

Dobrodošli na nadzornu ploču **DISH Reservation**. U ovom vodiču pokazat ćemo vam kako upravljati svojim stolovima i sjedalima.

The screenshot shows the DISH Reservation dashboard interface. On the left is a dark sidebar with navigation links: Reservations, Table plan, Menu, Guests, Feedback, Reports, Settings, and Integrations. The main content area has a top header with the restaurant name 'Test Restaurant - Test' and a language selector. Below this is a teal banner with a message about walk-in customers and two buttons: 'WALK-IN' and 'ADD RESERVATION'. A date range selector shows 'Thu, 28 Sep - Thu, 28 Sep'. A message states 'You have no limits configured for the selected date.' with an 'Add a new limit' button. Filter tabs for 'All', 'Completed', 'Upcoming' (selected), and 'Cancelled' are present, along with counts for reservations and guests. The main area displays 'No reservations available' with a magnifying glass icon. At the bottom, there is a 'Print' button, a status indicator for 'Too many guests in house?', and a footer with legal links and a design credit.

Prvo idite na **Postavke** u izborniku s lijeve strane.

If you choose to use seats-based setup, reservations will be managed according to the total number of seats available.

If you choose table-based setup, all reservations will be assigned one or more tables automatically. You will have the possibility to modify the automatically assigned tables. Only you can see the assigned tables. Your guests are not shown tables during the reservation process.

You are using table-based setup

IMPORTANT: Please be aware that the change to table mode can take some time. All reservations will be automatically assigned to tables. To make this properly work for existing reservations, please make sure that the overall amount of seats on the tables is the same as the amount of seats configured before.

Area(s)

If your establishment has multiple areas or rooms, you may want to define an area before you start assigning tables to it. e.g.: Indoor, Outdoor, Bar, Lounge, etc.

Your active areas are listed below:

Restaurant

Table(s)

Tables are assigned to specific areas. When you pause a whole area, all tables assigned to that area will be paused. This may make some of your future reservations invalid. Don't worry, you can just move them to other available table(s). When you deactivate a table for "reservable online", reservations made online won't be assigned to this tables. You can also assign tables a booking priority between 1 (high) and 3 (low). The tables with high priority will be preferred for incoming reservations.

Table name	Seats (6)	Area name	Priority	Status	Reservable online
1	2	Restaurant	1	Active	Active
2	4	Restaurant	2	Active	Active

Tablegroups

Too many guests in house?

7 od 16

Zatim možete urediti ime, odlučiti može li ga gost odabrati prilikom rezervacije i postaviti ga aktivnim ili neaktivnim. Kao i dodavati nova područja i brisati ih.
