

Welcome to the DISH POS dashboard. In this tutorial we give you an overview of the dashboard functions.

At **Turnover** you see the amount of all the paid/closed orders from the POS.

At **Transactions** you see the amount of transactions for the current day.

At **Average spending** you see the average spend of customers.

Open orders are unpaid orders in the POS system. Here you can find the total and the number of orders.
Note: The open orders are updated every five minutes.

Under **TRANSACTIONS TOTAL LAST WEEK** you can get an overview of the current week and the previous week.

Through the graph, you get a comparison of the current and last week's turnover.

On the left side, you have access to the different settings of the POS.

That's it. You completed the tutorial and now have a brief overview of the dashboard's functions.
