

Welcome to the DISH POS app. In this tutorial, we show you how to select a fixed-price menu.

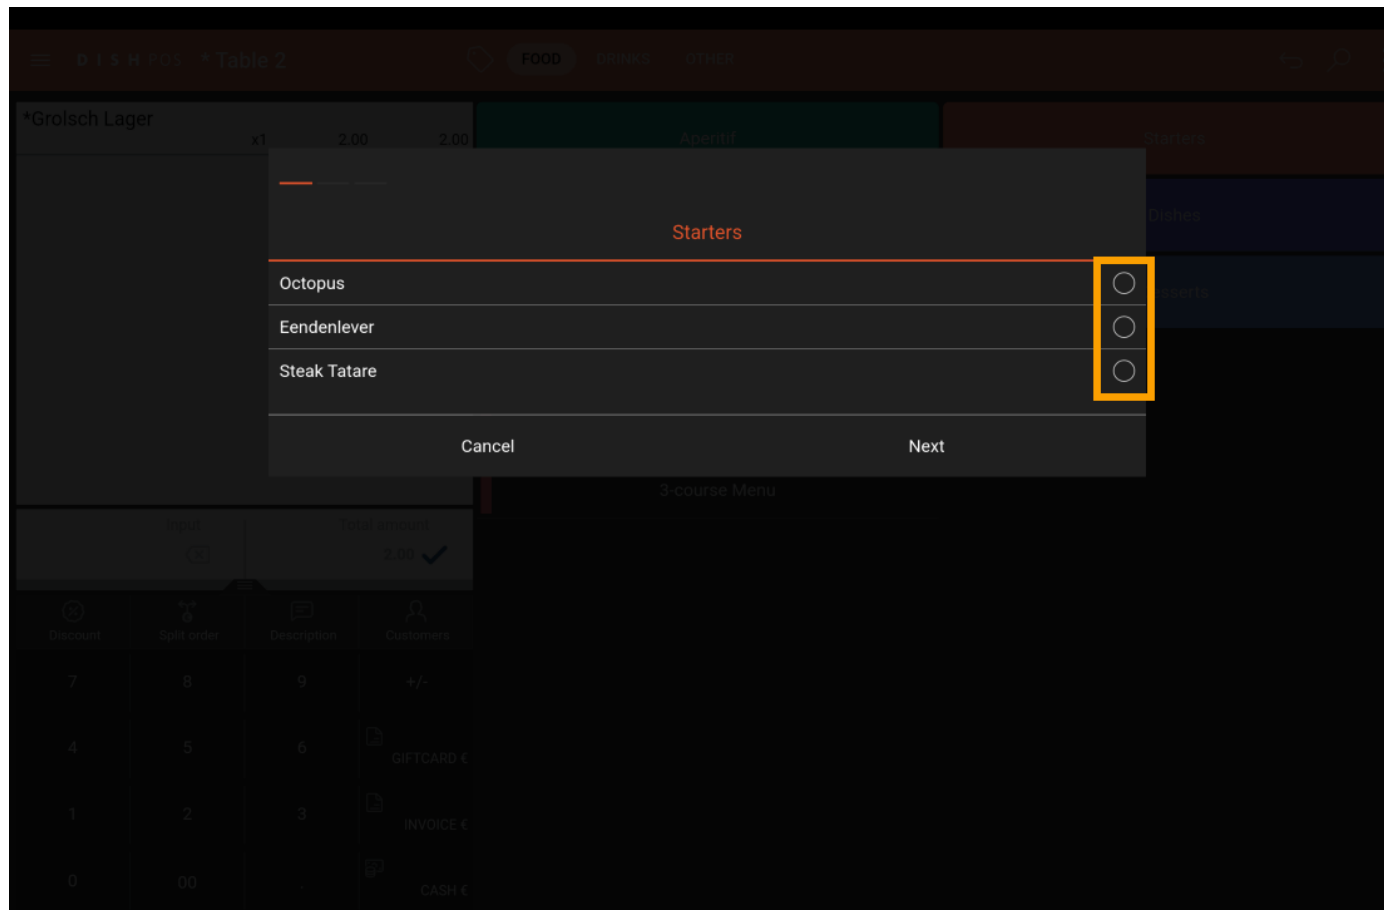

During the ordering process, select the **menu** you like to add.

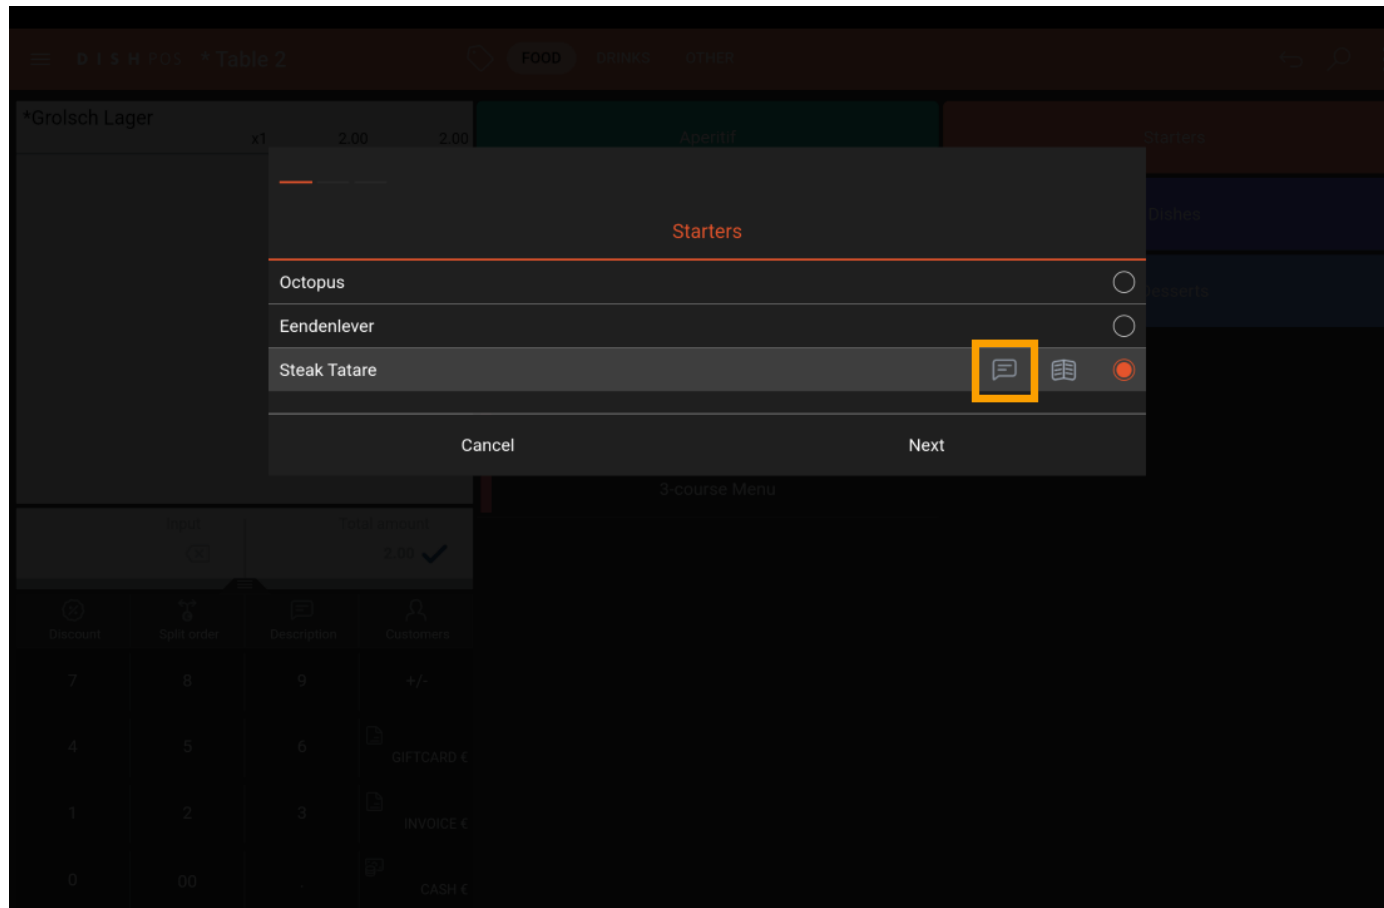

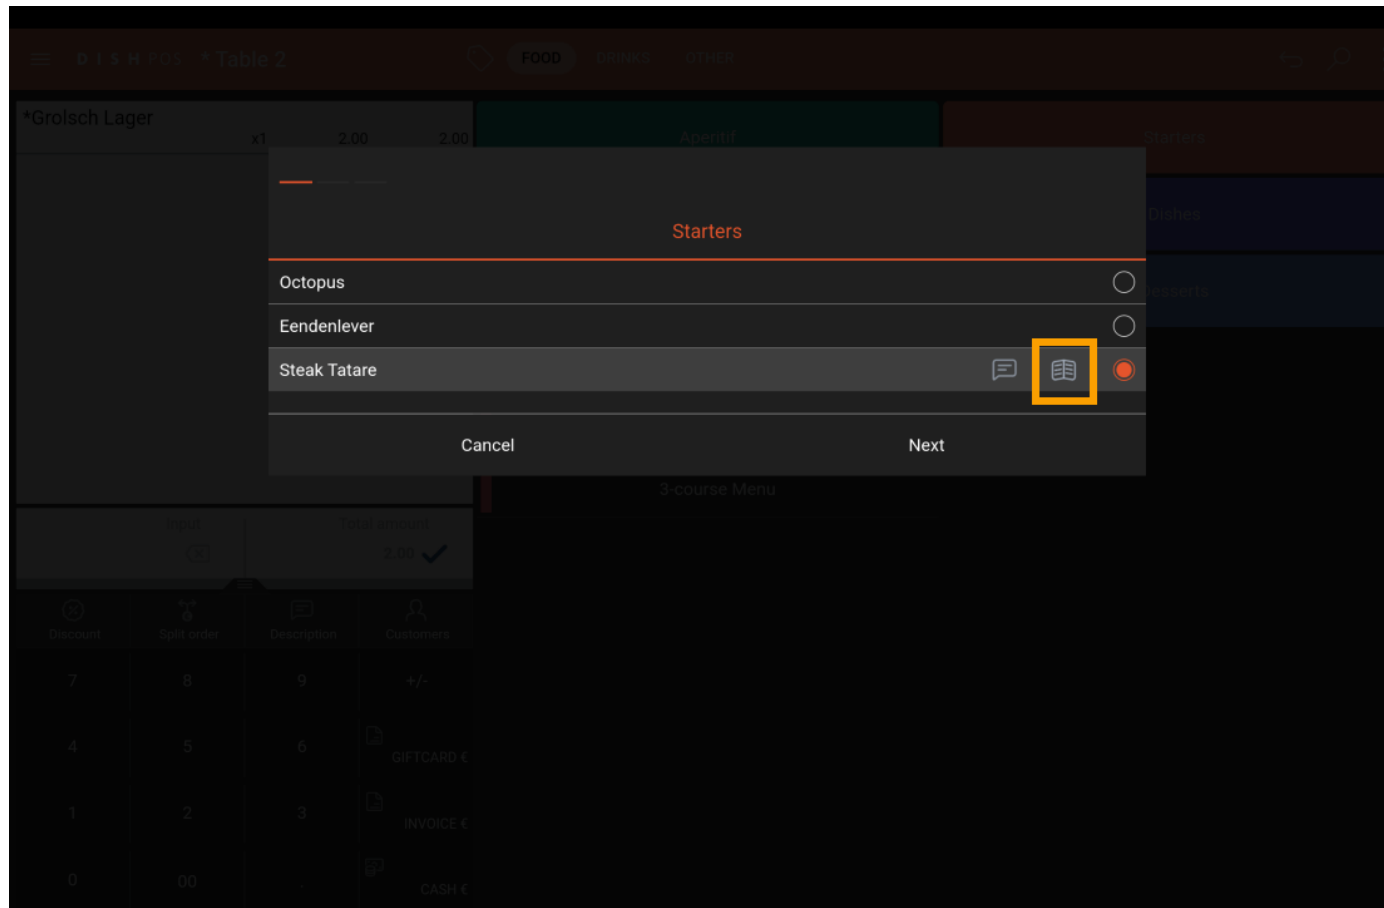

A pop-up window will appear asking you to select an item for the first course. Do so, by setting the respective **checkmark**.

To add a note to the selected item, tap on the **speech bubble icon**.

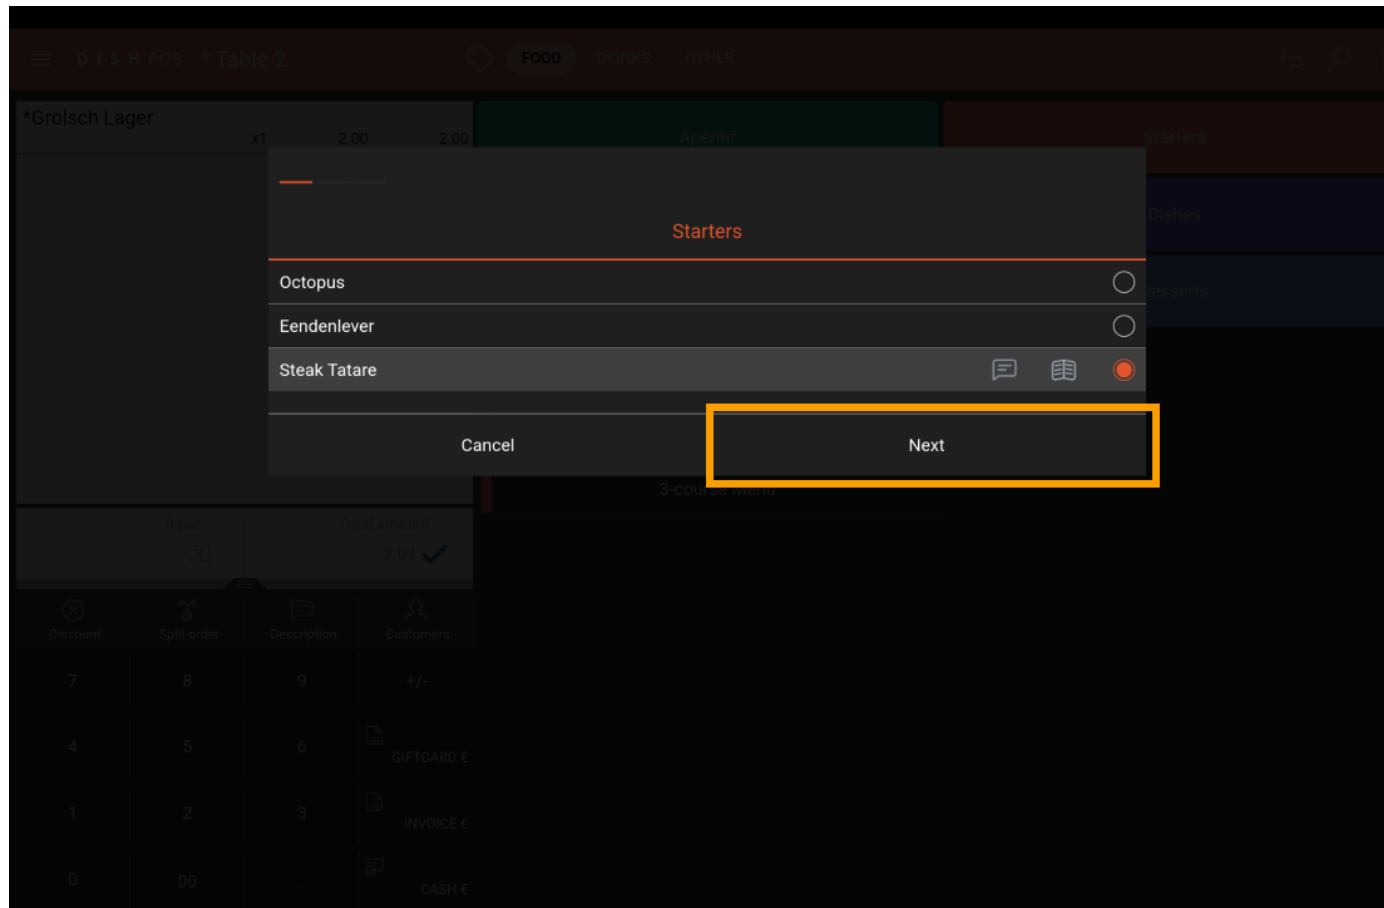

To open the list of predefined options, select the **book icon**.

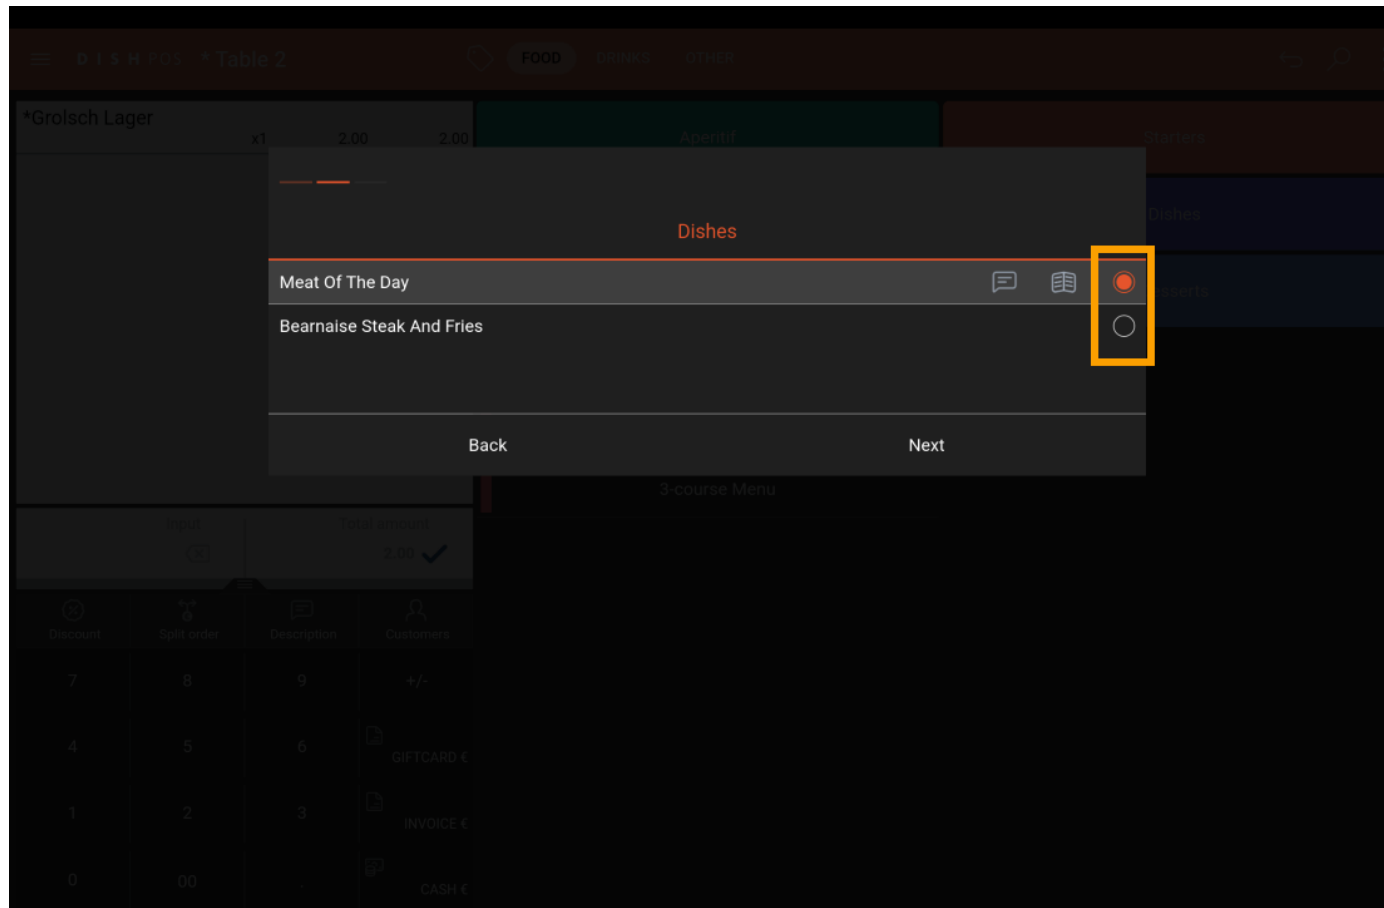

To proceed to the next course, tap on Next.

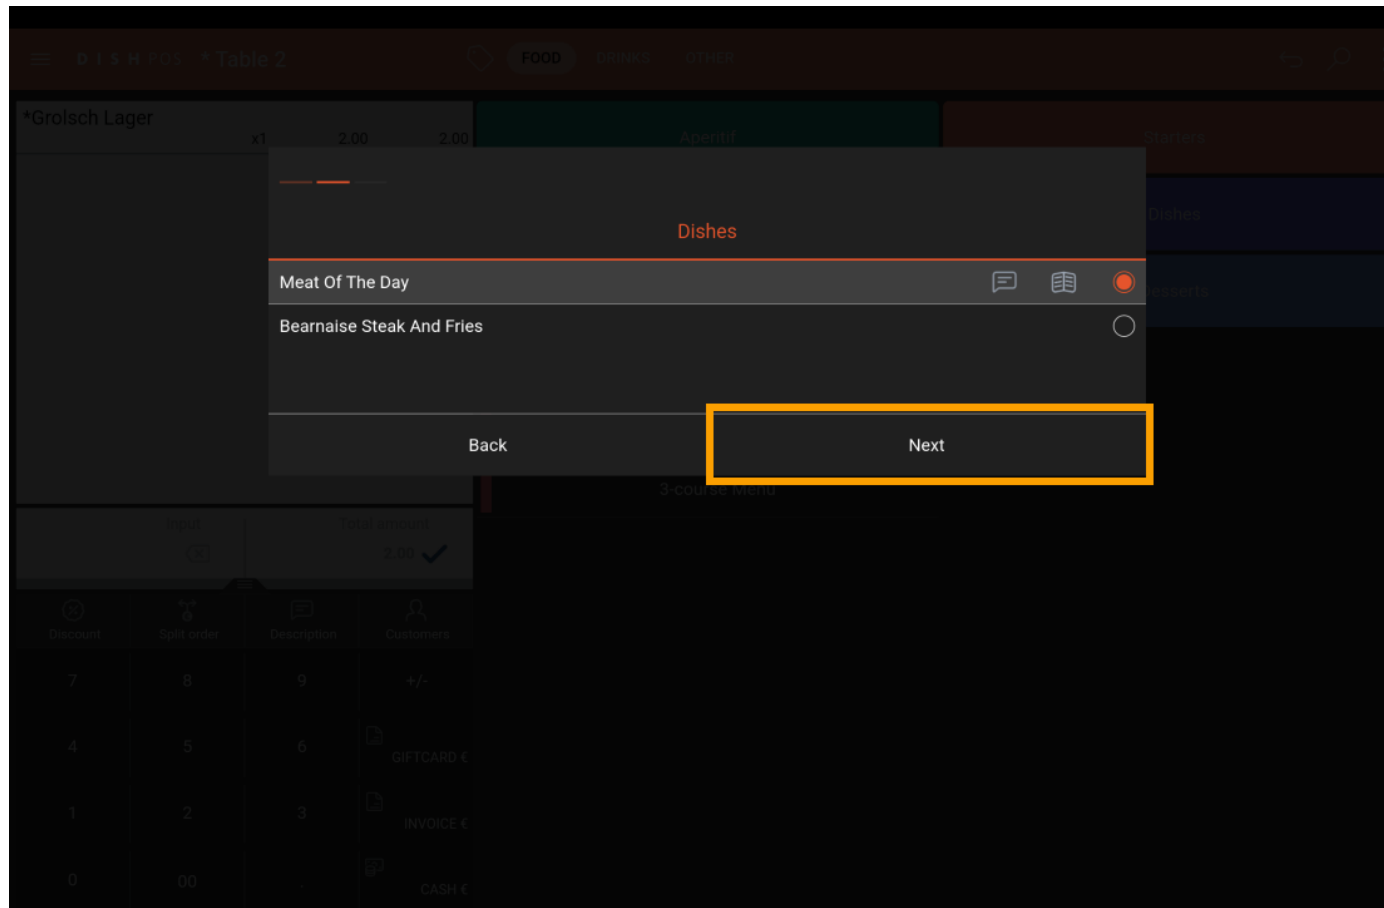

Then select the item for the next course, by setting the respective **checkmark**.

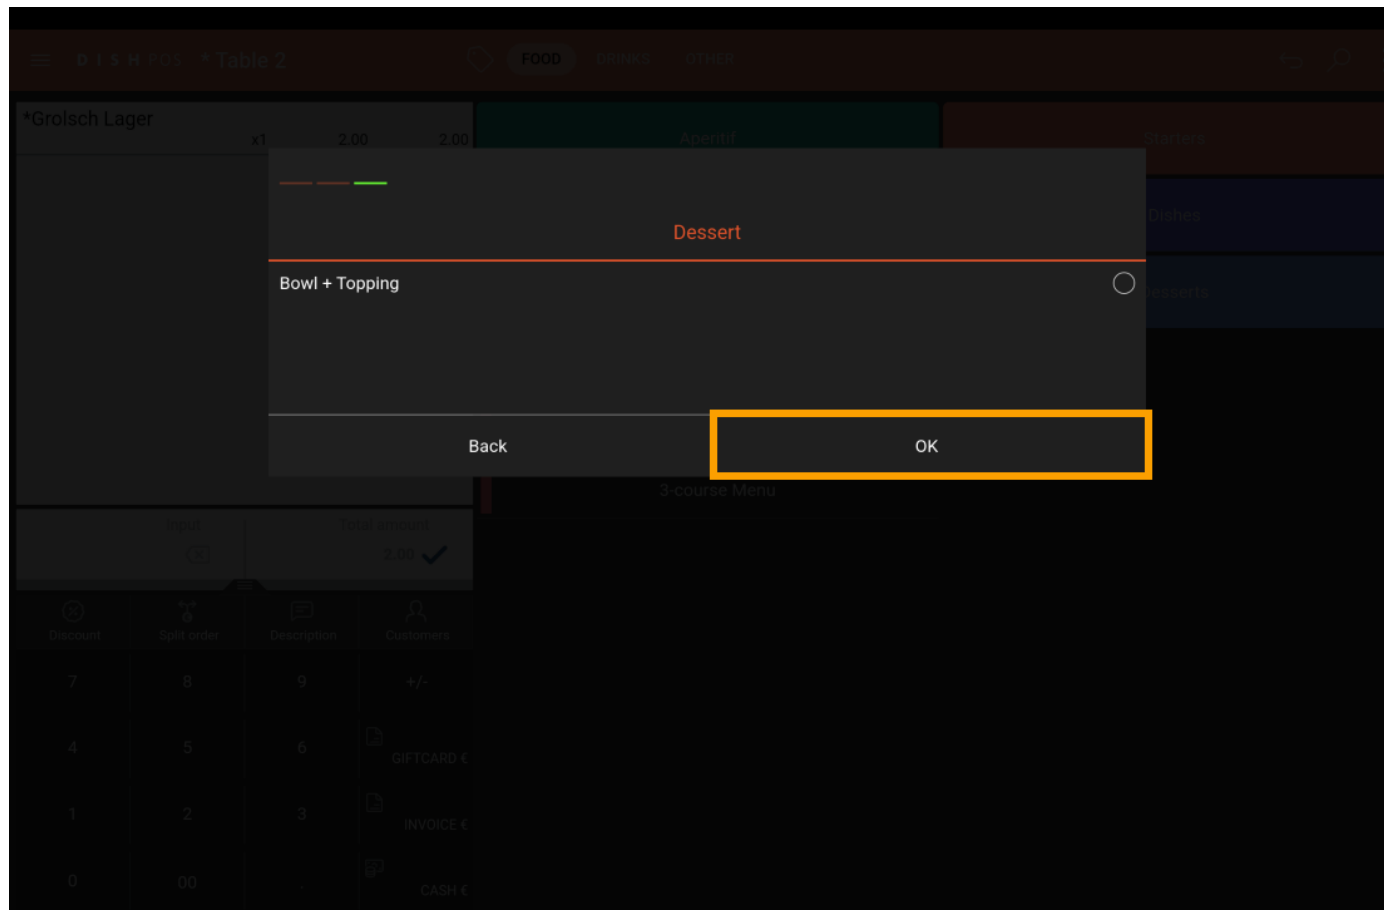

And continue by tapping on **Next**.

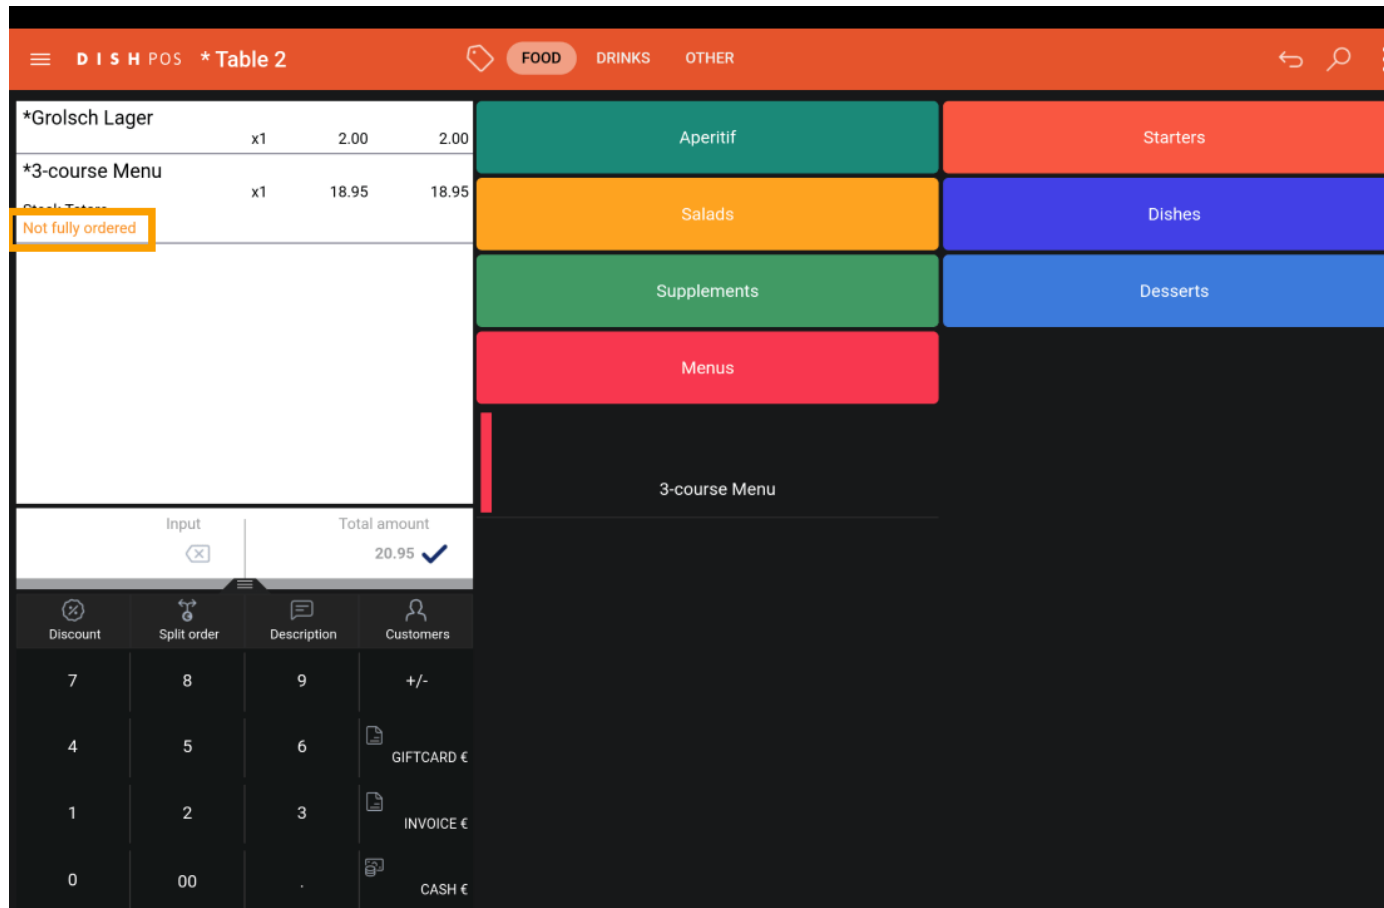

If a guest is unsure which item to choose for a course, you can continue without selecting an item. Simply tap on **OK**. **Note: You can add an item at a later time.**

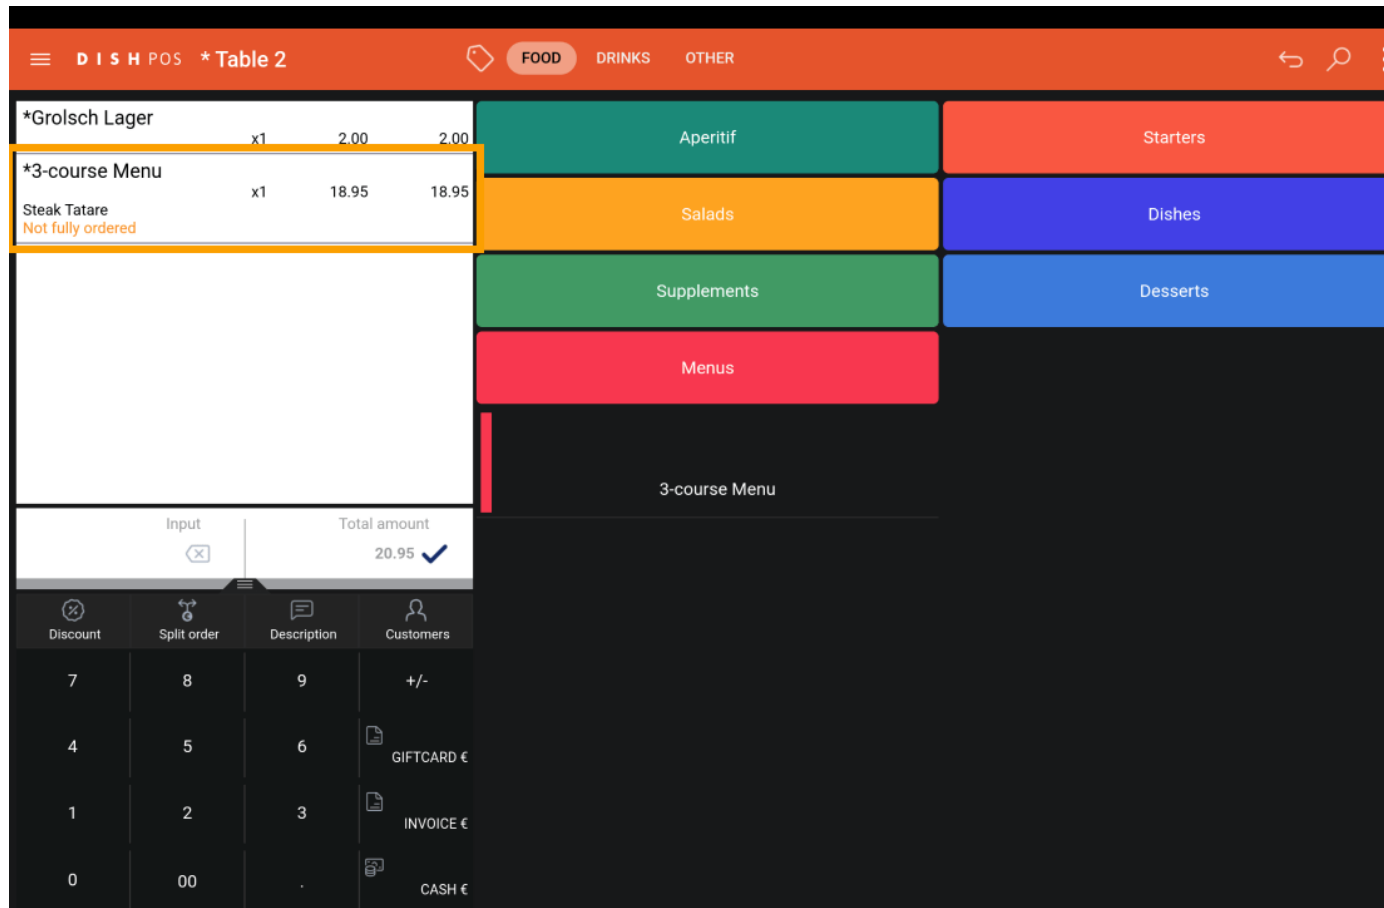

If an item has not been selected for each course, you will receive the information: Not fully ordered.

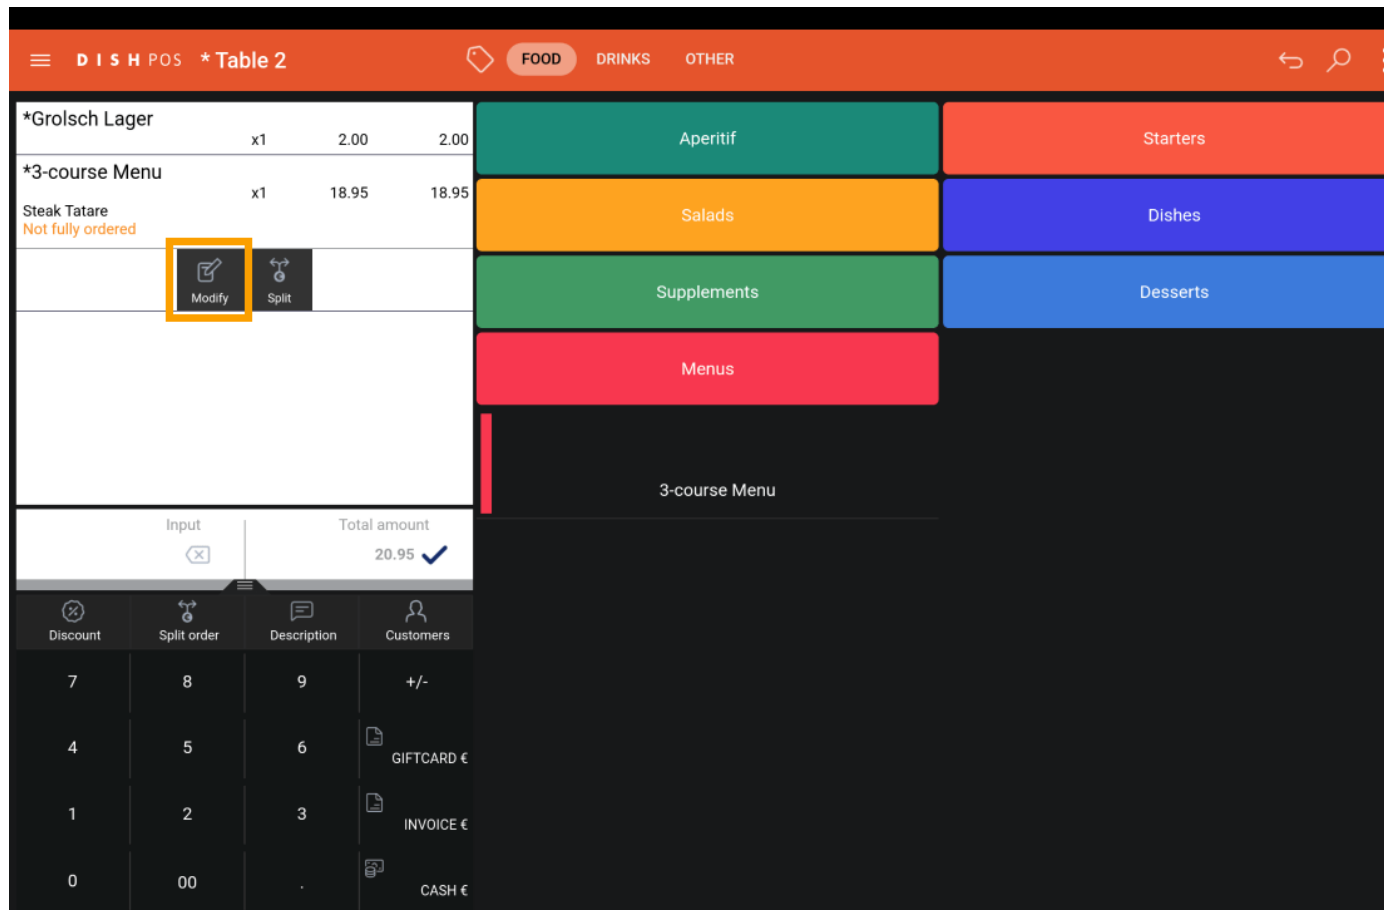

To make adjustments to the menu, tap on the **menu** itself to open the corresponding options.

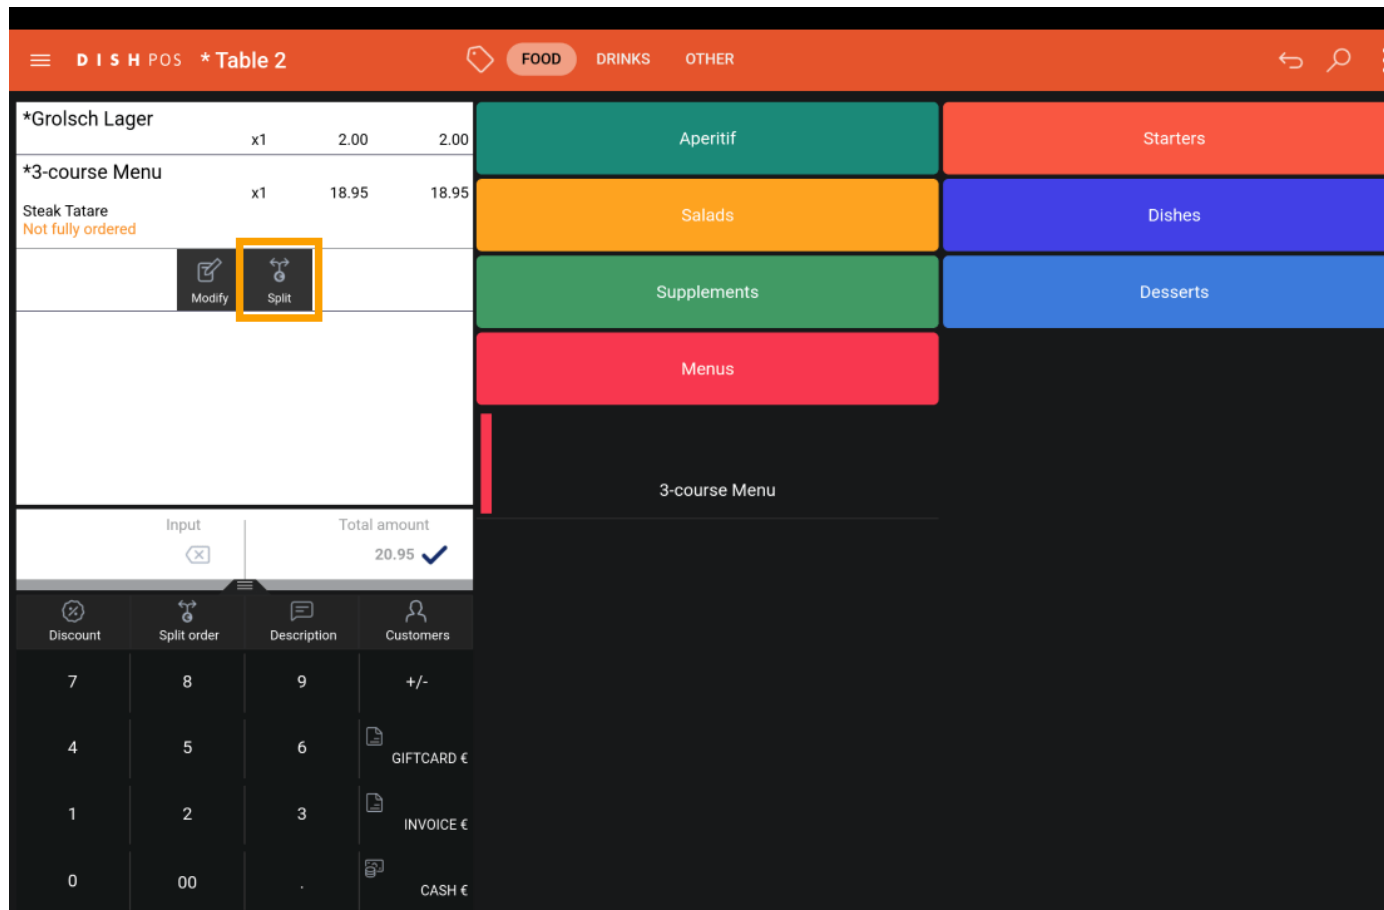

You then can tap on **Modify**, to either change a selection of a course or to add an item for a course that is still missing an input.

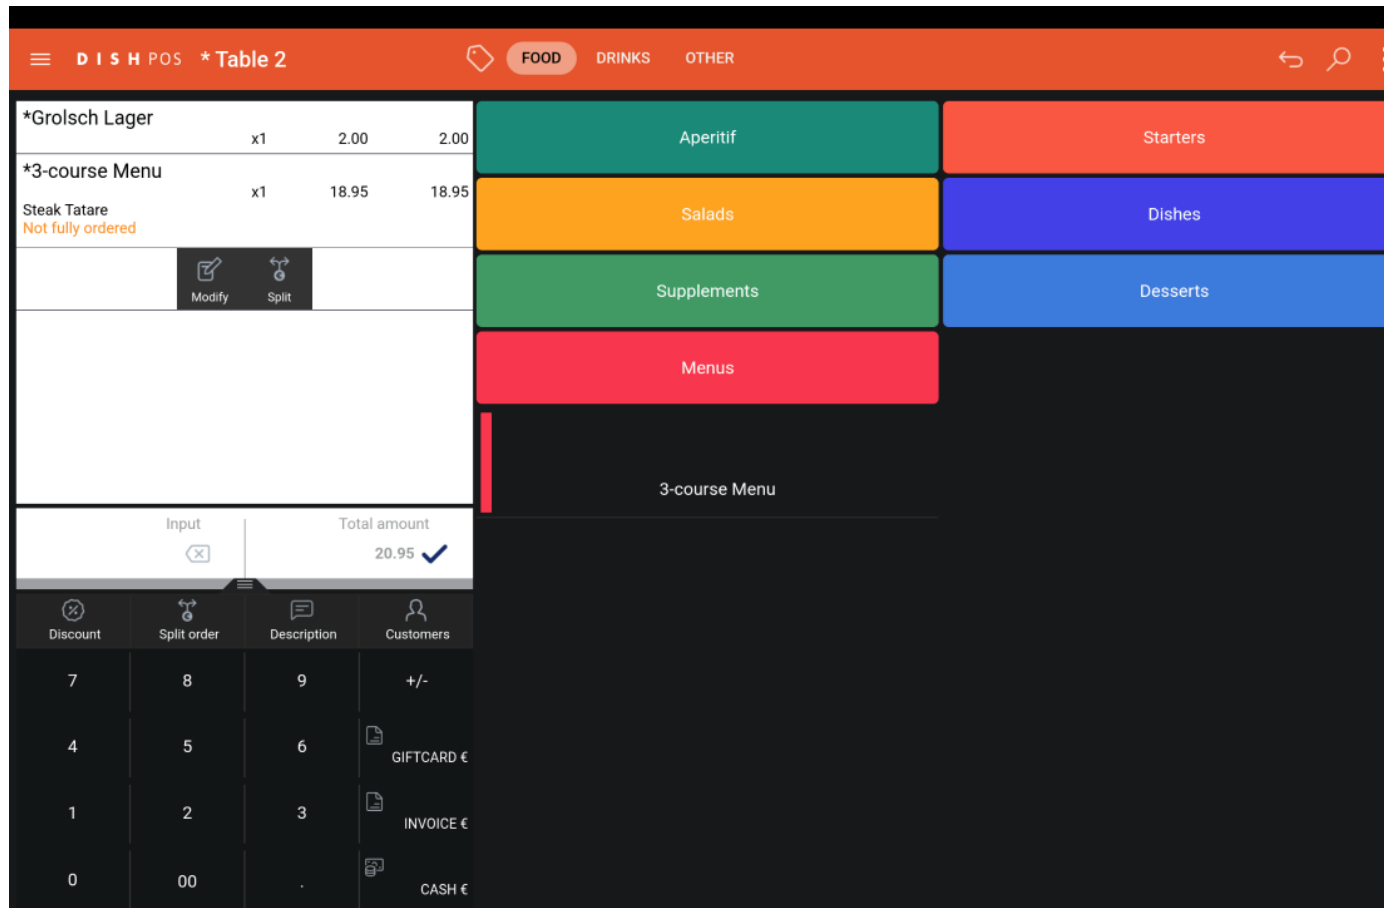

If you don't want to continue with the fixed-price menu, tap on **Split**, to add the selected items as individual items to the order.

That's it. You completed the tutorial and now know how to select a fixed-price menu.
