

Welcome to the DISH POS app. In this tutorial, we show you how to manage tables.

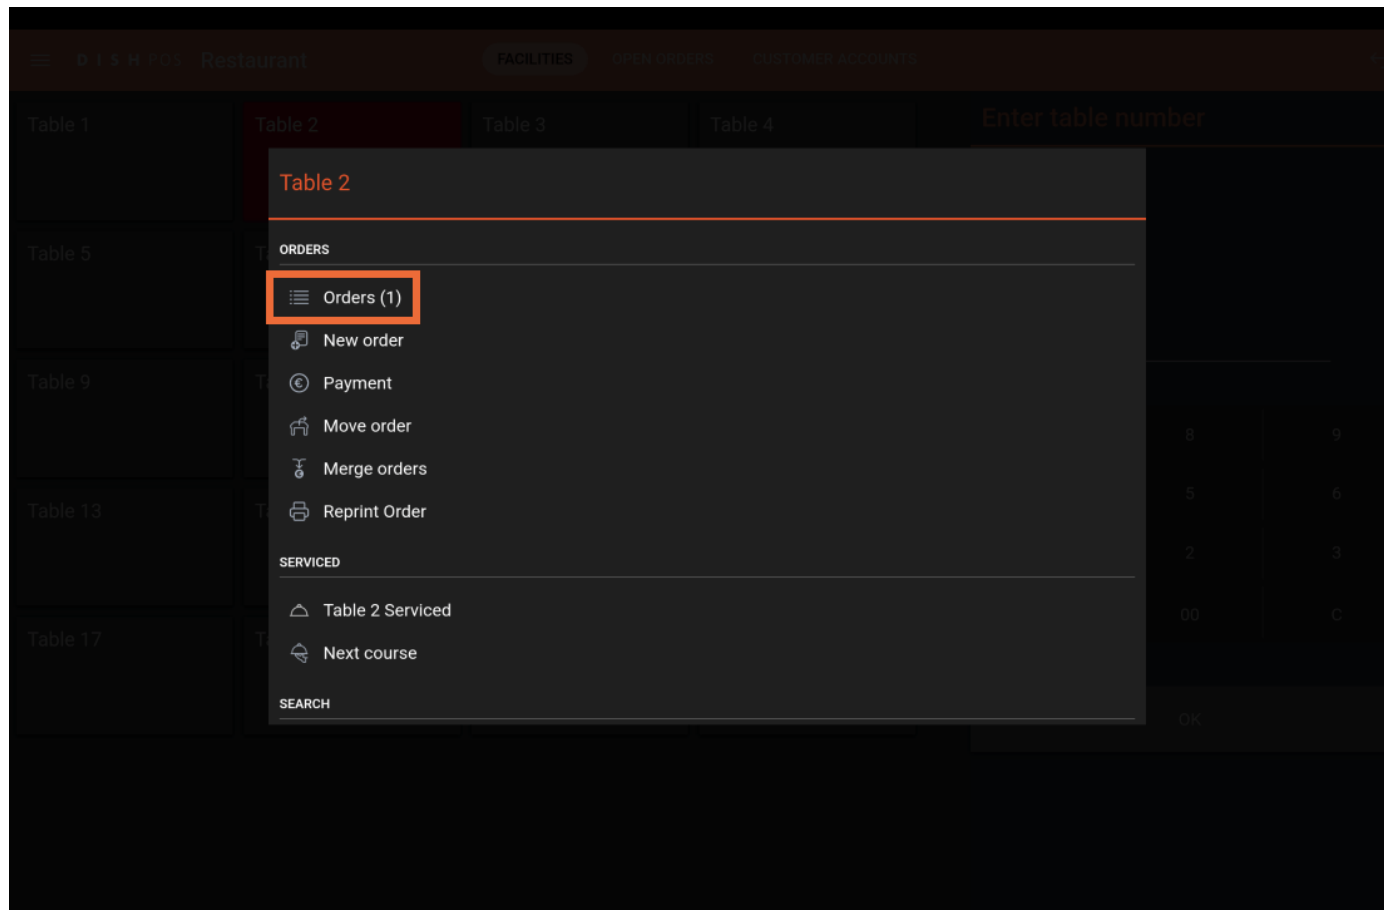

In the overview for your tables, long press the **table** you want to manage.

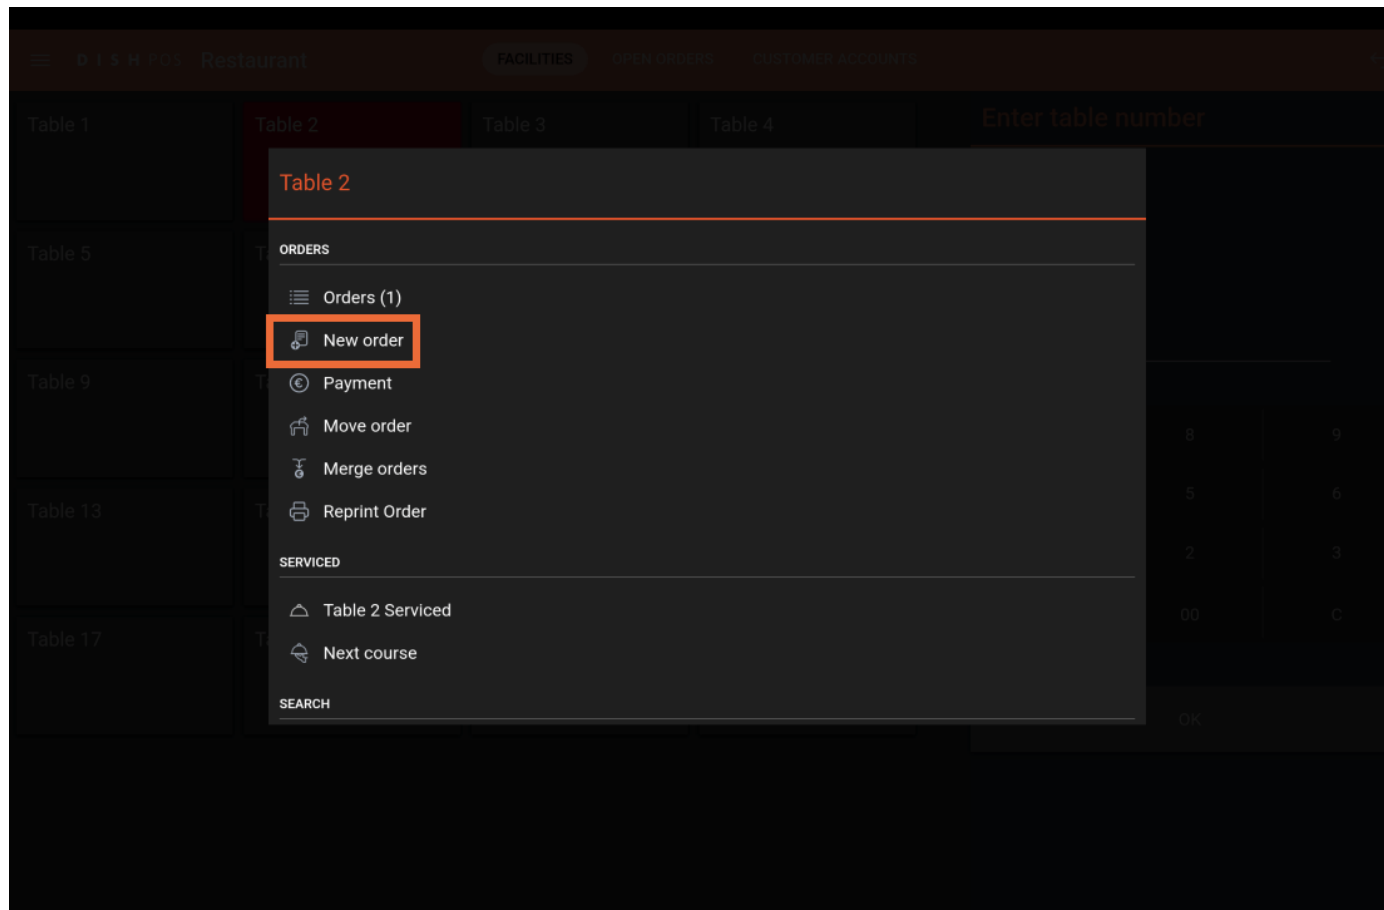

A pop-up window will appear with the options for the selected table. By tapping on **Orders**, you can view the current orders for the table.

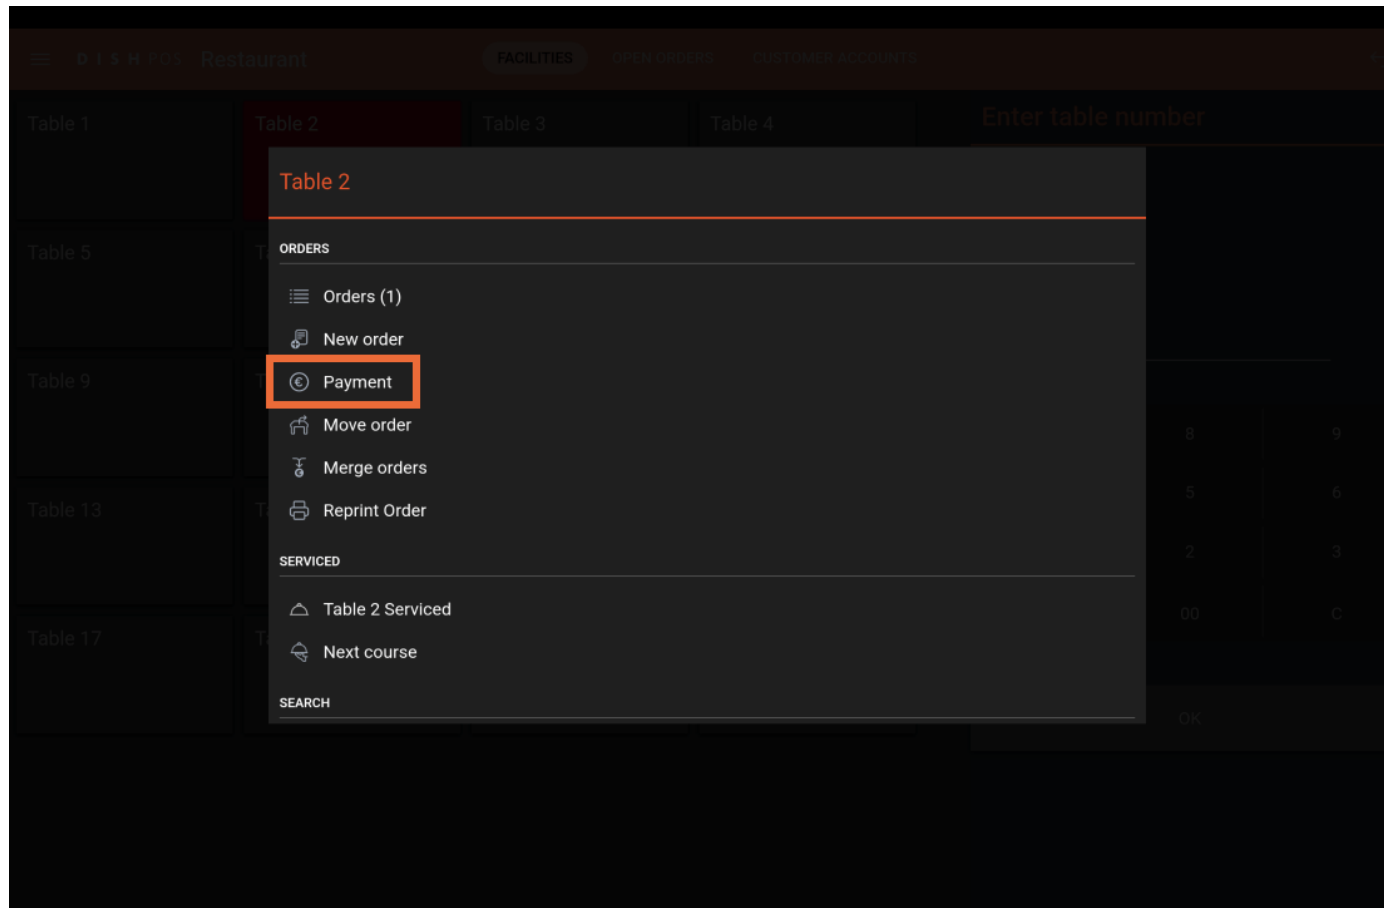

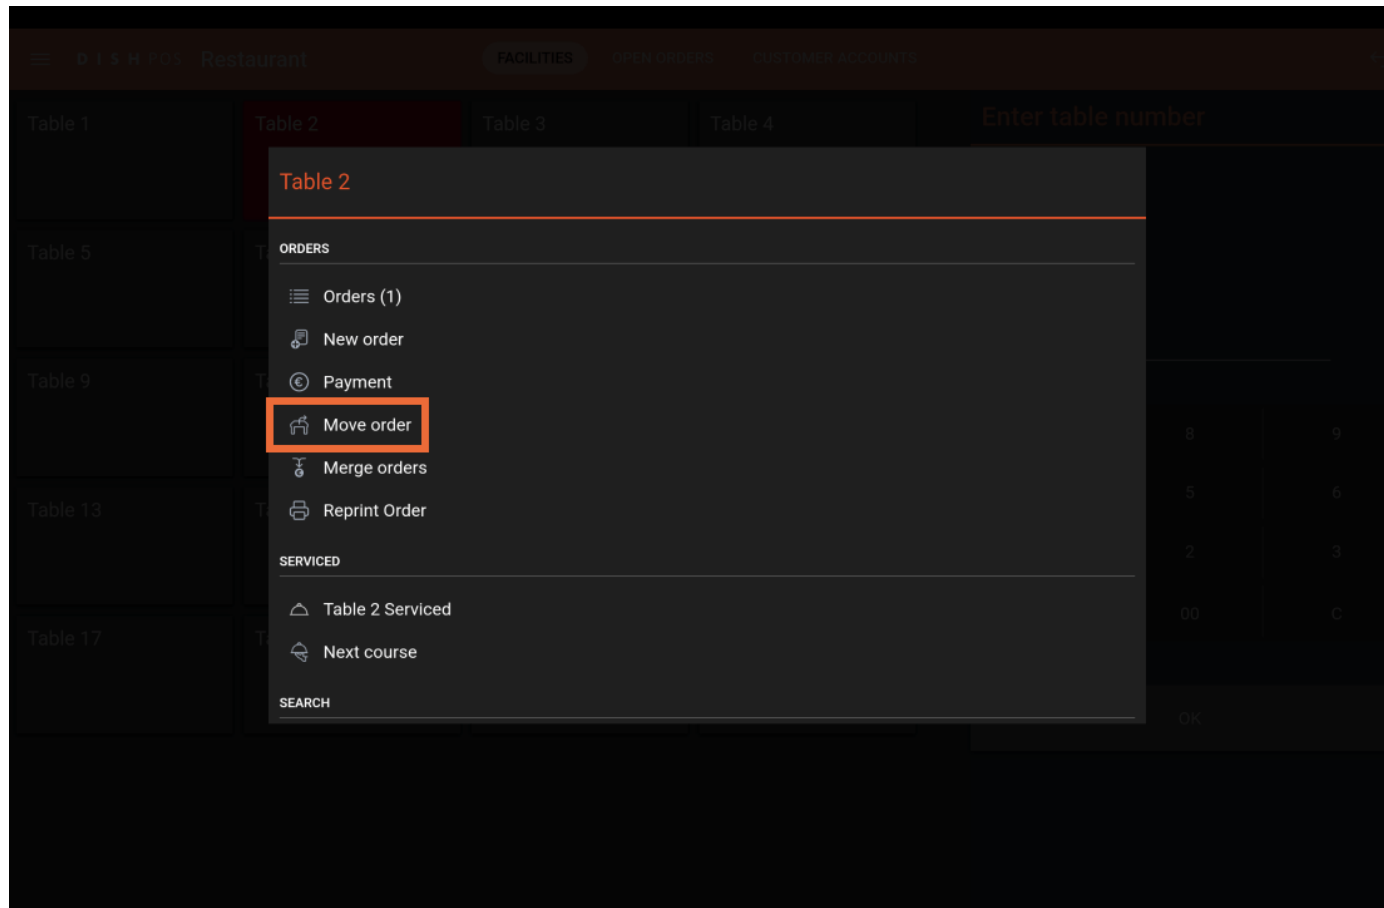

Tap on **New order** to open a new order for the table. **Note: You can have several separate orders for the same table/facilities.**

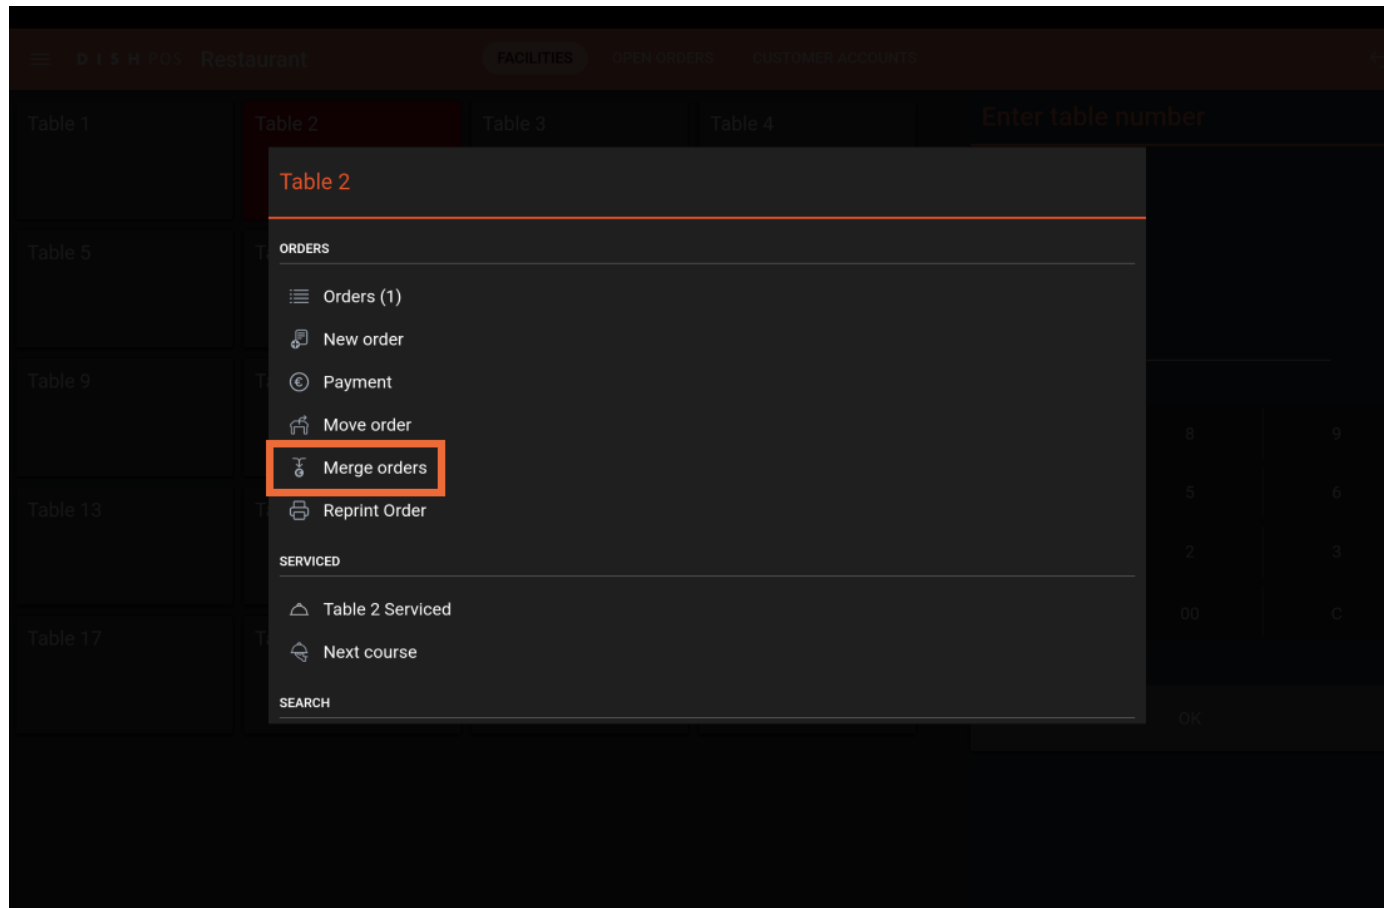

By tapping on **Payment**, you will proceed with the check-out.

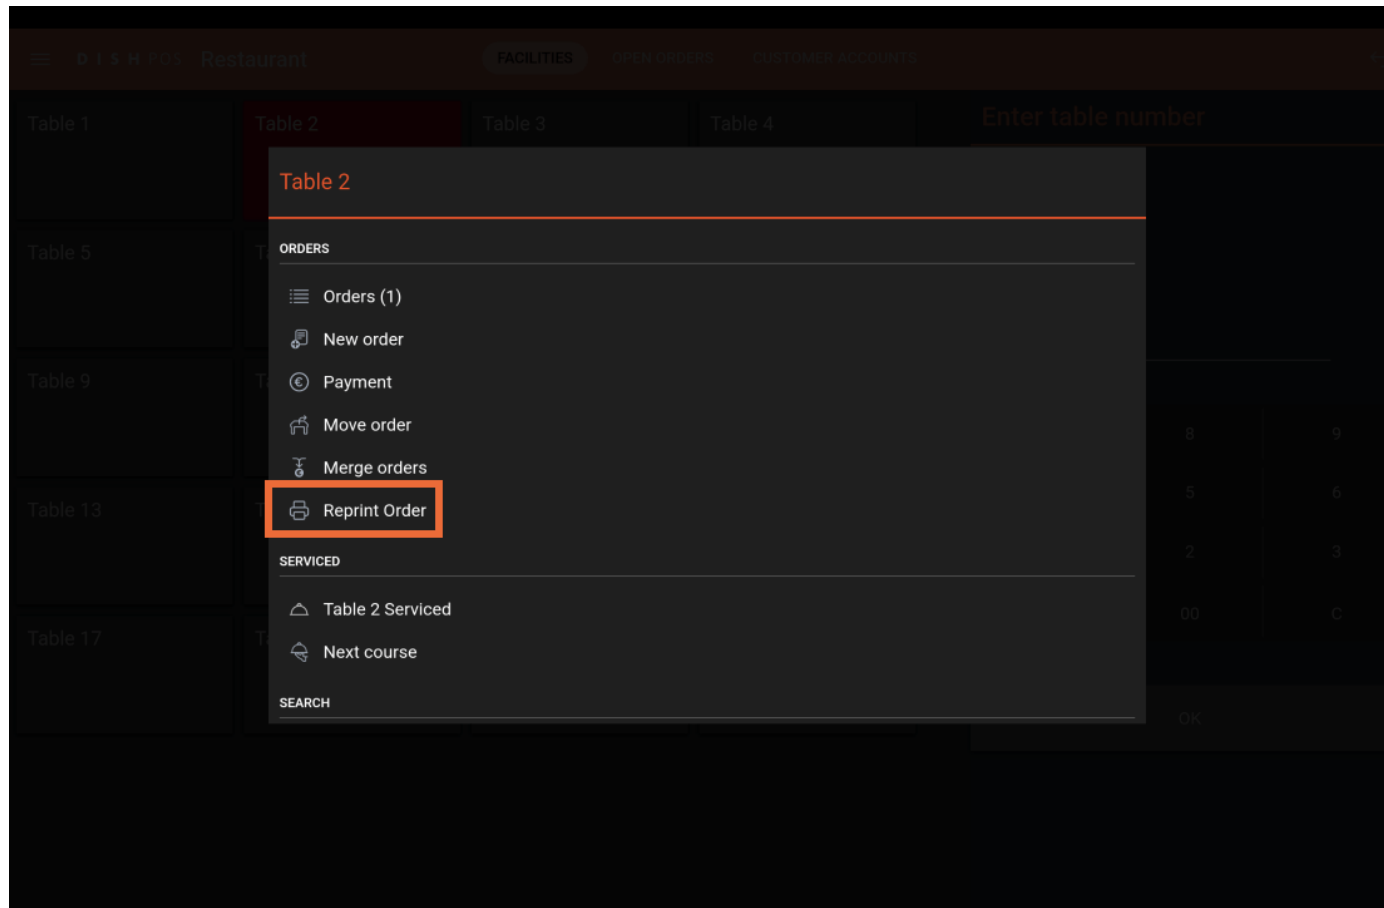

Tap on **Move order**, to move the whole order to another table.

To merge this order with another order, tap on **Merge orders**.

 To reprint a receipt for an order that already paid, tap on **Reprint Order**.

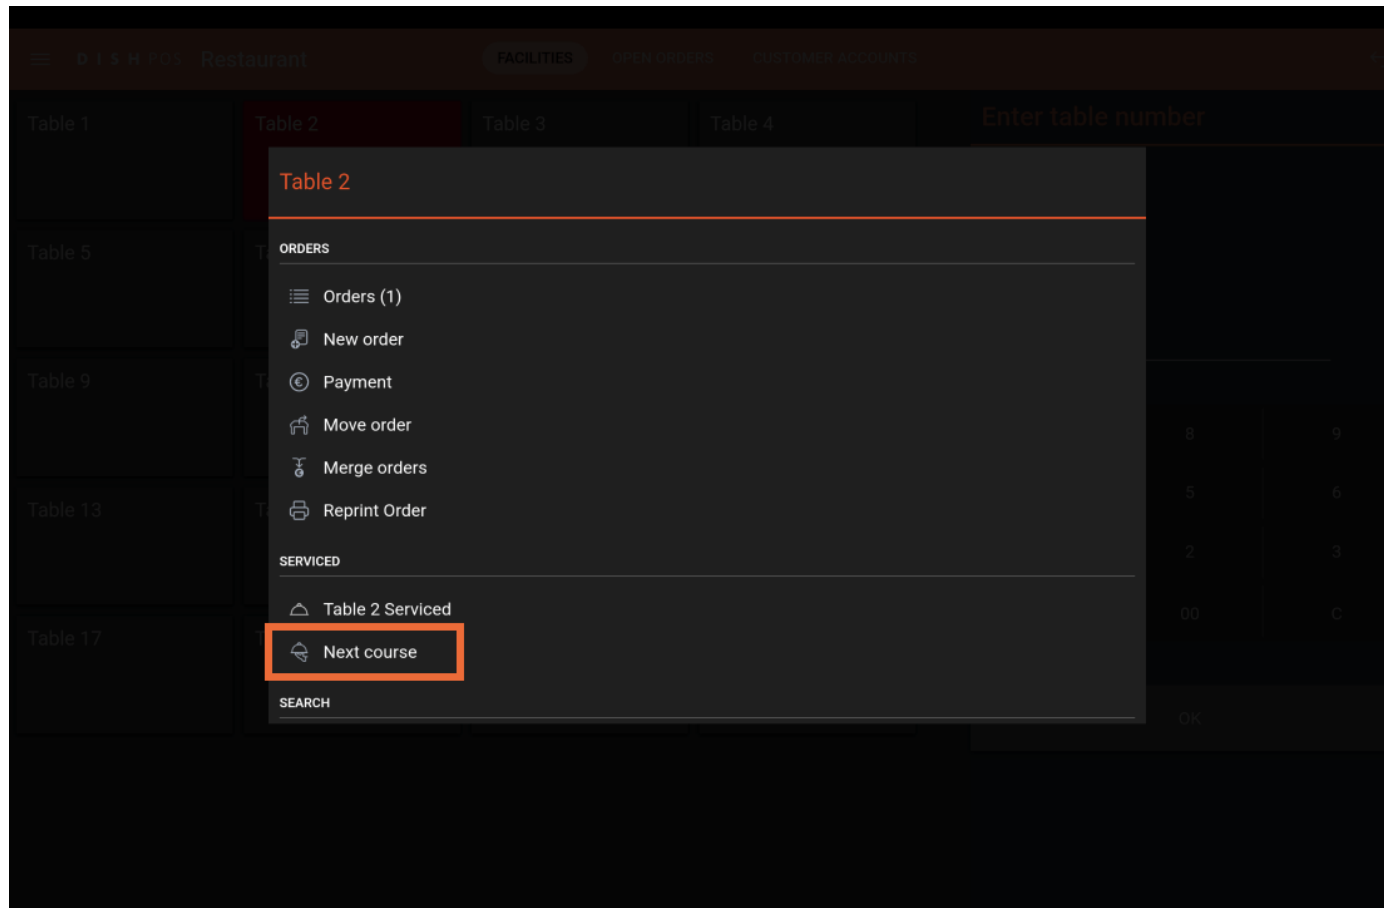

To reset the status that the table has been served, tap on **Table Served**.

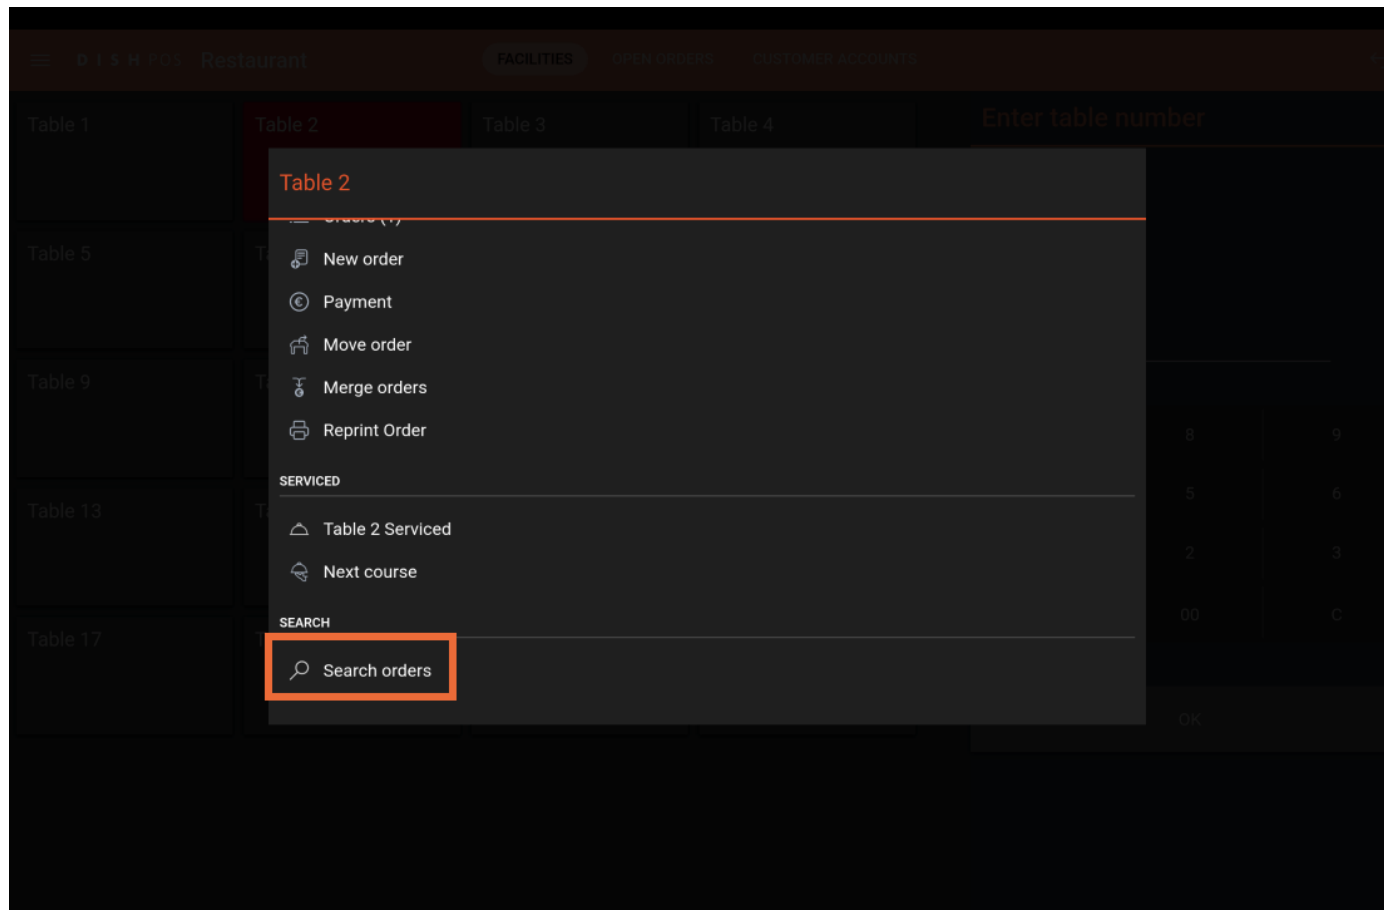

If multiple courses are added to the table, tap on **Next course** to continue with the next course.

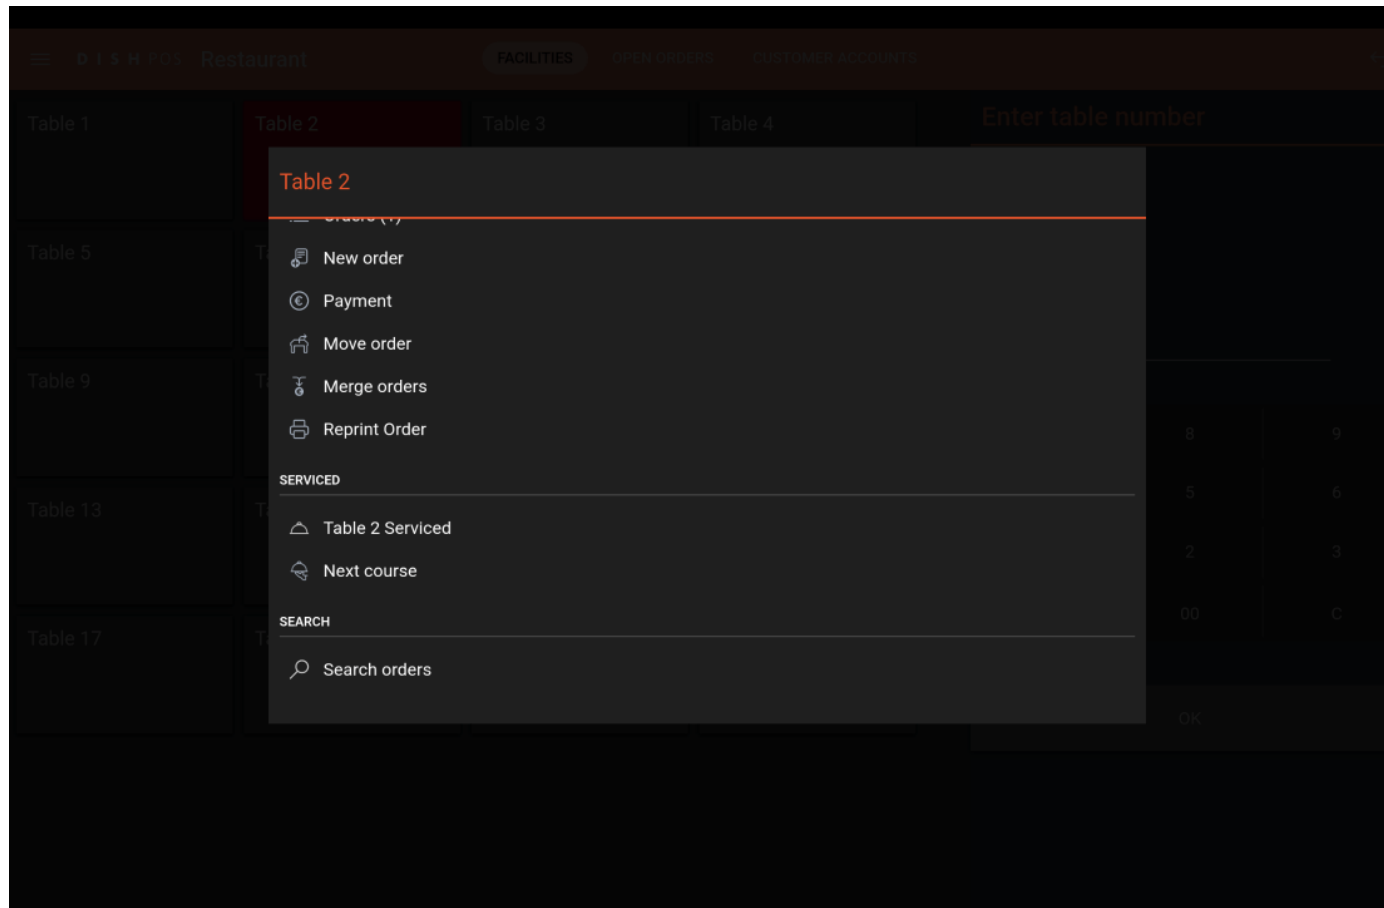

If you are looking for a specific order of the current table, use the search function and tap on **Search orders**.

That's it. You completed the tutorial and now know how to manage tables.
