

Welcome to the DISH POS app. In this tutorial, we give you an overview of the screen features.

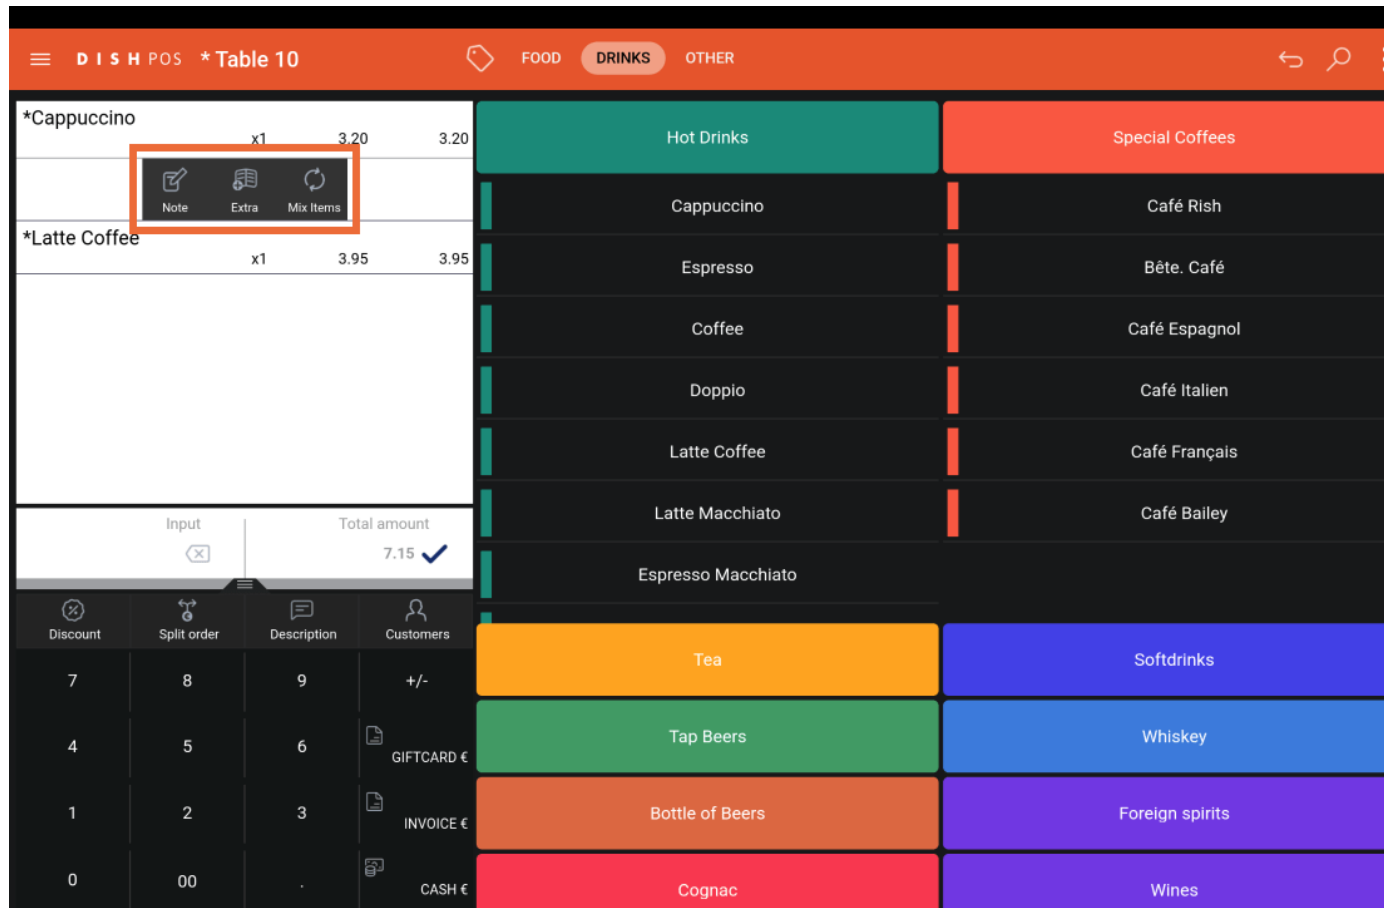

To open product related features, tap on the item's **name**.

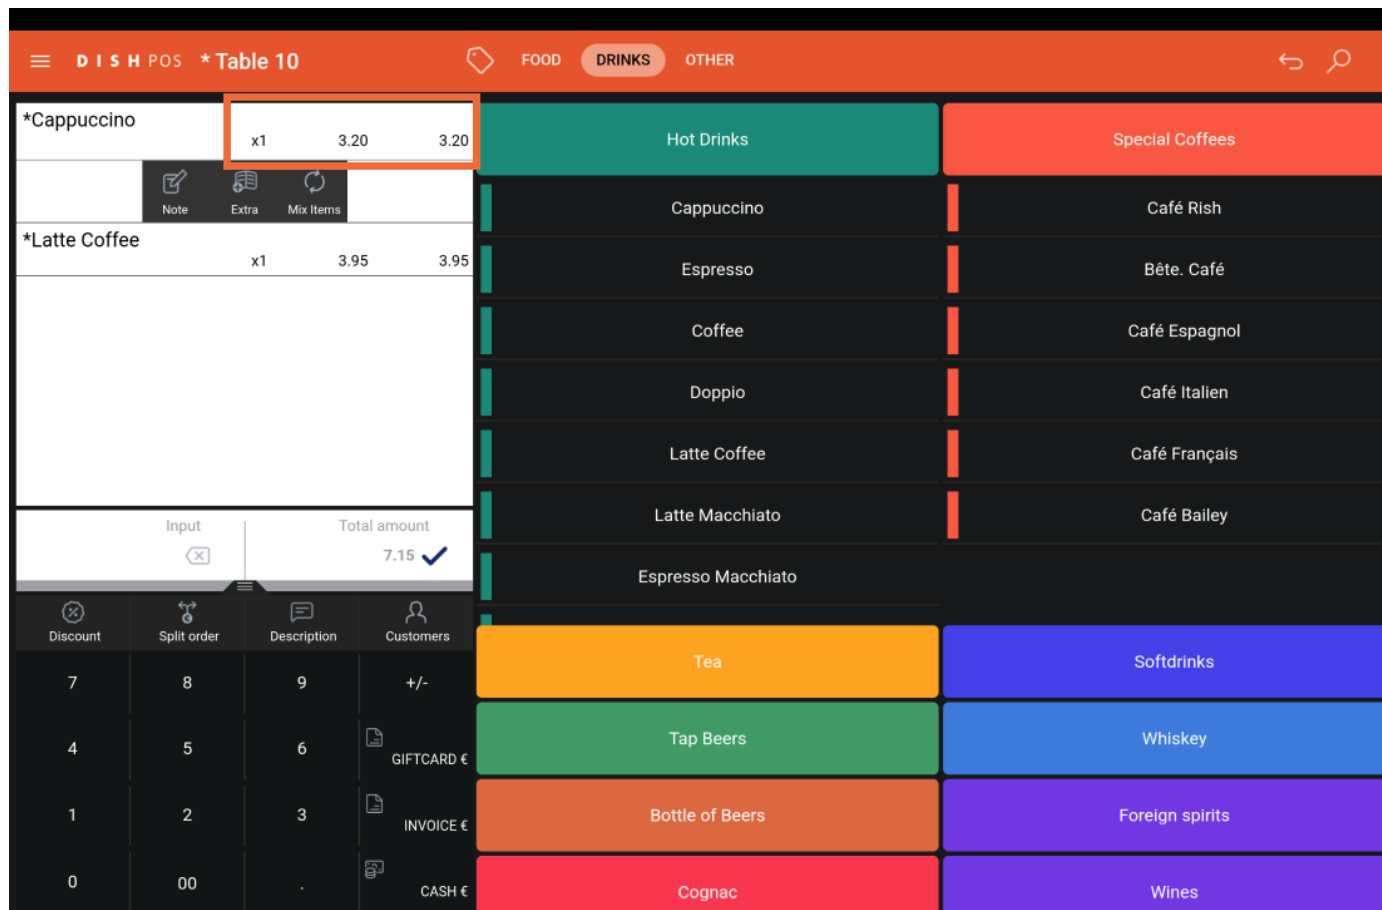

They are then displayed below the selected item.

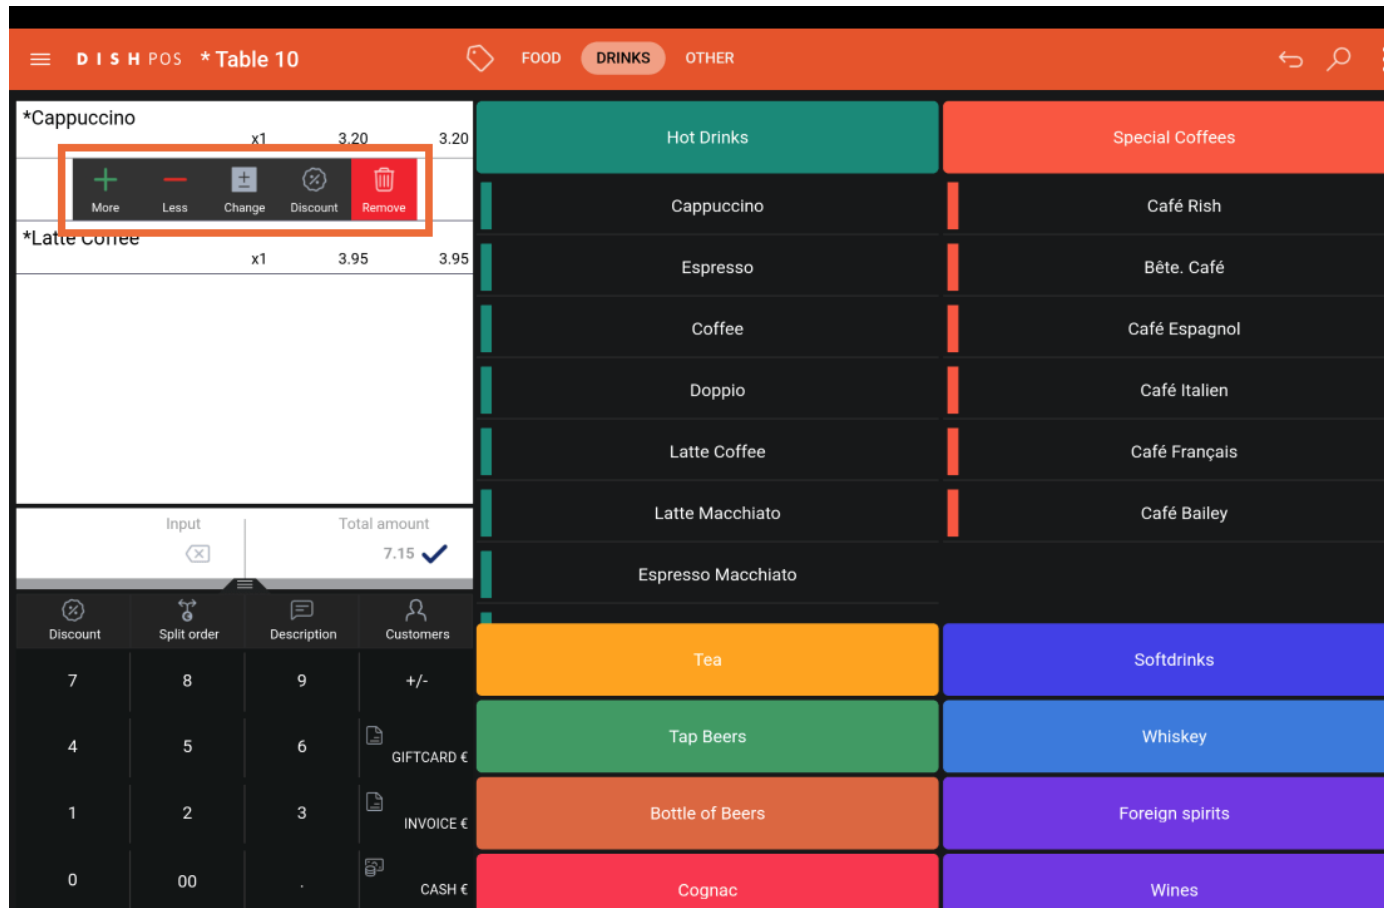

Tap on the **information** of an item to open the respective functions.

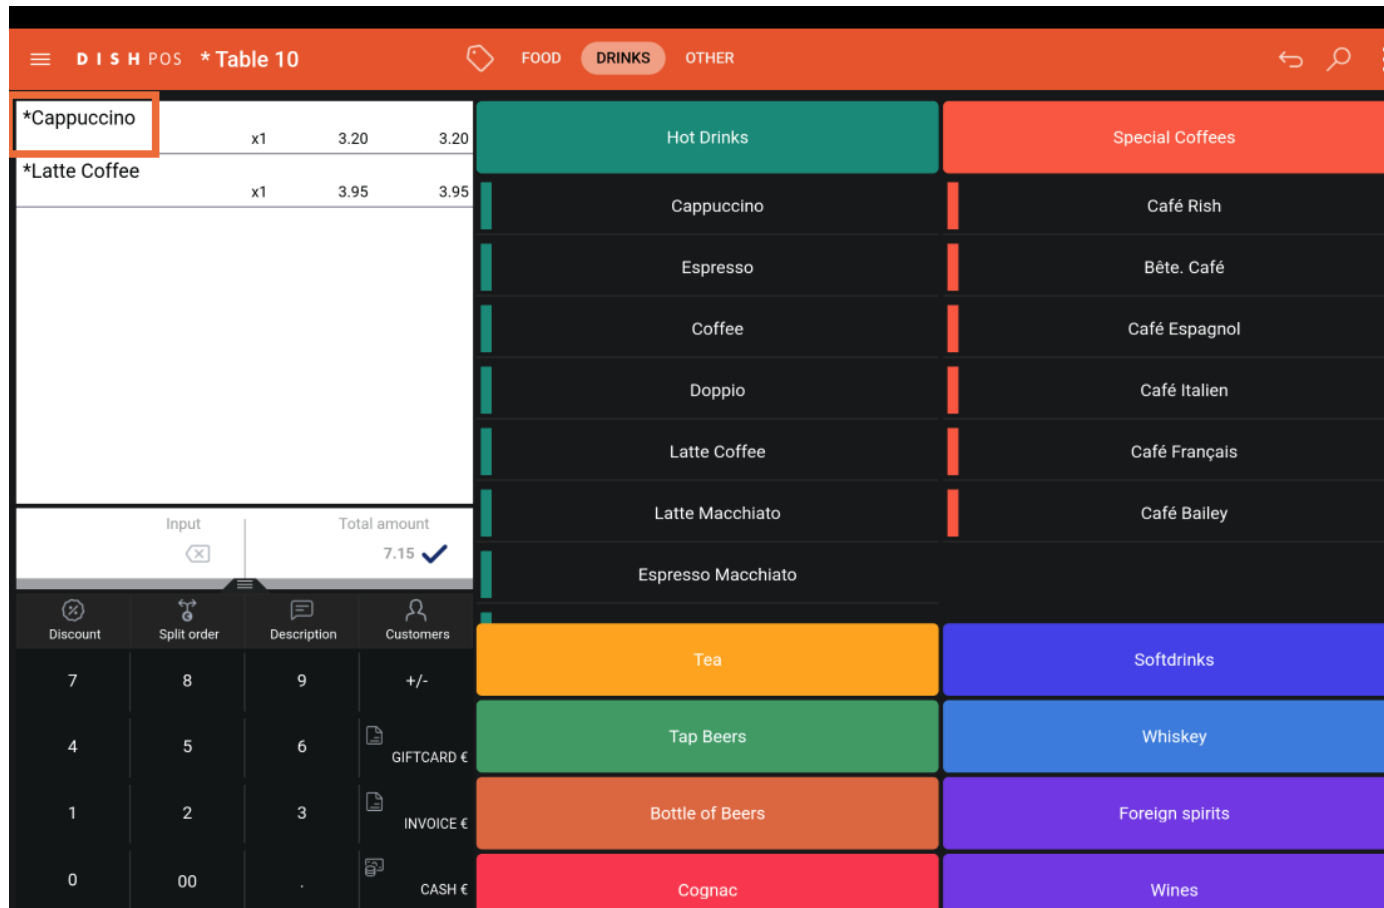

They are then displayed below the selected item.

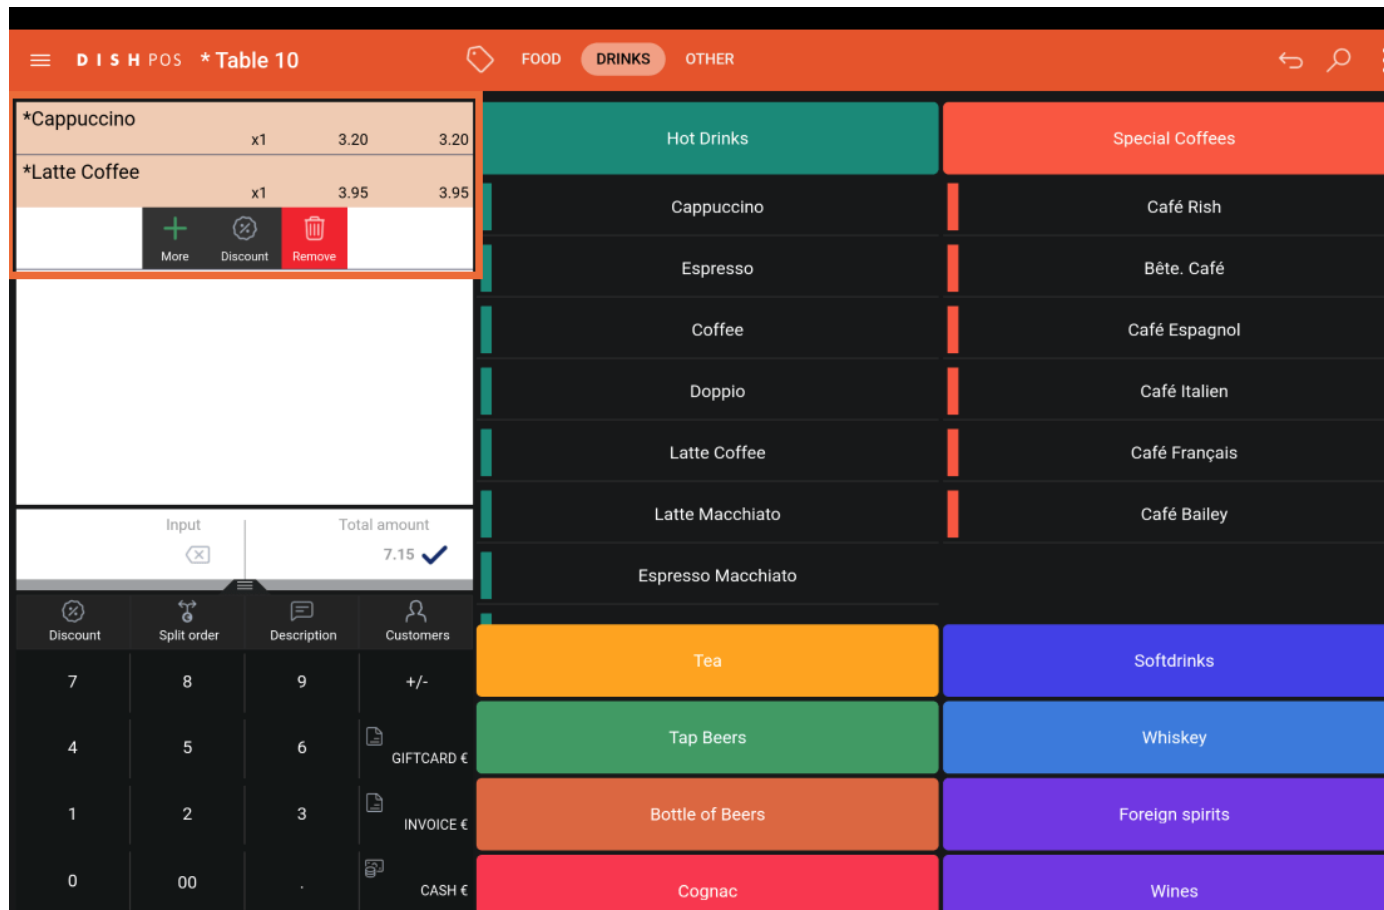

Long press an **item** to enable the multi select.

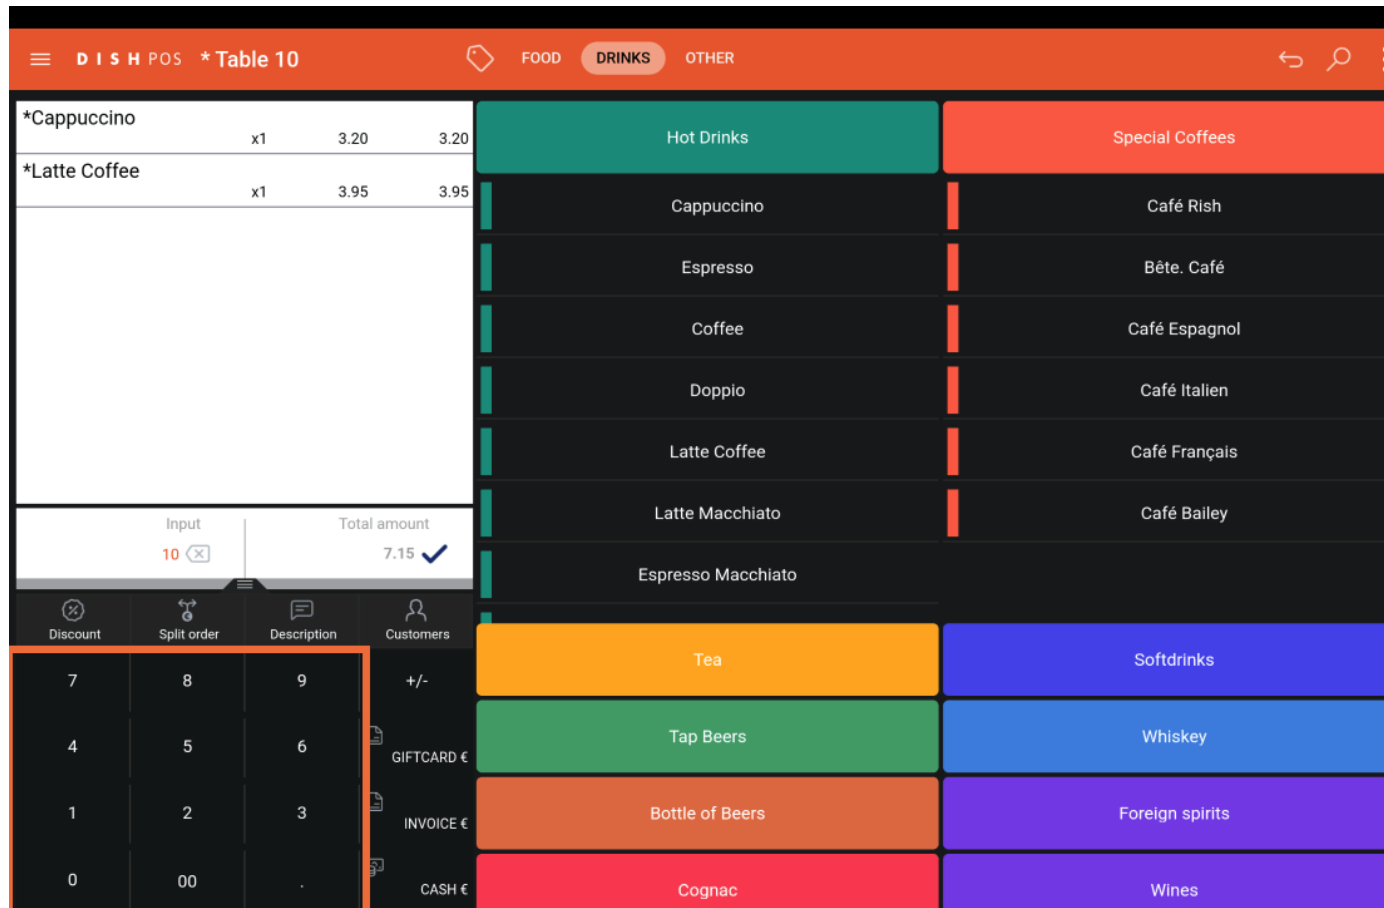

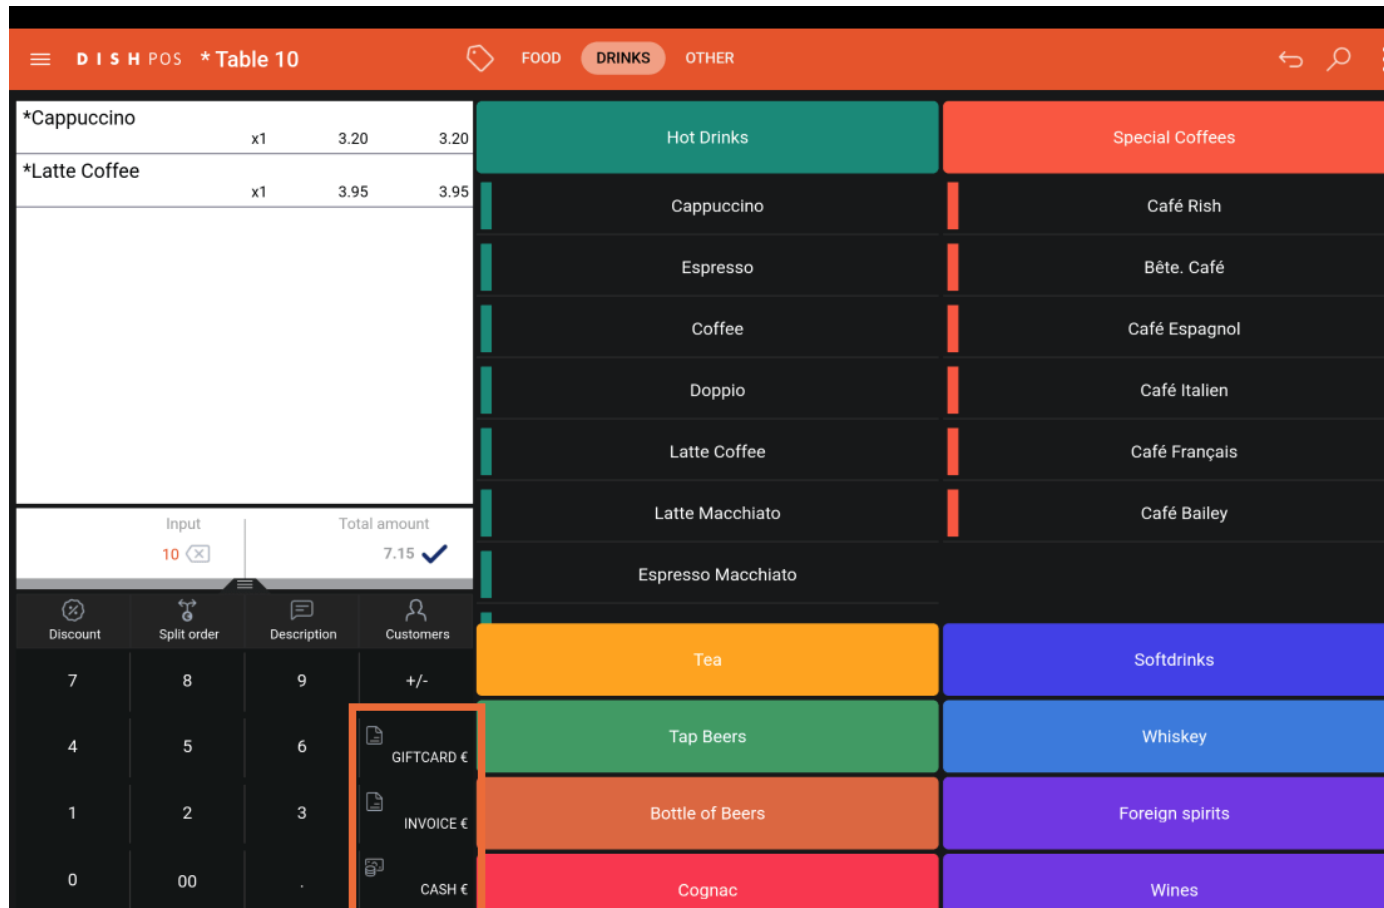

You then can select multiple **items** and decide if you like to adjust the amount of them, assign a discount or remove them from the order.

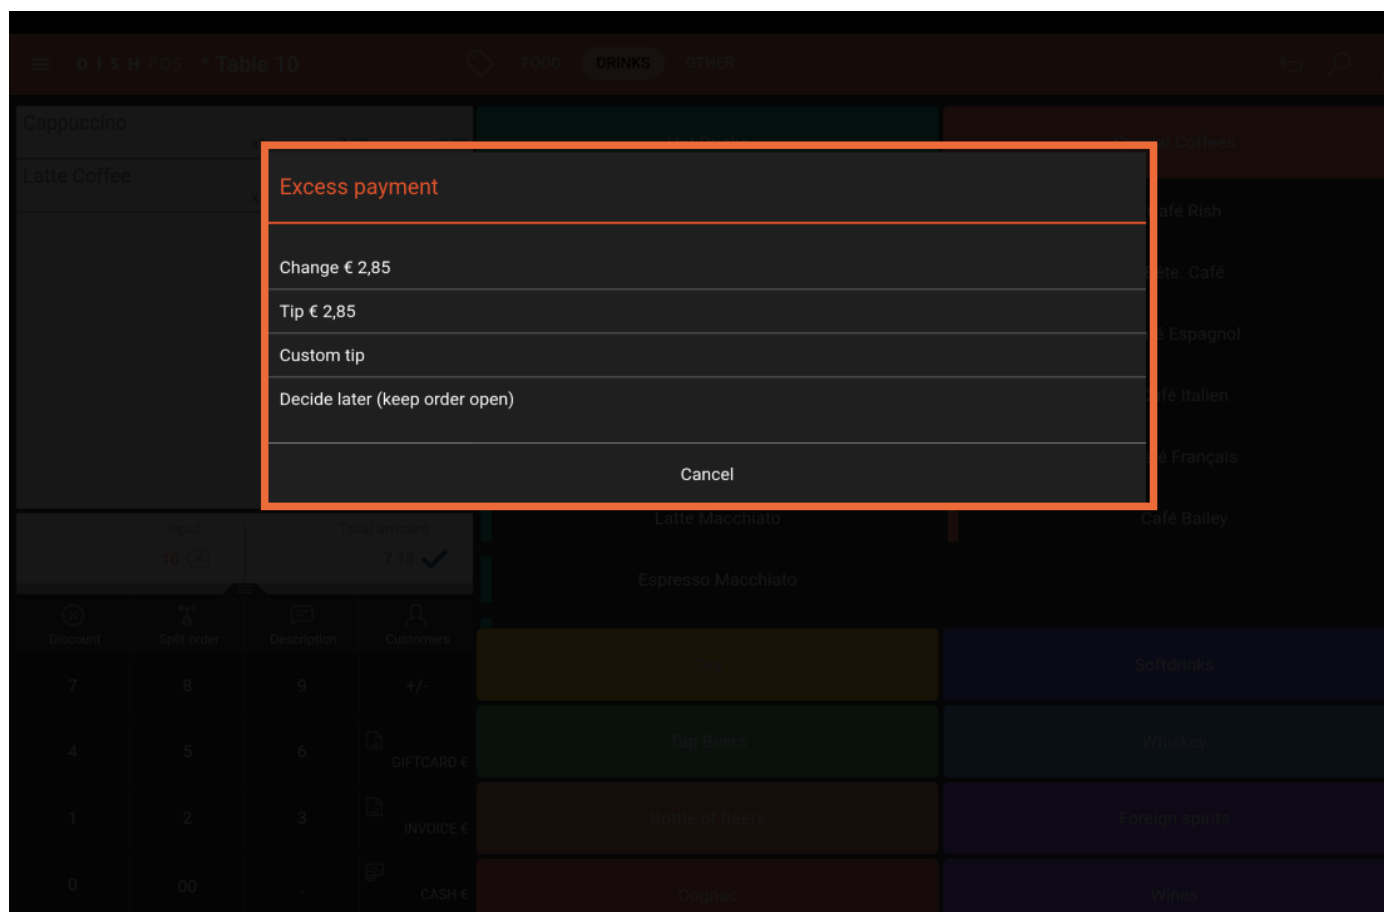

Use the **input field** to enter the amount that was given you by the guest.

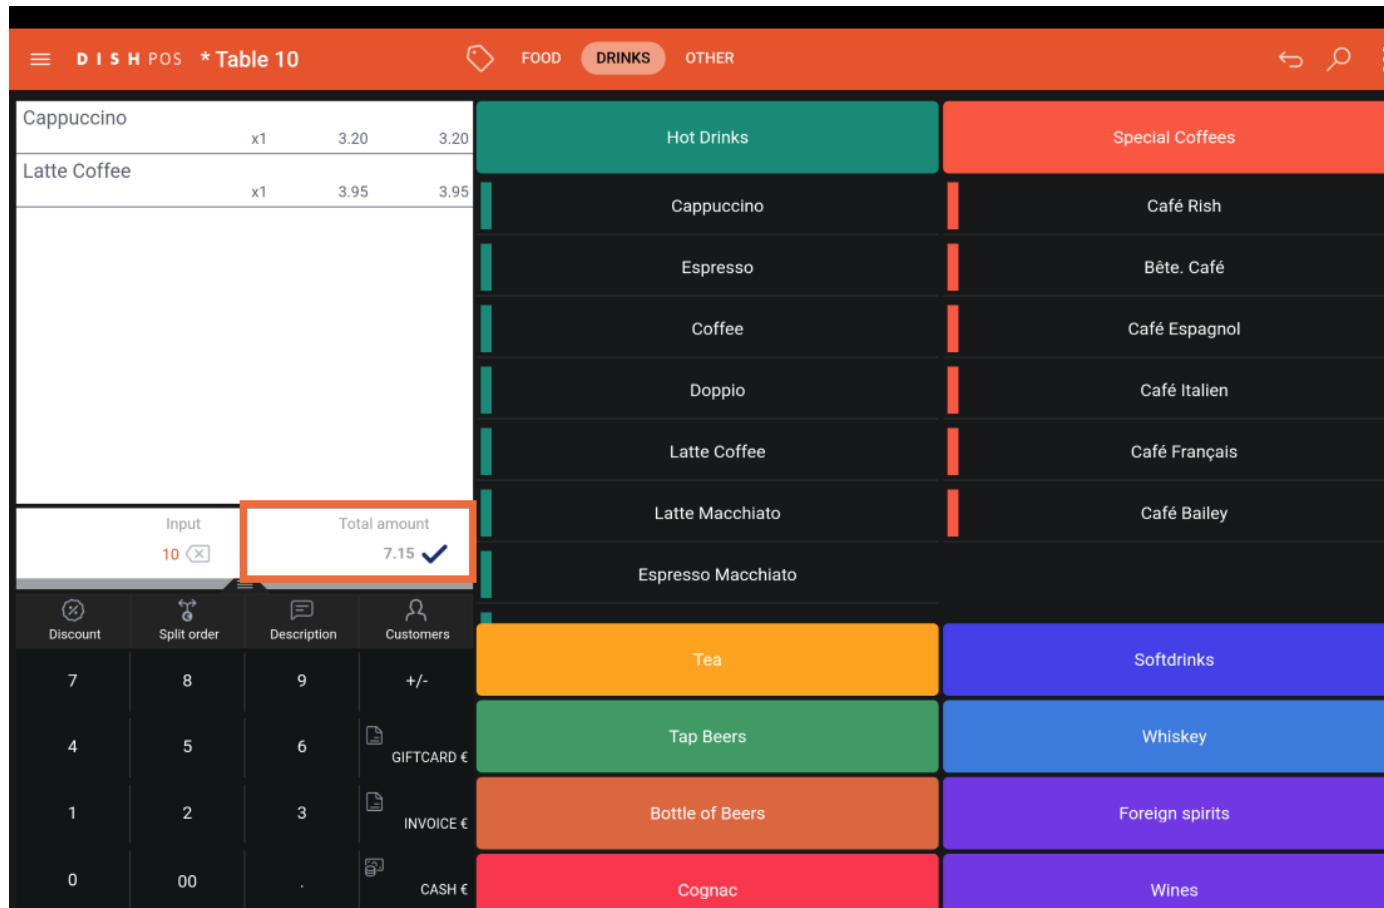

To select a payment method, use one of the given **options**.

-  A pop-up will appear asking you how you want to handle the excess payment. You can choose between giving it back as change, keep it as tip, keep only a certain amount as tip and to continue later with the excess payment.

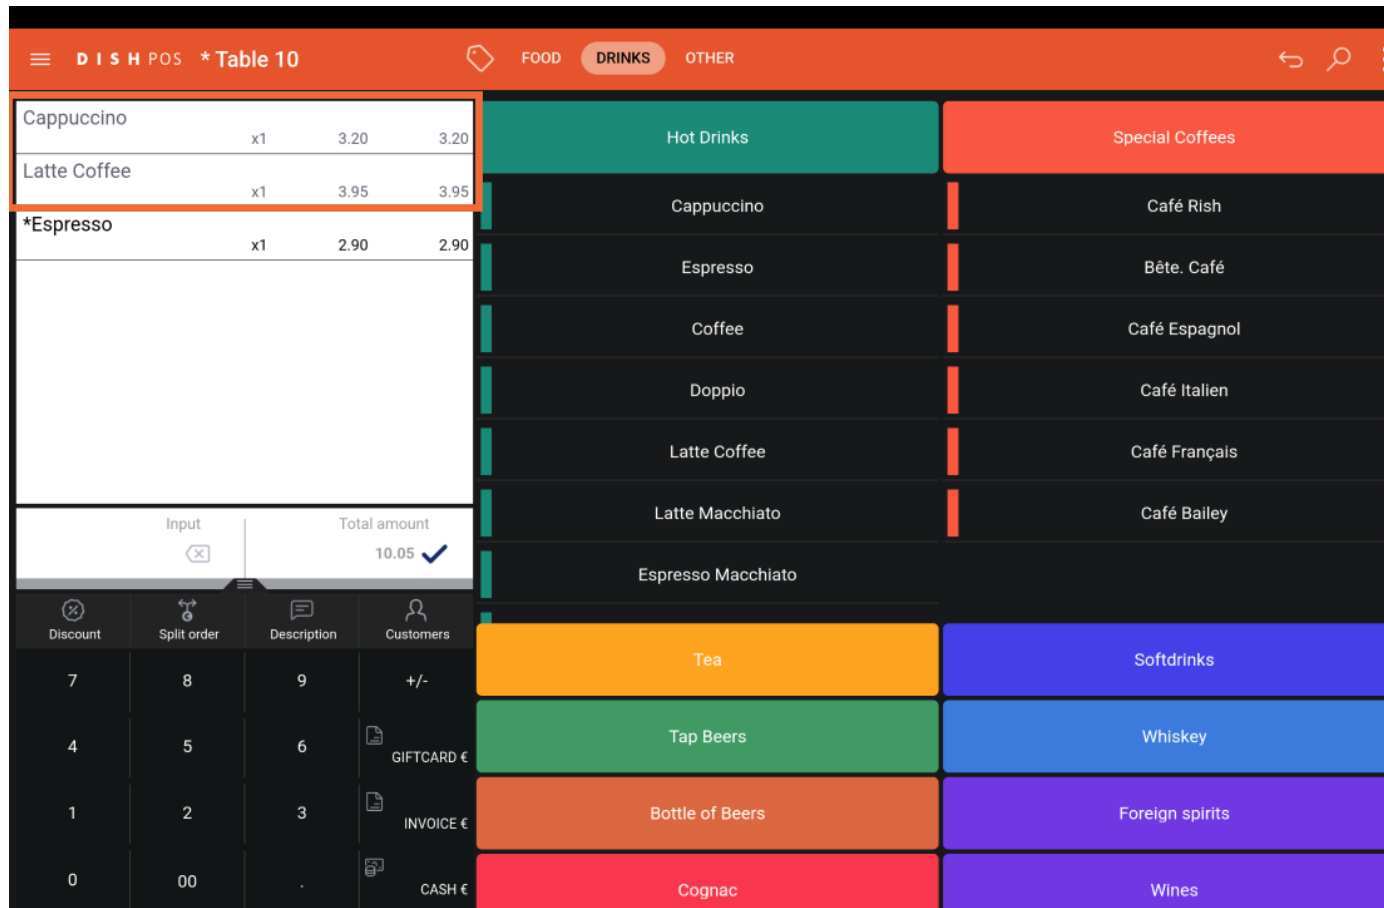

To confirm an order, tap on the **Total amount field**.

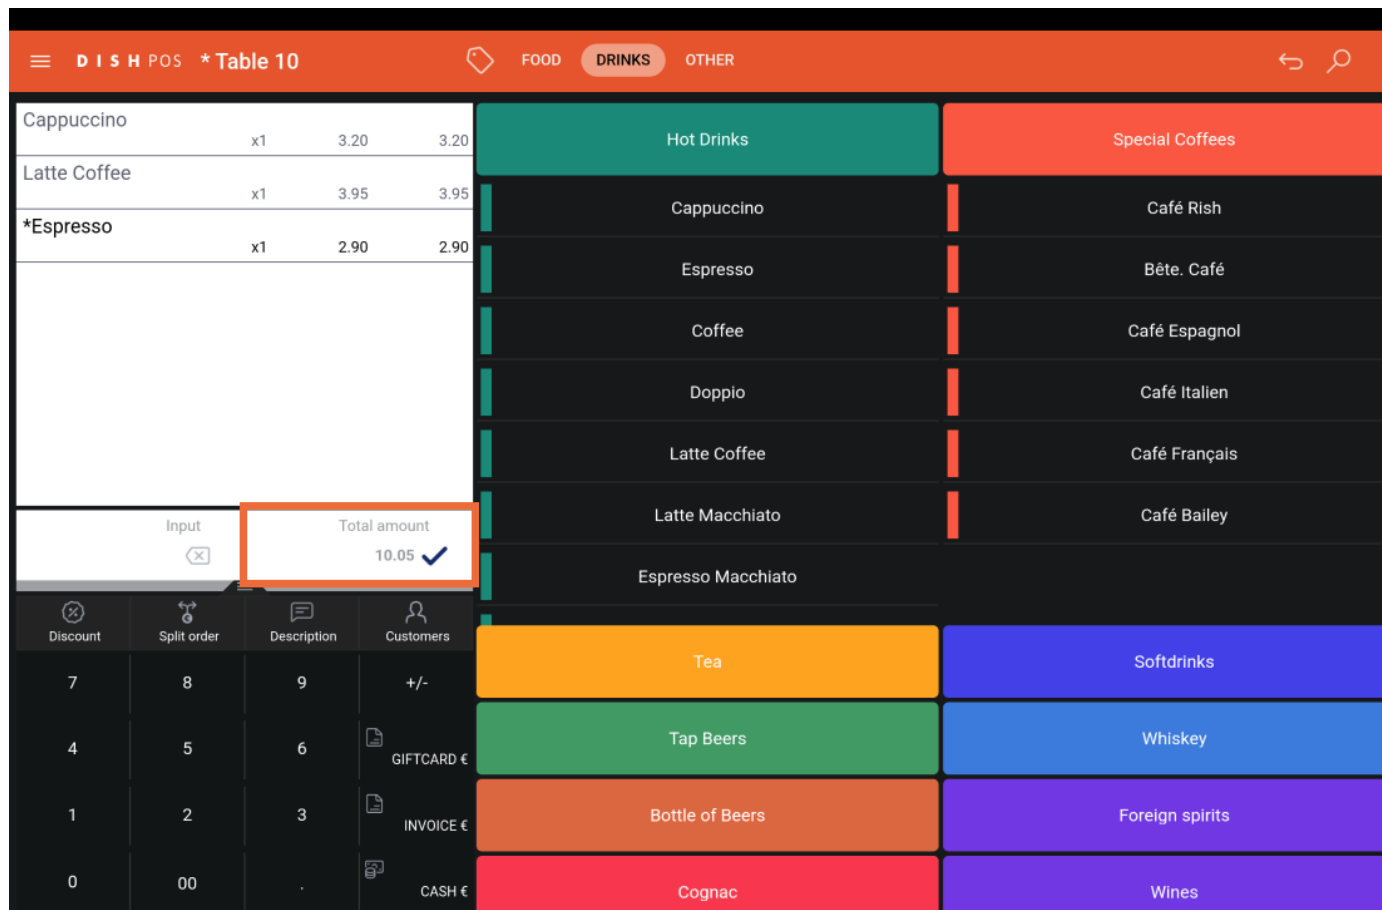

A light gray article means an article is confirmed.

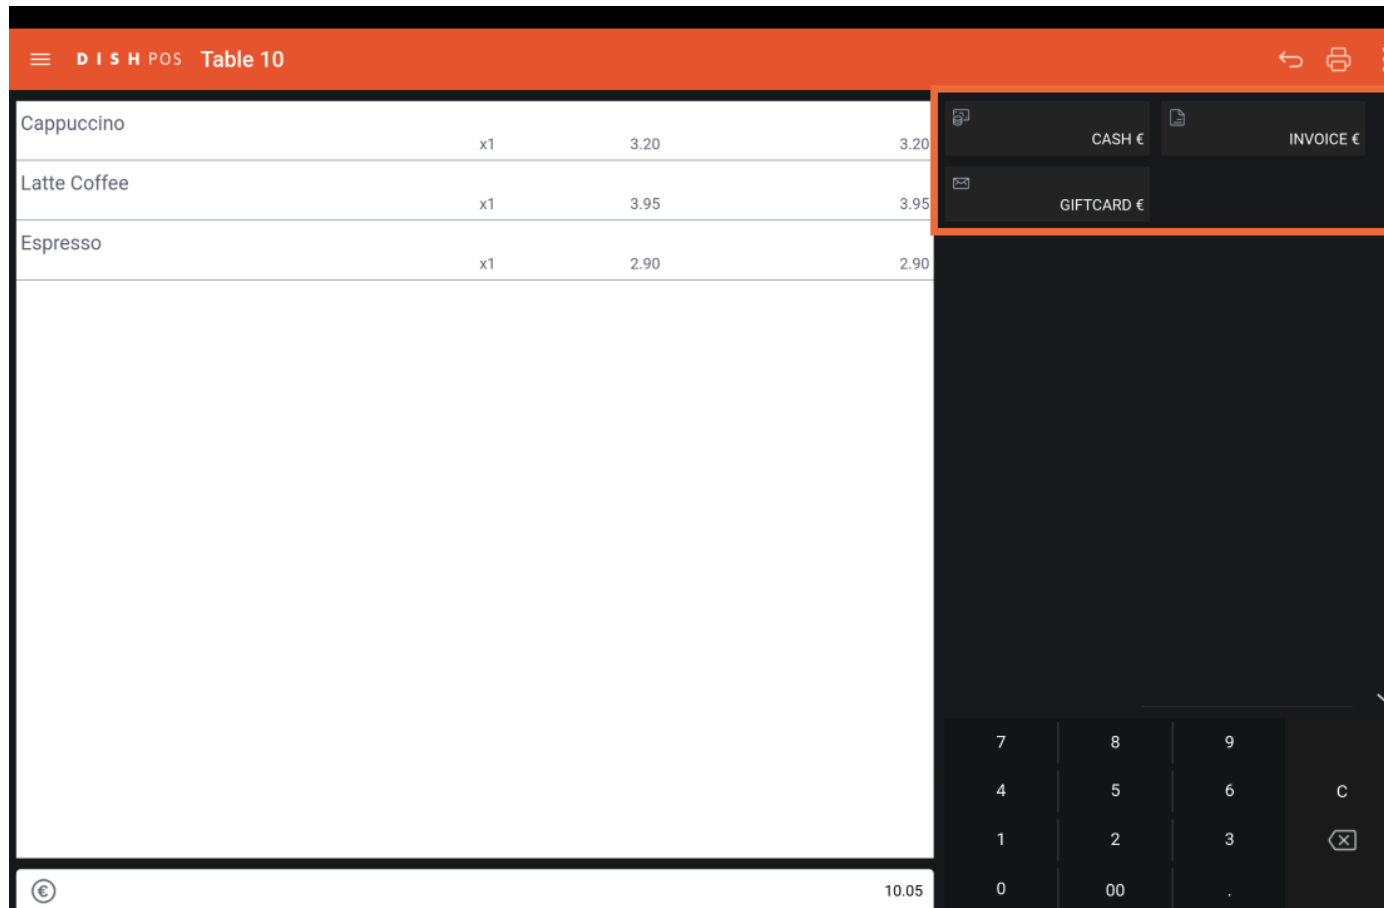

Long press the **total amount** to go to the payment detail screen.

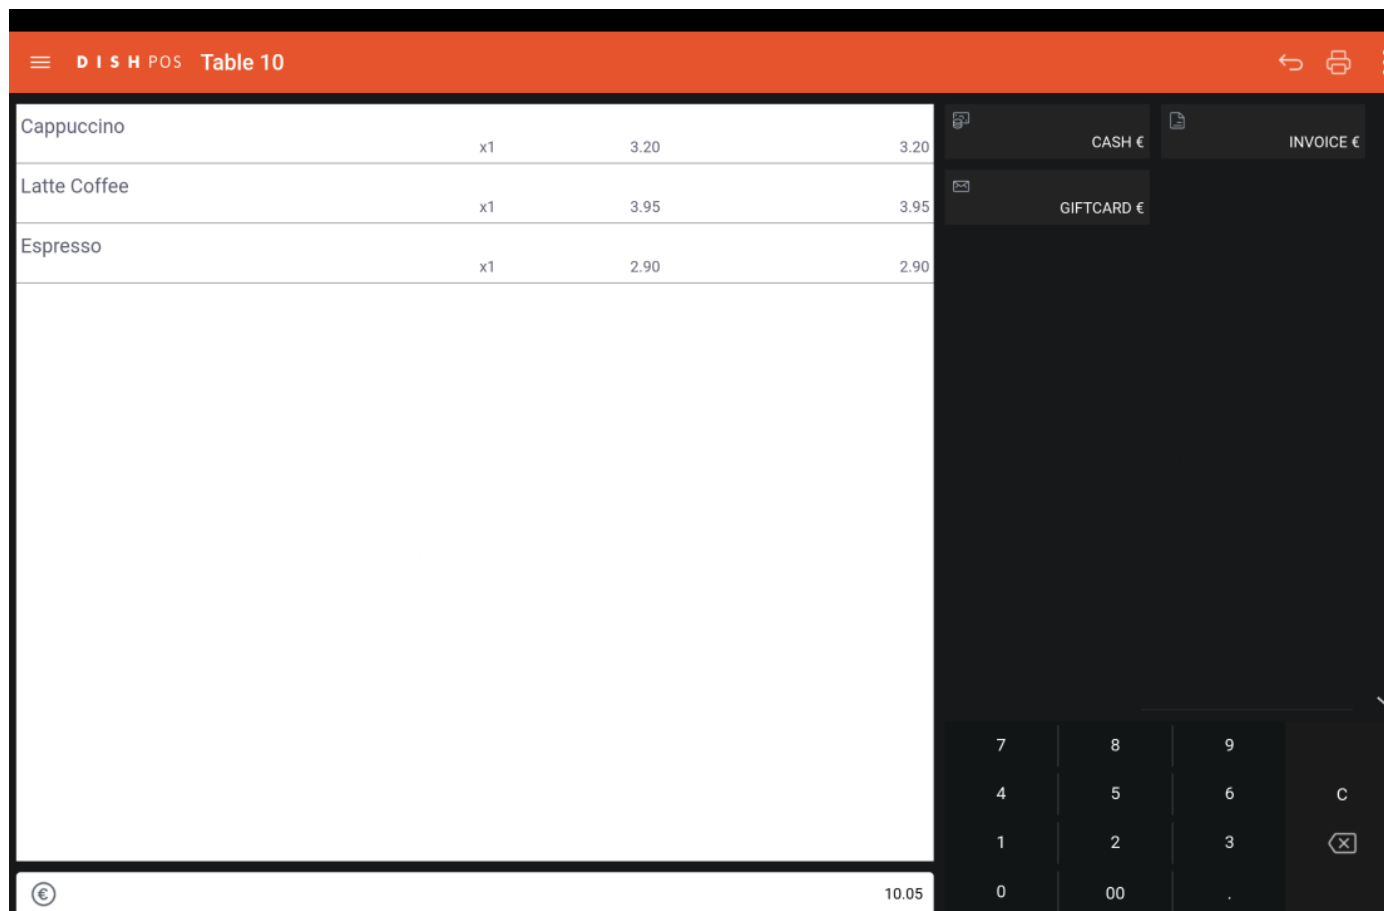

To then check out, select a **payment method**.

That's it. You completed the tutorial and now have an overview of the screen features.
