Welcome to the DISH POS dashboard. In this tutorial, we show you how to manage your POS devices. First, click on General.

Then got to POS devices.

You are now at the overview of your POS devices. To adjust the settings of a device, click on the corresponding edit icon.

A new window will open, where you can adjust the information of the POS device. To change the name of it, use the corresponding text field.

To change the assigned facility of the device, click on the corresponding drop-down menu.

Then select a facility from the options by setting the corresponding checkmark.

You can assign a user that is automatically logged in when the device is turned on. To do so, use the corresponding drop-down menu.

And select a user from the given options.

To then assign a payment method menu, use the corresponding drop-down menu.

And select menu from the given options.

Afterward, use the corresponding drop-down menu to assign a ticket printer to the POS device.

By suppressing the drawer signal, the drawer won't automatically open after a ticket got printed. To enable or disable this function, set the corresponding checkmark.

To assign a table map to the POS device, select a map by setting a checkmark for the respective table map.

Once you are done adjusting the device, click on Save to apply the changes.

Managing POS devices

Back in the overview, you can delete a POS device by using the bin icon.

To make sure you are not deleting an item on accident, you will be asked to confirm your action by clicking on Delete.

That's it. You completed the tutorial and now know how to manage your POS devices.
