Below the order list, there's a section for 'Input' and 'Total amount'. The 'Input' field shows '20' and the 'Total amount' is '16.50'.

The bottom of the screen features a grid of buttons for various actions and categories:

Discount	Split order	Description	Customers

After adding the input, select the guest's preferred **payment method**. Note: The payment methods may differ, depending on your settings for the payment methods menu.

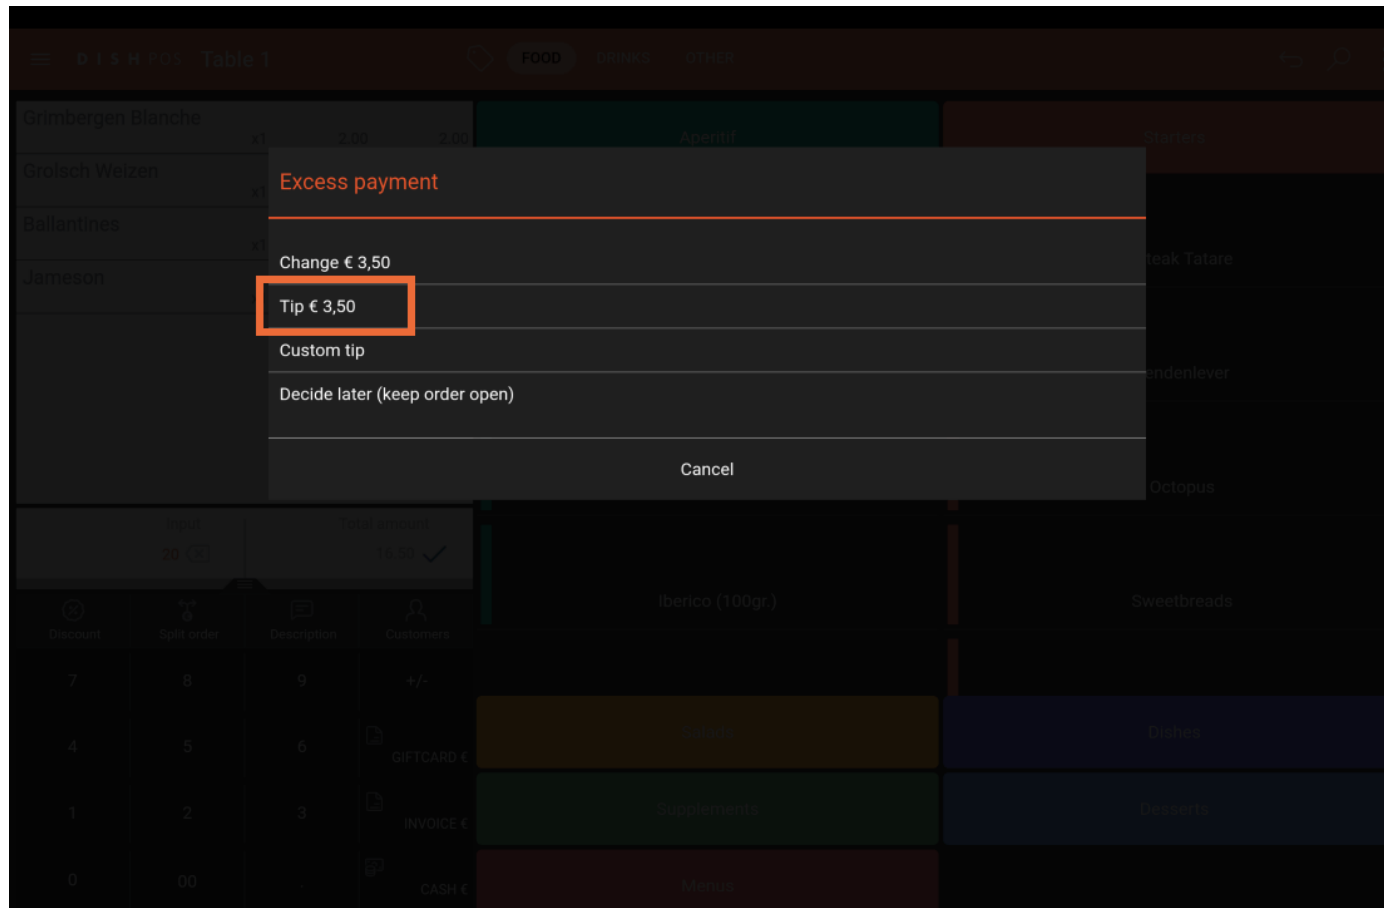

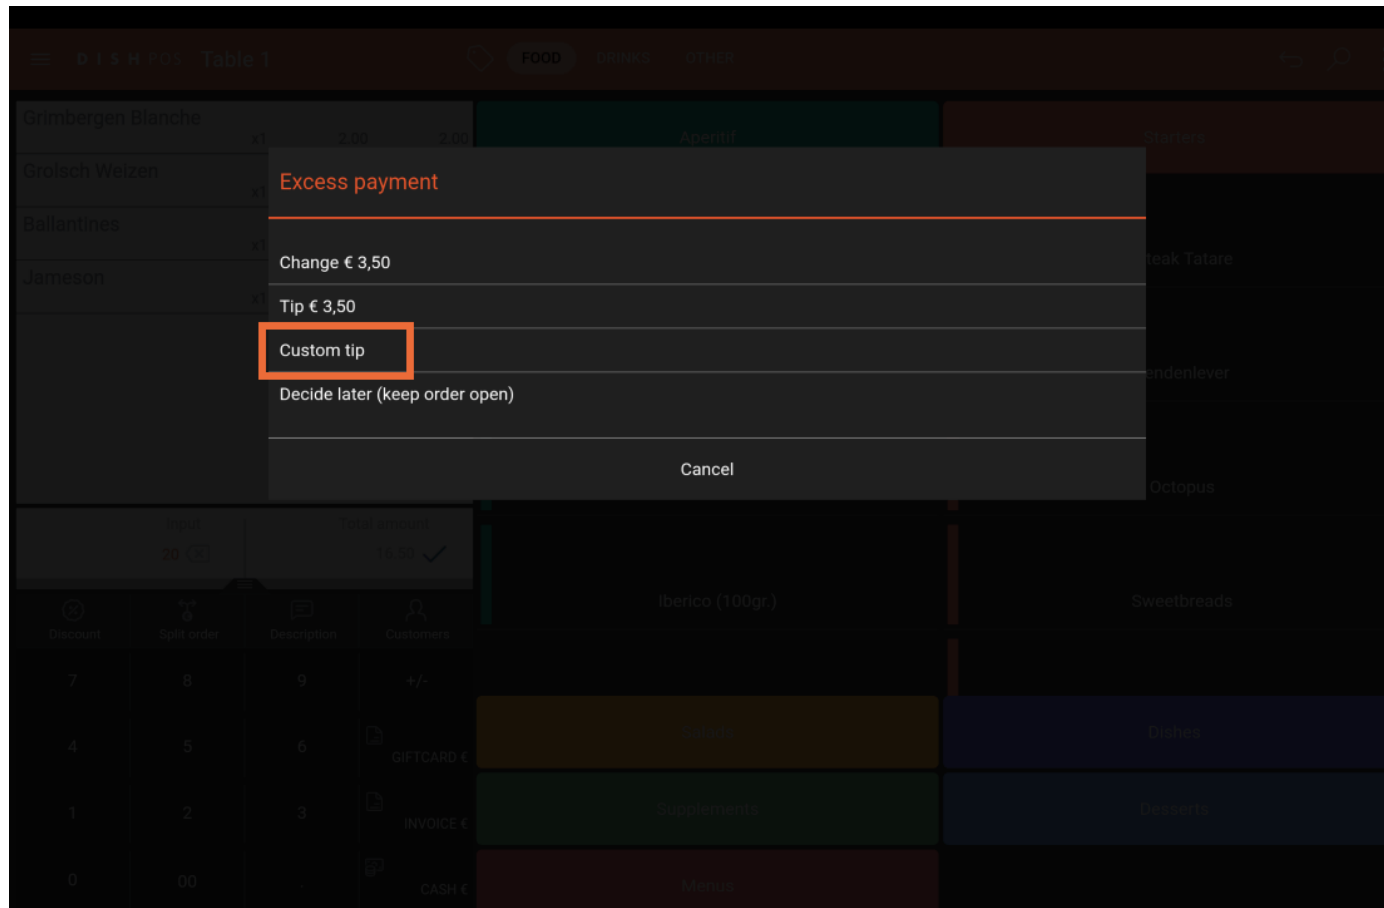

A pop-up will appear asking you how you want to handle the excess payment. By selecting **Change**, you can hand back the excess payment as change.

By selecting **Tip**, all the excess payment will be registered as a tip.

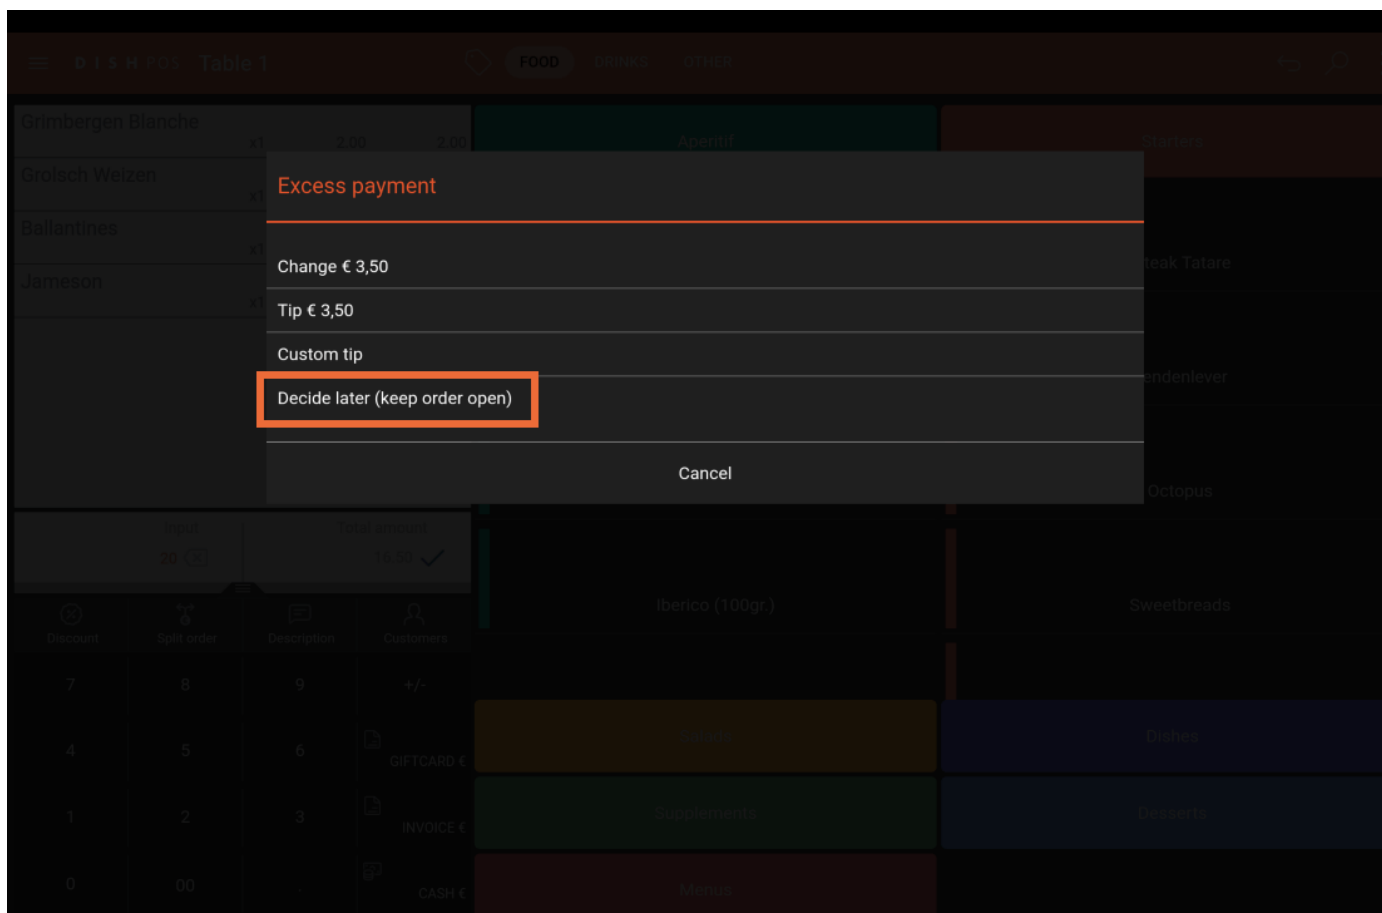

To only partly register the excess payment as tip, tap on **Custom tip**.

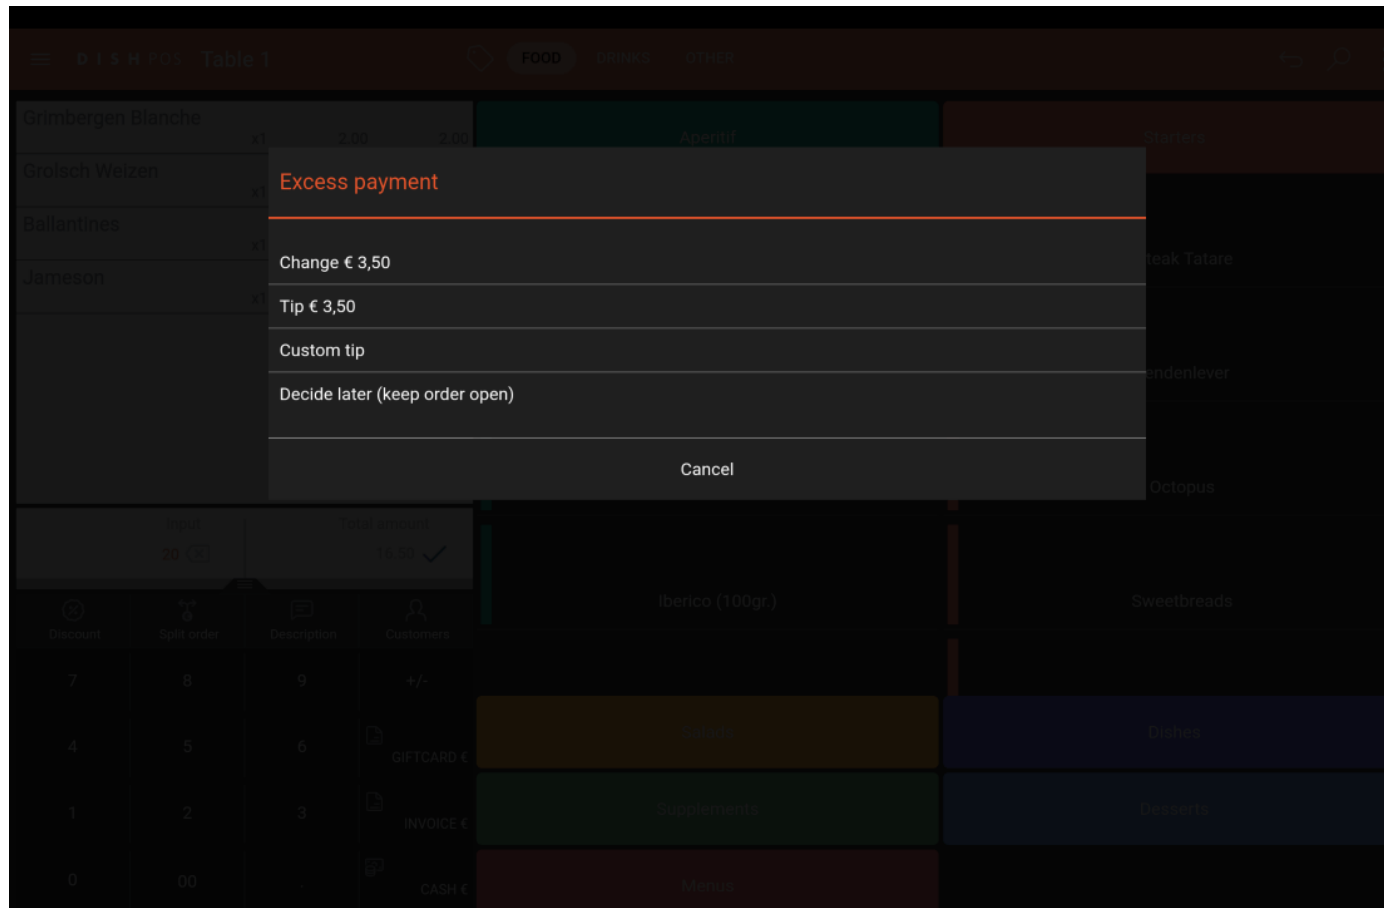

If you tap on **Decide later (keep order open)**, you keep the change that the guest has given you, but the order will not be closed.

 That's it. You completed the tutorial and now know how to cash out.
