

Bun venit în tabloul de bord al **serviciului DISH Reservation**. În acest tutorial, vă vom arăta cum să vă gestionați mesele și locurile.

The screenshot displays the DISH Reservation dashboard interface. On the left is a dark sidebar with navigation links: Reservations, Table plan, Menu, Guests, Feedback, Reports, Settings, and Integrations. The main content area has a dark header with the title 'DISH RESERVATION', a notification bell, and a dropdown menu showing 'Test Restaurant - Test'. Below the header is a light blue banner with a message about walk-in customers and two buttons: 'WALK-IN' and 'ADD RESERVATION'. A date selector shows 'Thu, 28 Sep - Thu, 28 Sep'. Below this, a message states 'You have no limits configured for the selected date.' with an 'Add a new limit' button. A filter bar includes radio buttons for 'All', 'Completed', 'Upcoming' (selected), and 'Cancelled', along with icons for a calendar and guests. The main content area shows a large grey box with a magnifying glass icon and the text 'No reservations available'. At the bottom left, there is a 'Print' button and a status message 'Too many guests in house? Pause online reservations' with a pause icon. At the bottom right, there is a help icon (question mark) and a footer with links: FAQ, Terms of use, Imprint, Data privacy, and Privacy Settings. A small copyright notice 'Designed by Hospitality Digital GmbH. All rights reserved.' is also present.

To make this properly work for existing reservations, please make sure that the overall amount of seats on the tables is the same as the amount of seats configured before.

Area(s)

If your establishment has multiple areas or rooms, you may want to define an area before you start assigning tables to it. e.g.: Indoor, Outdoor, Bar, Lounge, etc.

Your active areas are listed below:

Table(s)

Tables are assigned to specific areas. When you pause a whole area, all tables assigned to that area will be paused. This may make some of your future reservations invalid. Don't worry, you can just move them to other available table(s). When you deactivate a table for "reservable online", reservations made online won't be assigned to this tables. You can also assign tables a booking priority between 1 (high) and 3 (low). The tables with high priority will be preferred for incoming reservations.
