

Welcome to the DISH POS app. In this tutorial, we show you how to disable the ticket printing.

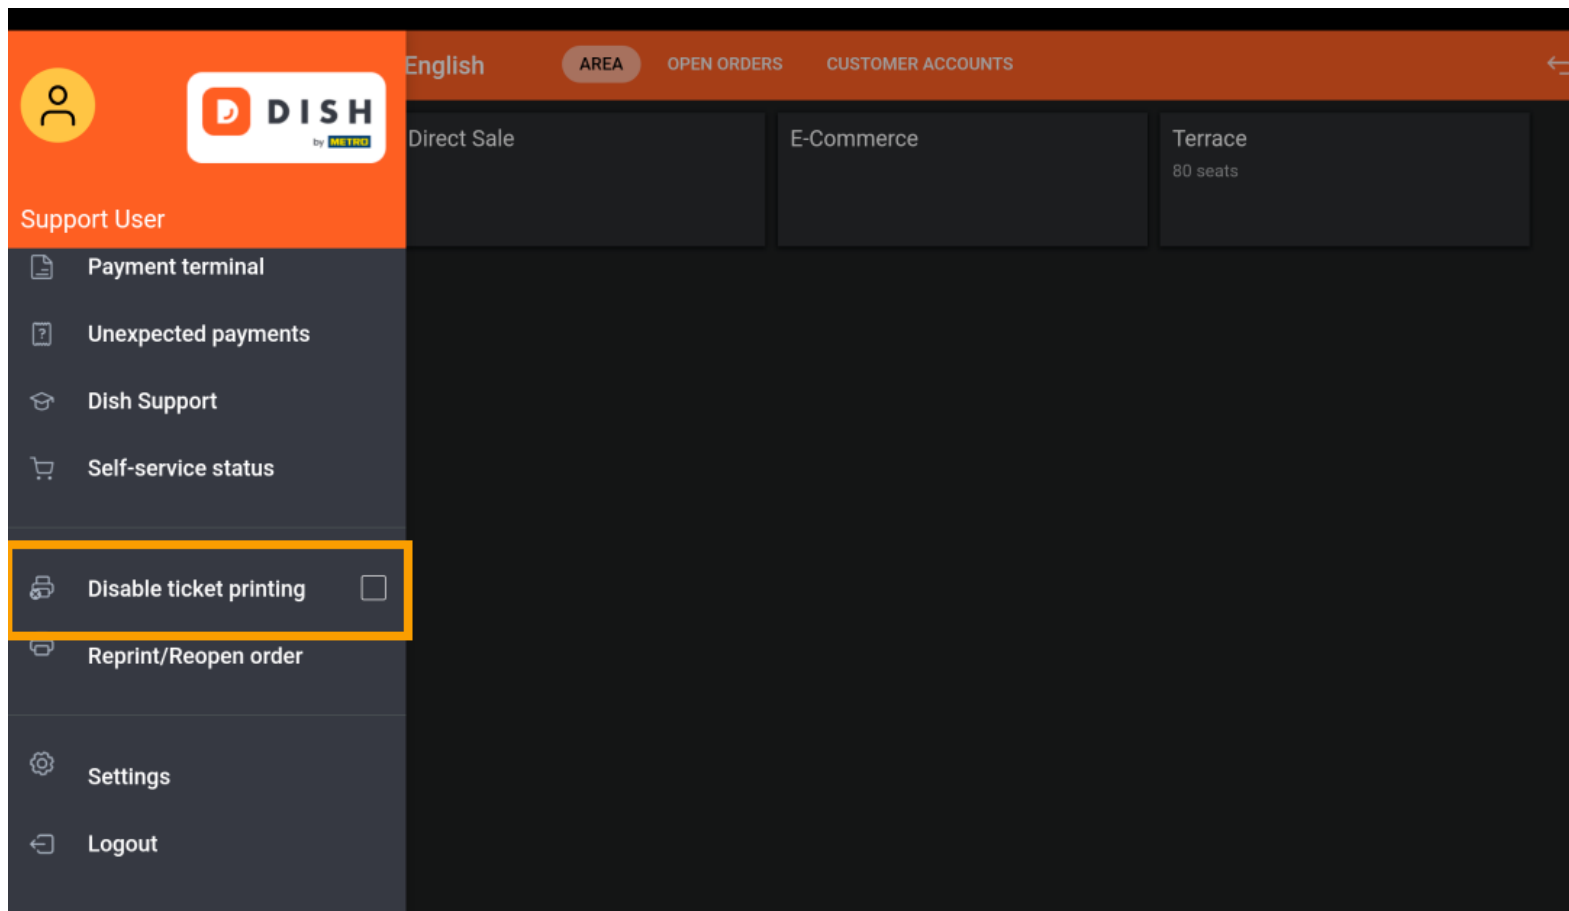

First, open the **menu**.

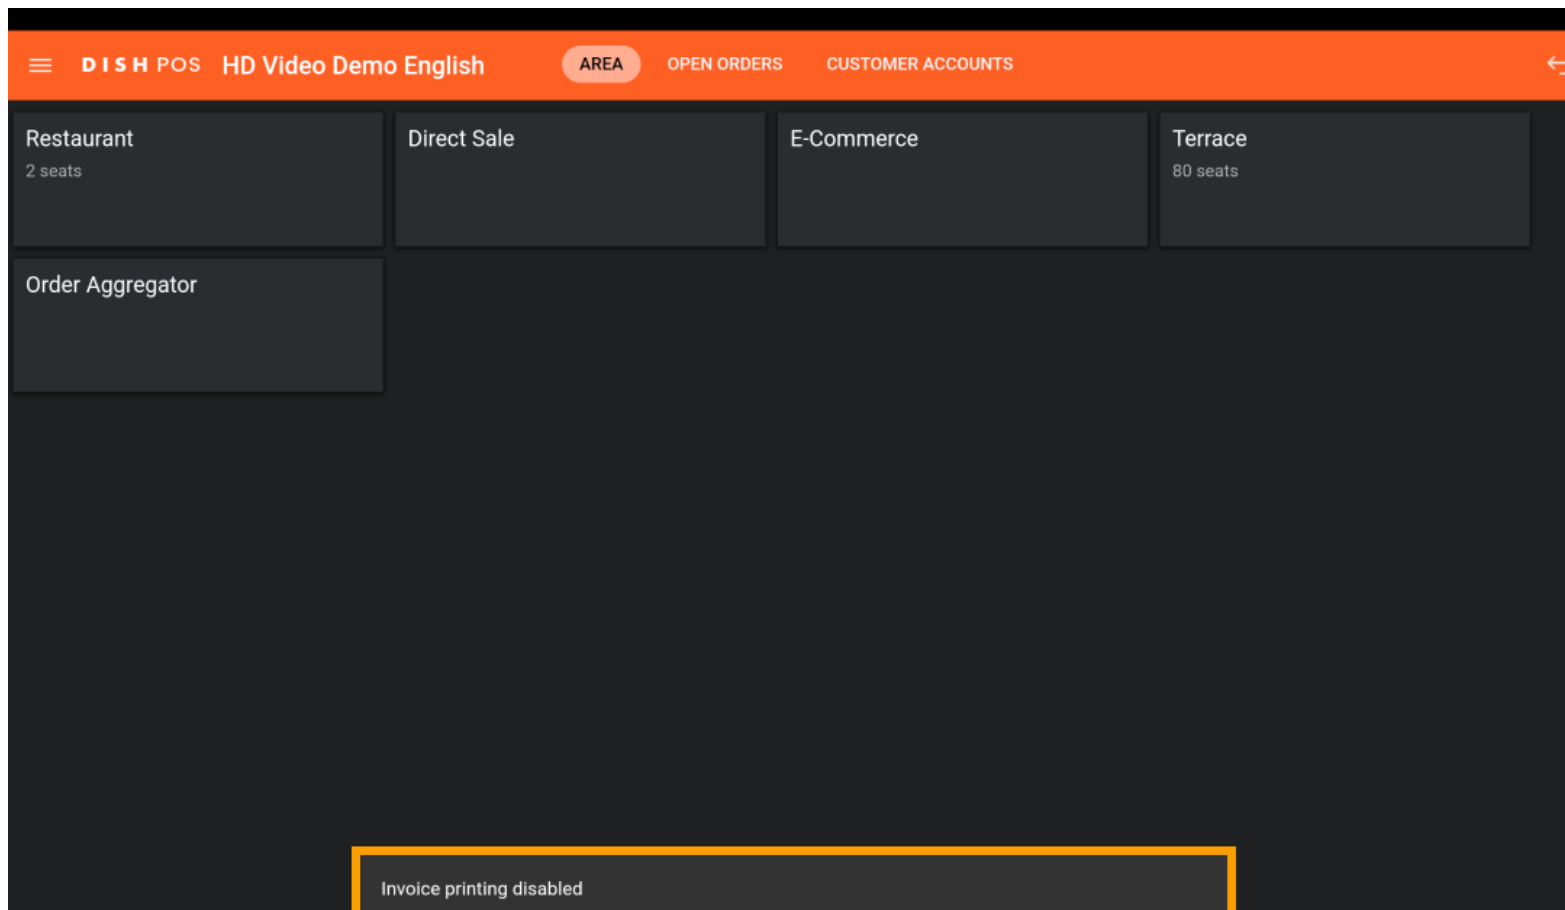

Scroll down to the bottom of the menu and tap on the **Disable ticket printing** to temporarily turn off the printing. **Note: If you log out, it will automatically go back to the default setting. You can also turn off printing in the backoffice.**

 You then receive a message that the printing is now disabled.

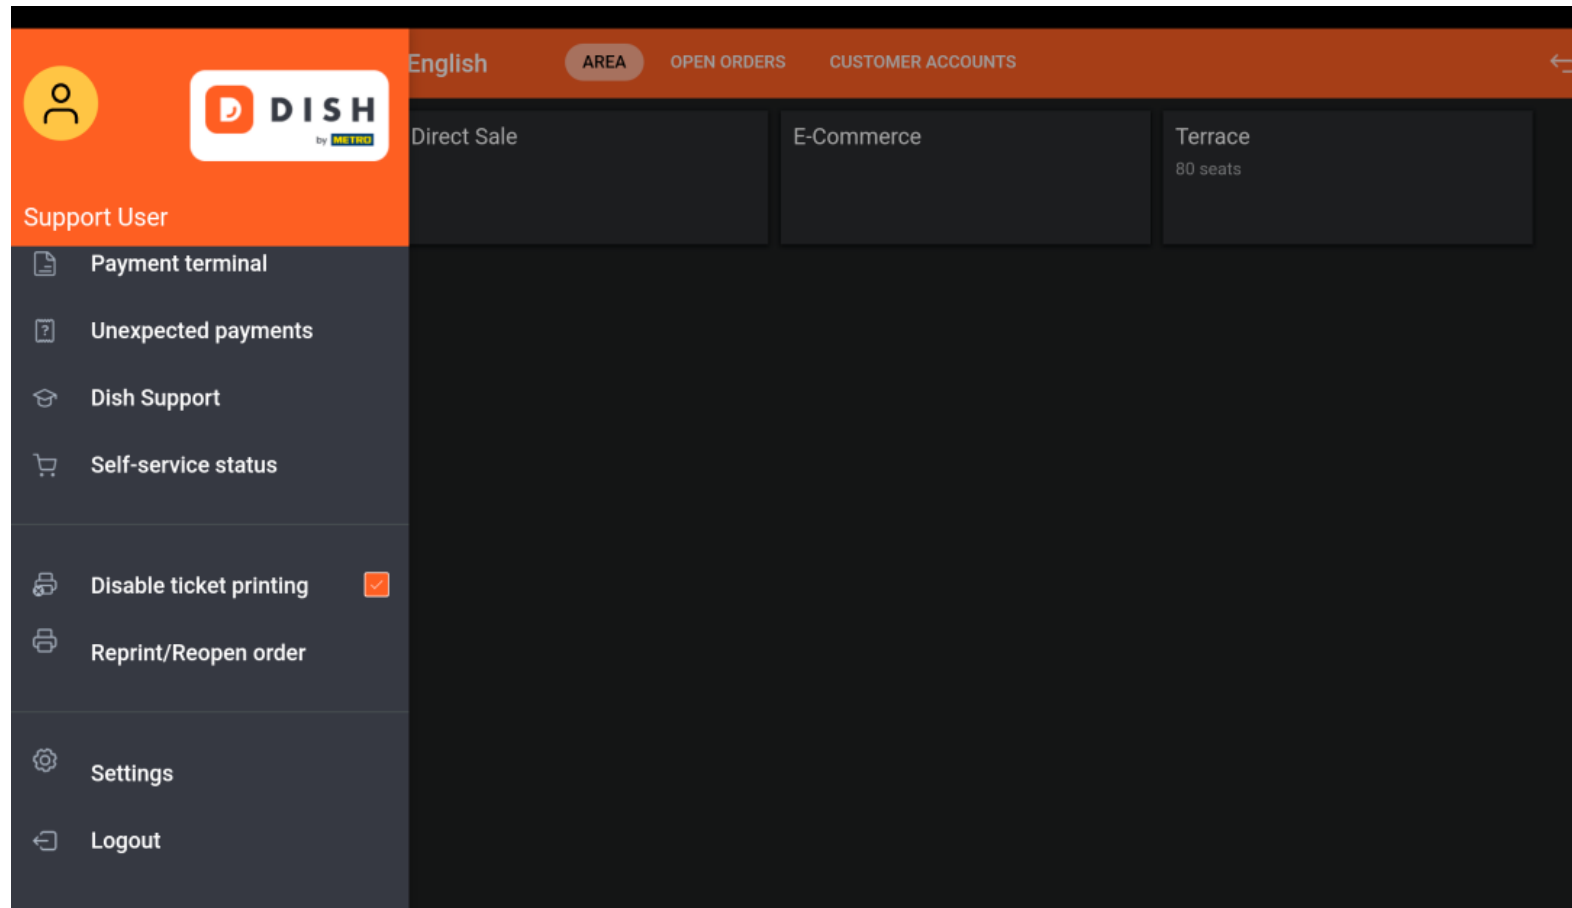

Back in the menu, you can determine whether ticket printing is disabled or not by checking if the corresponding checkmark is set.

That's it. You completed the tutorial and now know how to disable the ticket printing.
