

📱 The first step is to open the **DISH Order app** on your terminal.

Now enter your **restaurant ID**. Note: You can find it in your admin panel. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

The screenshot shows the DISH ORDER app interface on a mobile device. The status bar at the top indicates 3G connectivity, 67% battery, and the time 16:07. The app has an orange background with the text "DISH ORDER" in white. Below the title, there is a text input field labeled "Restaurant ID" with an orange border. Underneath is a "Security Token" label with a horizontal line for input. A white "SUBMIT" button is positioned to the right. A blue link "Use QR Code to pair device with Restaurant Website" is located below the button. At the bottom, a message reads: "Have you deleted the App Data? Contact your System Administrator for further notice." The Android navigation bar is visible at the very bottom.

And afterwards your **security token**. Note: You can find it in your admin panel. It is the API key. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.
