

Welcome to the DISH POS app. In this tutorial, we show you how to connect the app to your POS system.

First, tap on SETTINGS.

If you would like to change the device's name, tap on POS device name and adjust the name. Note: This step is optional.

← ⁽ ② Settings
Connection Server hostname/IP address
Server port number 8080
Server path
Server protocol http:
POS device name sdk_gphone64_arm64
POS ID number 874ff14a-1530-58f1-afa4-b6c5378d0b09
Miscellaneous
Debug mode, more error info
About DISH POS 1.20.1

• To connect the device with your POS system, you need to enter the corresponding IP address. To do so, tap on Server hostname/IP address.

← © Settings
Connection
Server hostname/IP address
