

At the dashboard tap on the **drop-down menu icon** to open the editing menu.

The admin panel will be displayed. Now select **account**.

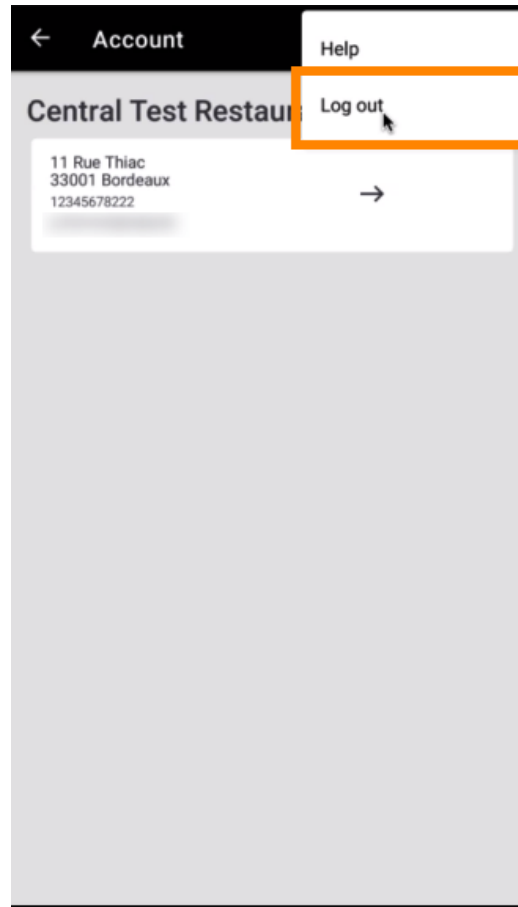

Then click on the **three dots** in the top right corner.

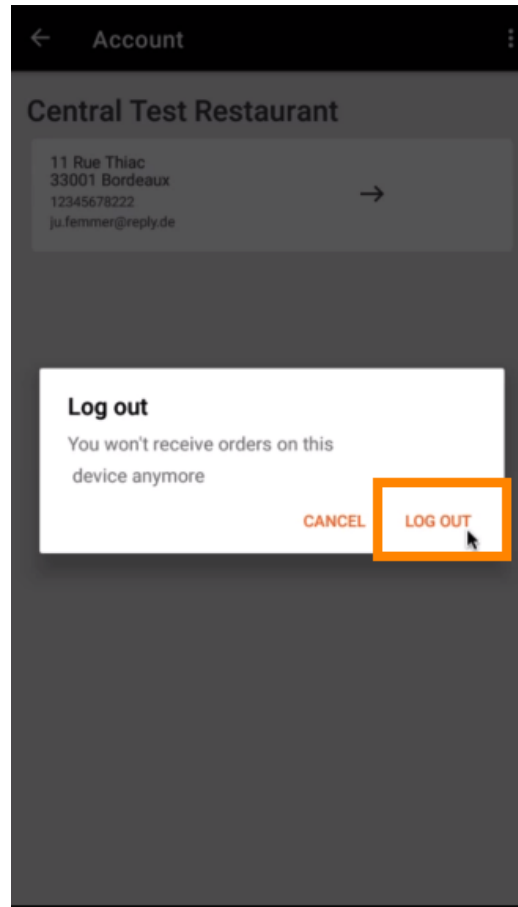

And select **log out**.

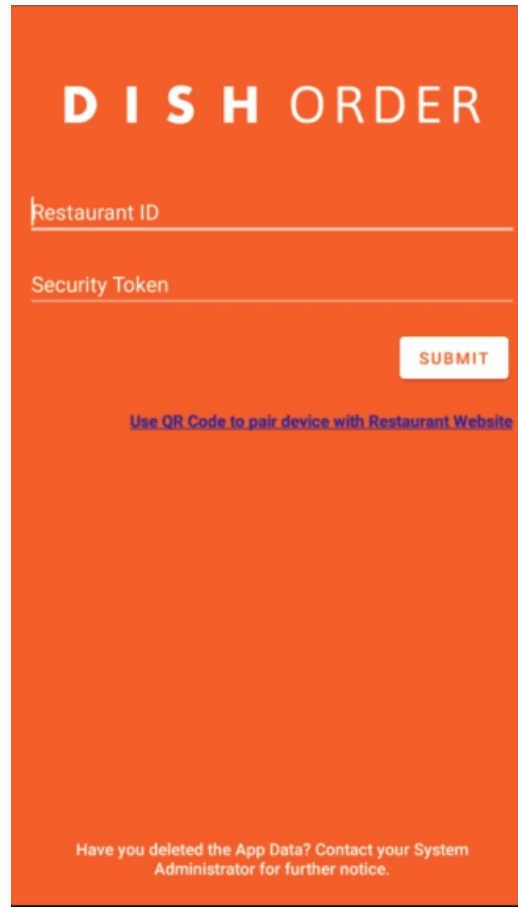

Again click on **log out** to confirm your action.

You will be redirected to the login page. Here you can log in again. That's it. You're done.

The image shows a screenshot of the DISH ORDER app's login screen. The background is a solid orange color. At the top, the text "DISH ORDER" is displayed in white, with "DISH" in a larger font and "ORDER" in a smaller font. Below this, there are two input fields: "Restaurant ID" and "Security Token", both with white text on an orange background. To the right of the "Security Token" field is a white button with the word "SUBMIT" in orange. Below the input fields, there is a link that says "Use QR Code to pair device with Restaurant Website" in a smaller, lighter font. At the bottom of the screen, there is a small line of text: "Have you deleted the App Data? Contact your System Administrator for further notice."
