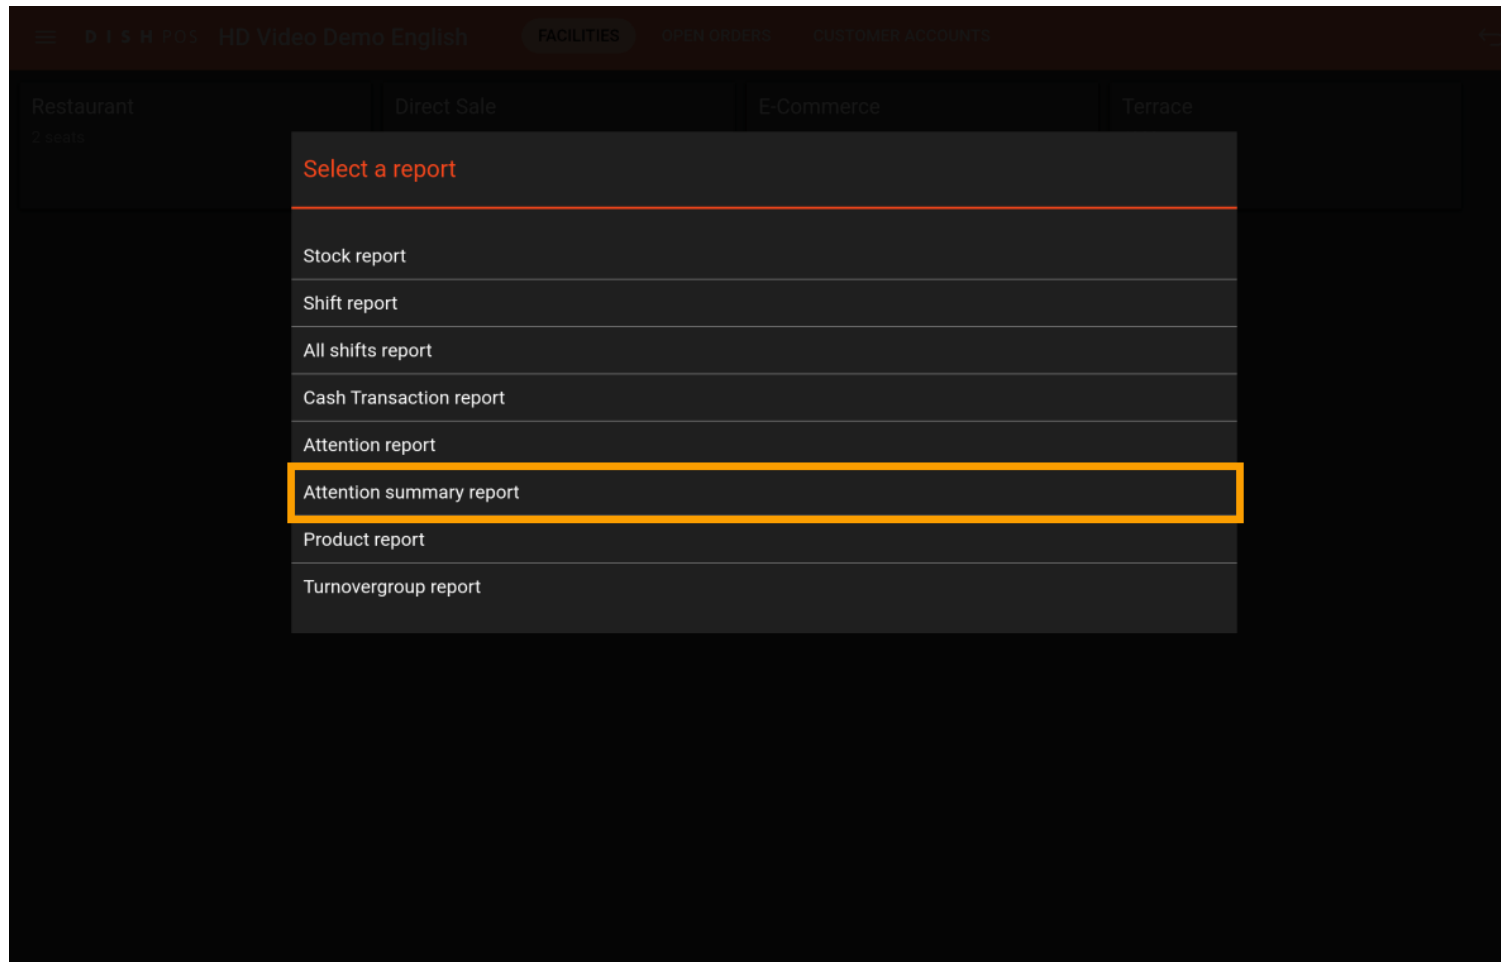

- 1 Select **Cash Transaction report**, retrieve a report of all the cash transactions made.

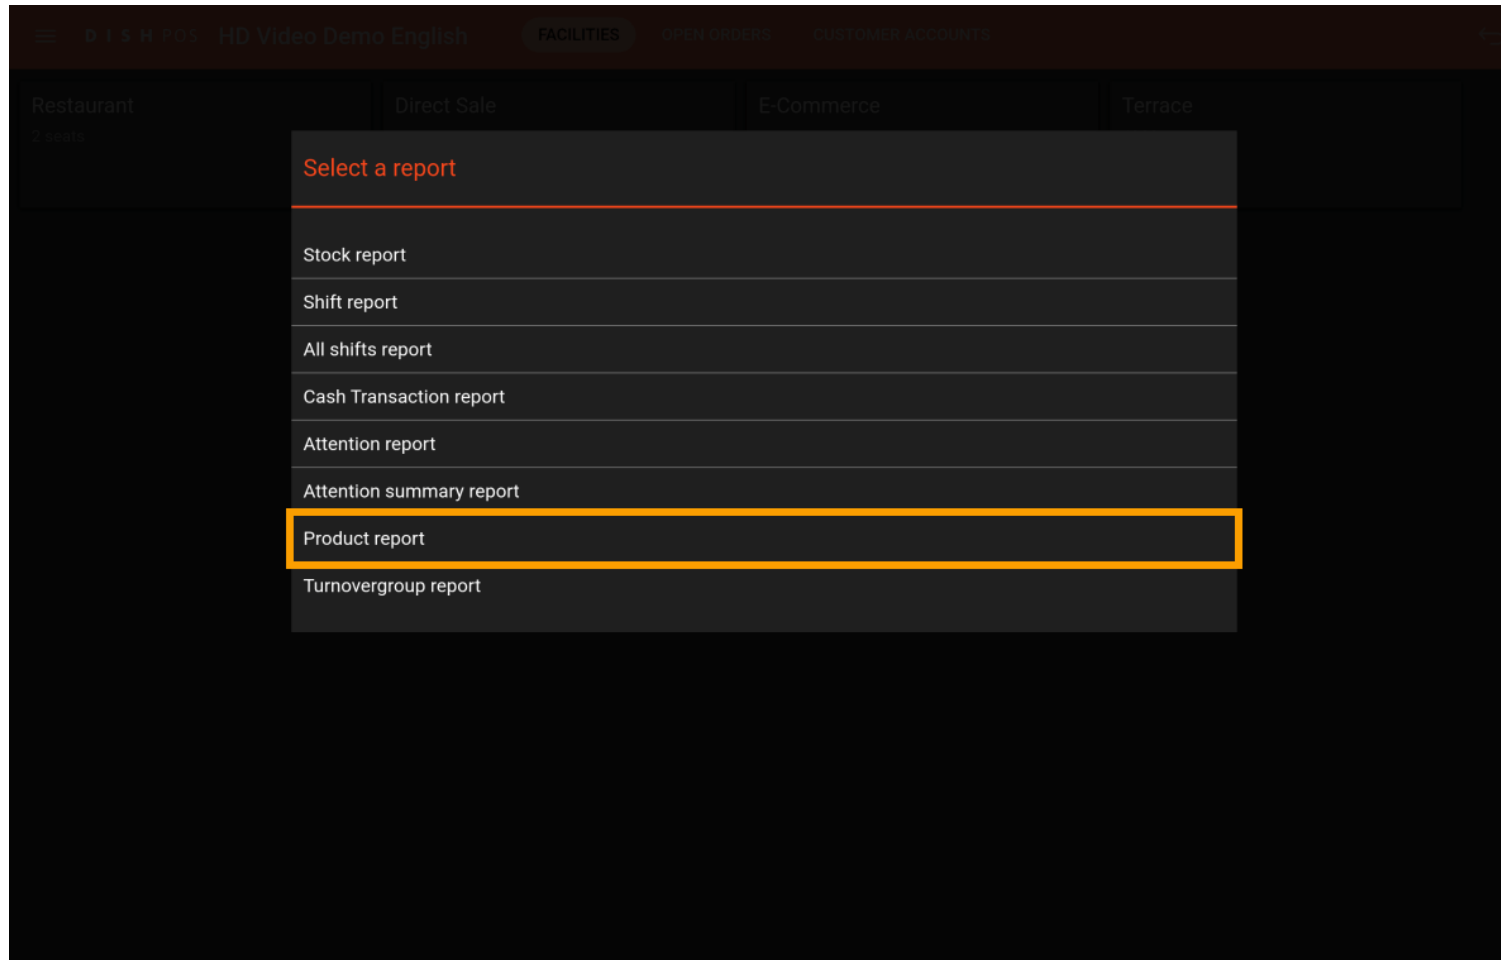

- To get a list of all the actions taken (e.g. moving a table, removing a product from an order), tap on **Attention report**. **Note: This report will only retrieve the information of the current logged-in user.**

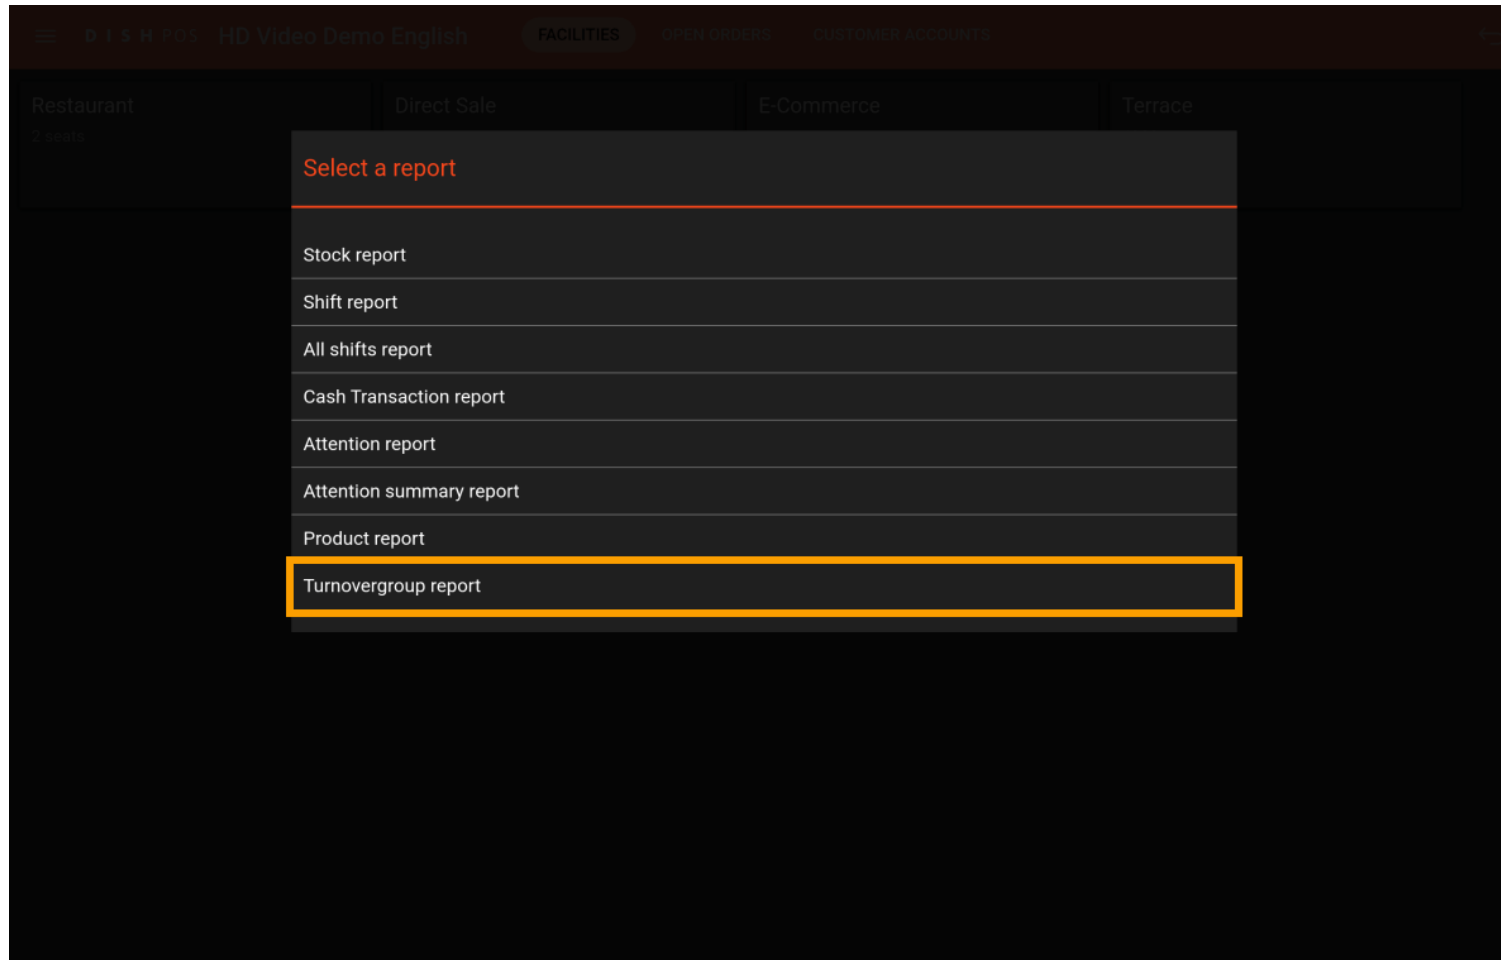

- To retrieve a list of all actions performed by all users (e.g. moving a table, removing a product from an order), tap on **Attention summary report**.

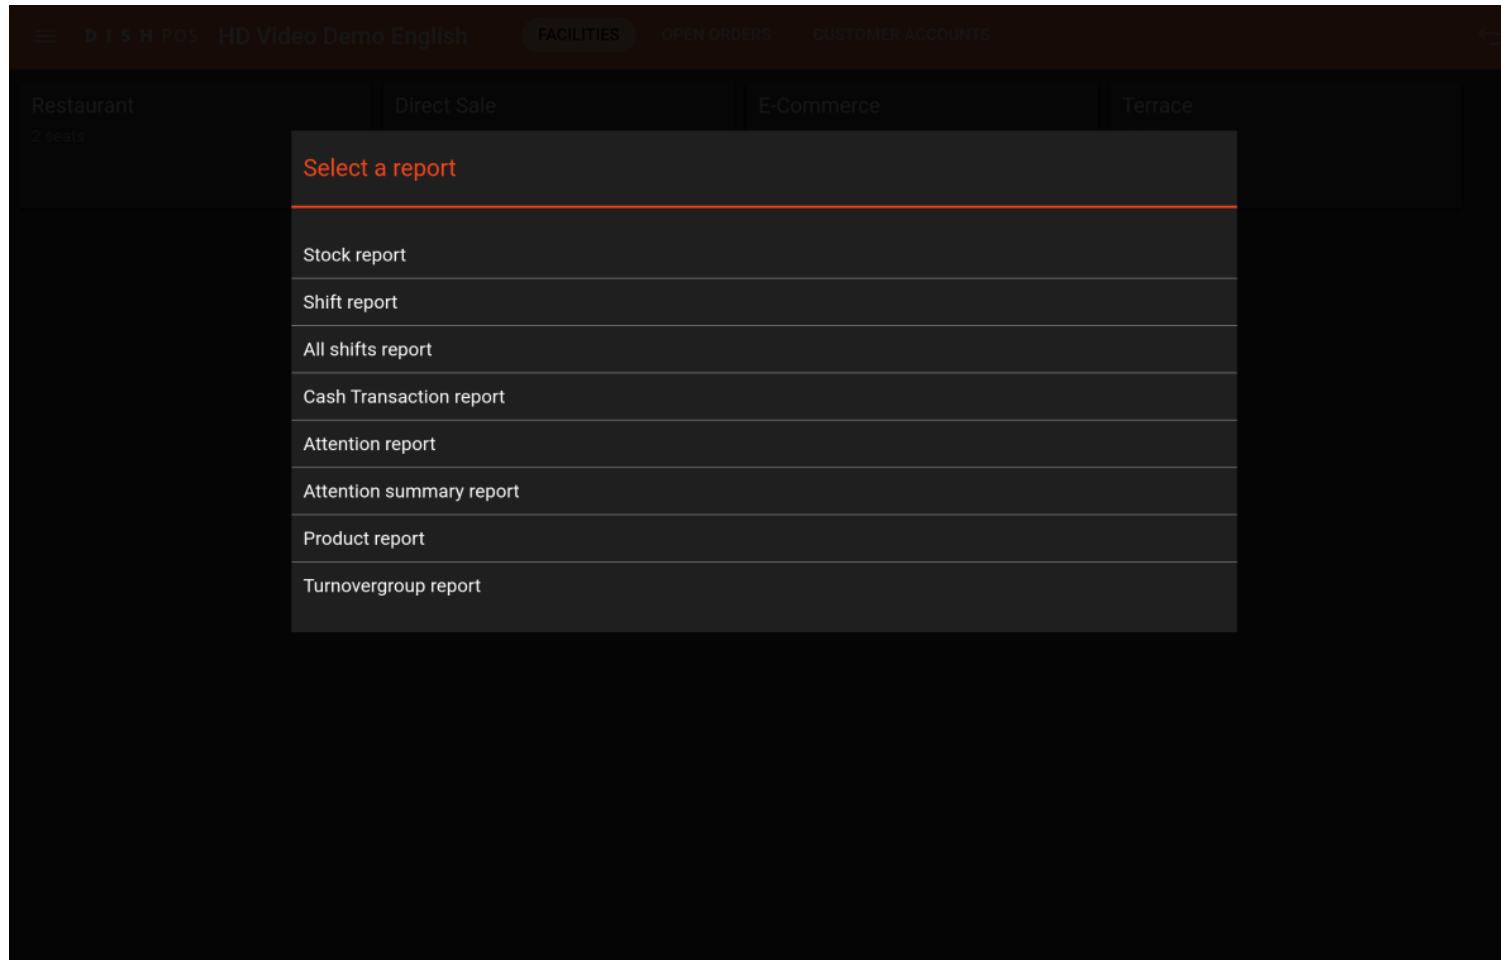

- 1 Select **Product report** to get a summary of all sold products, including the amount and the turnover.

To receive a report on the sales of the individual turnover groups, tap on **Turnovergroup report**.

 That's it. You completed the tutorial and now know how to print reports from your tablet.
