

Welcome to the DISH POS app. In this tutorial, we show you how to move orders from tables on the table map.

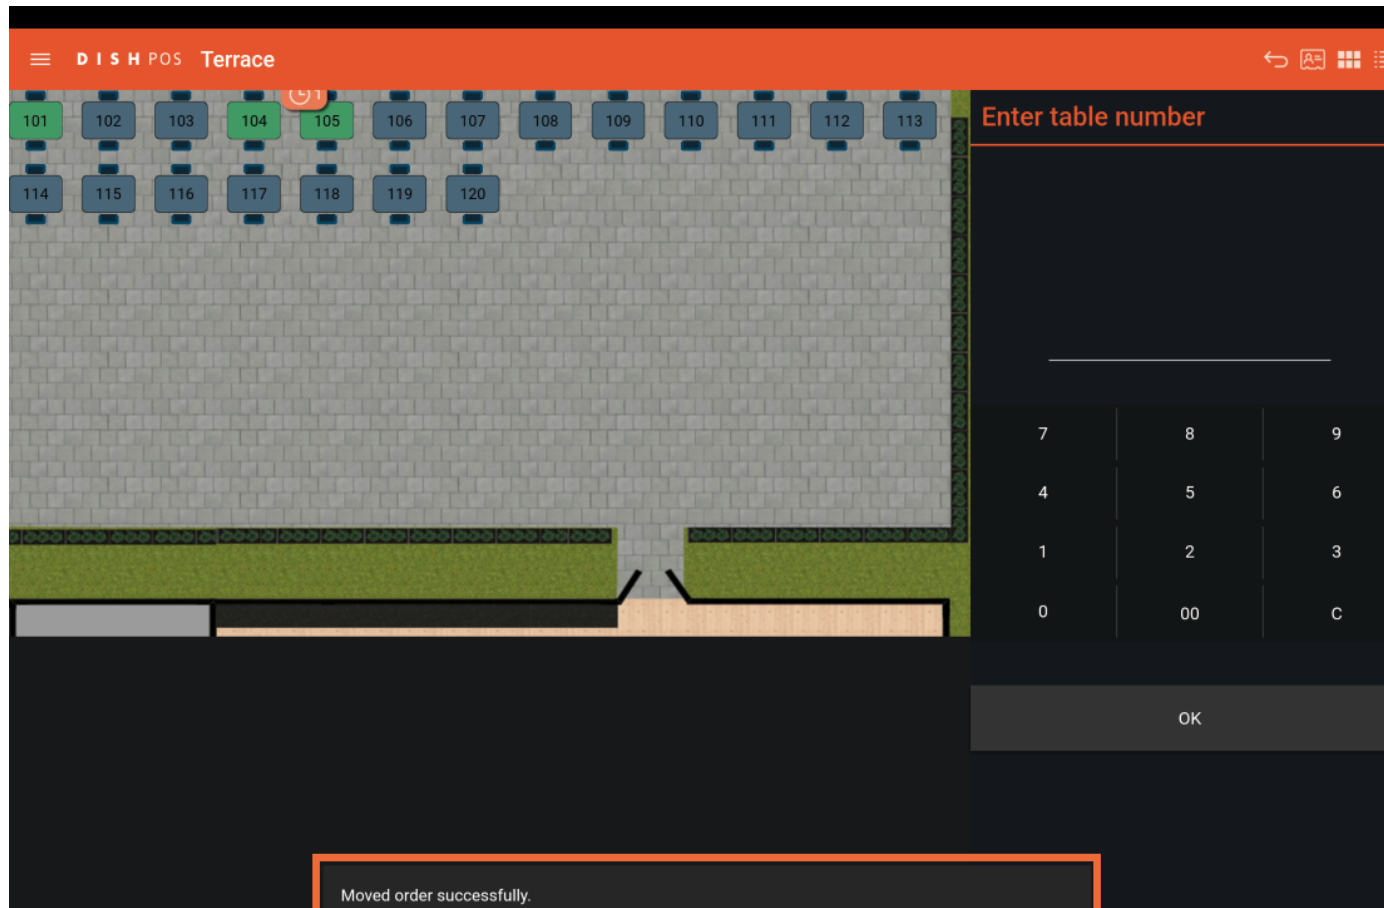

To move an order to another table, drag the **table** with the order you want to move and drop the table onto the table you want to place the order.

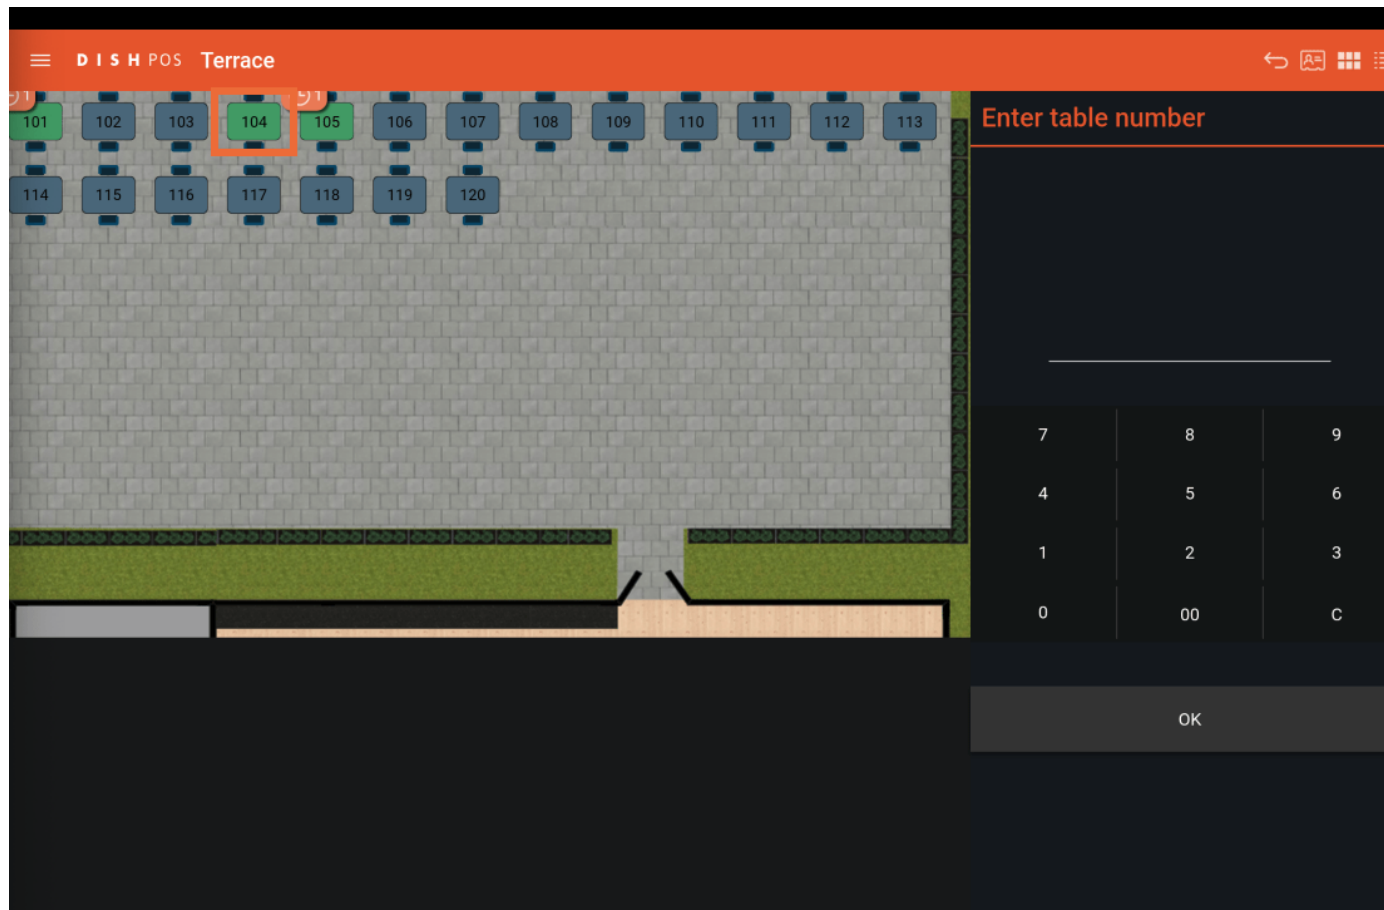

Once you moved the table, you receive an info message.

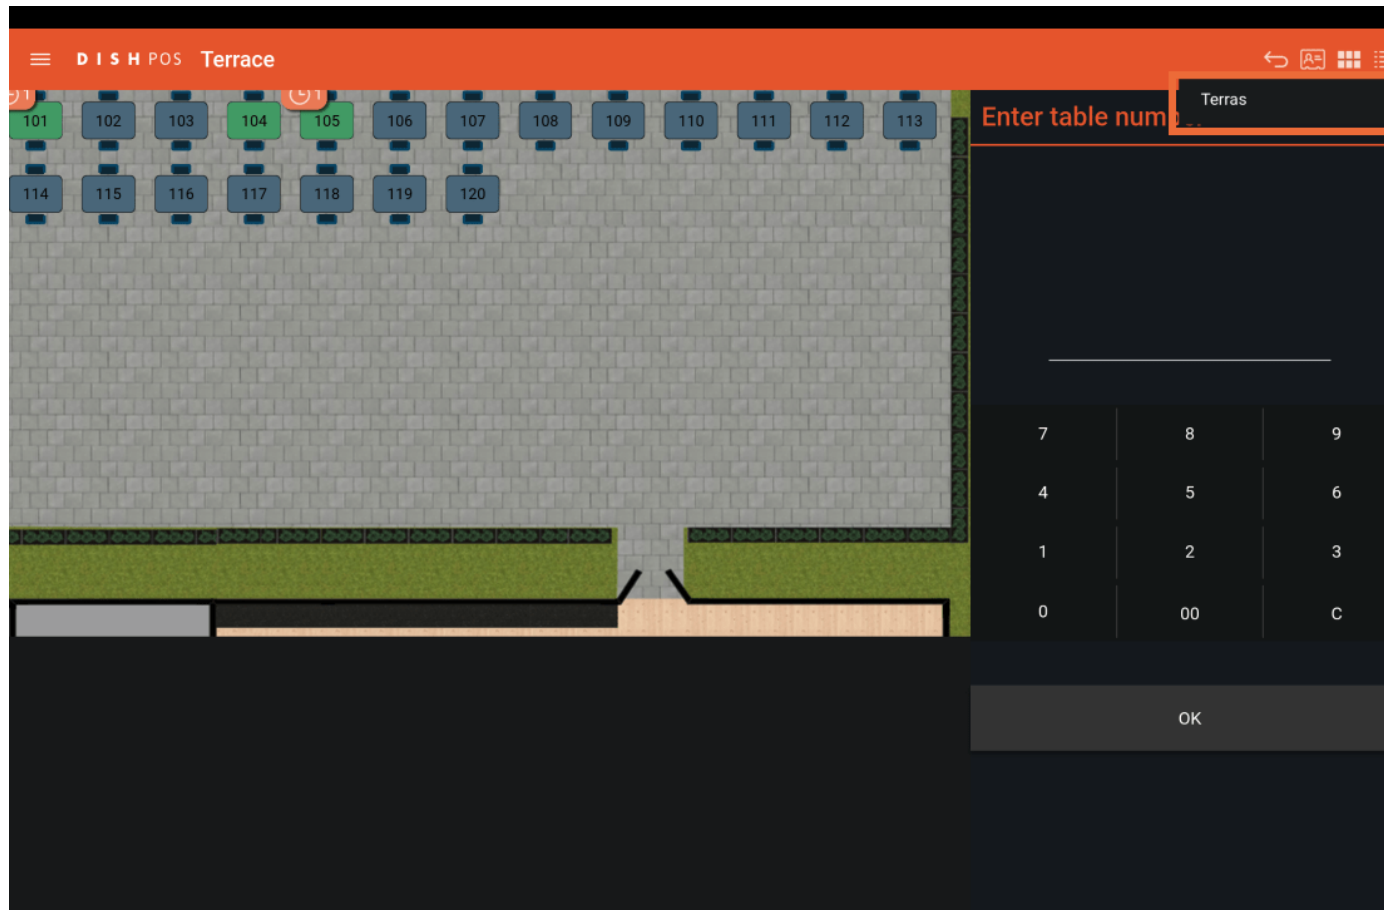

To move an order to another facility, move the **table** with the order you like to move to the top right corner, where the list icon is.

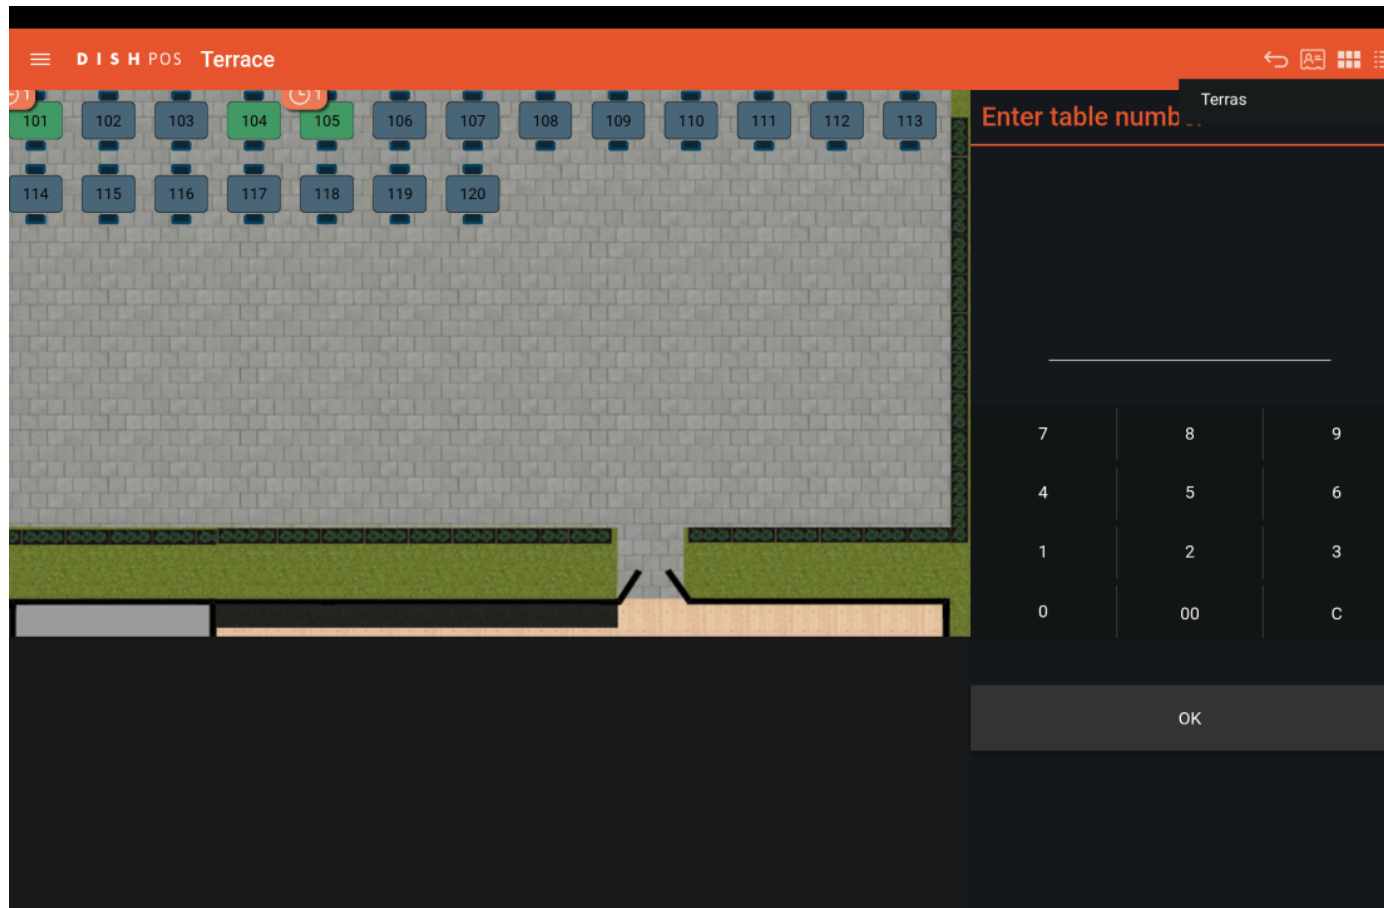

The list of available facilities is then displayed. Select the **facility** to which you would like to move the selected table.

That's it. You completed the tutorial and now know how to move orders from tables on the table map.
