

Welcome to the DISH POS App. In this tutorial, we show you how to split and move a table.

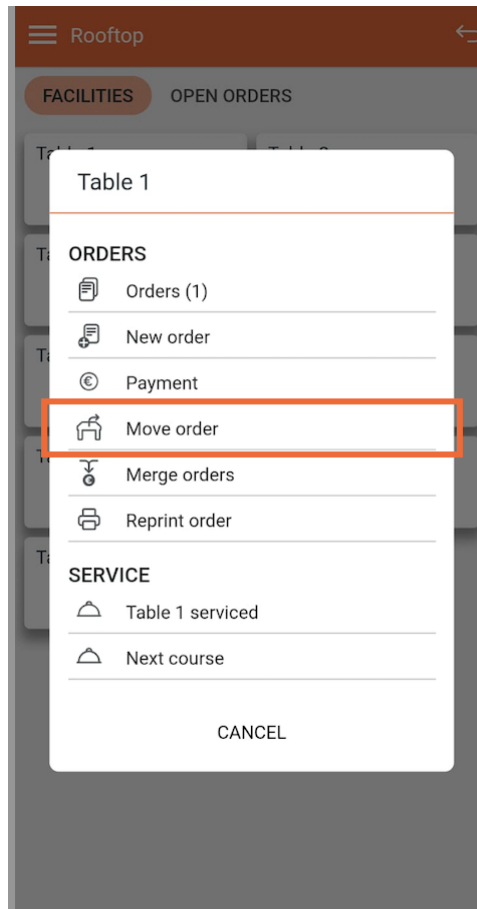

Start by long tapping the **table** with the order you want to manage.

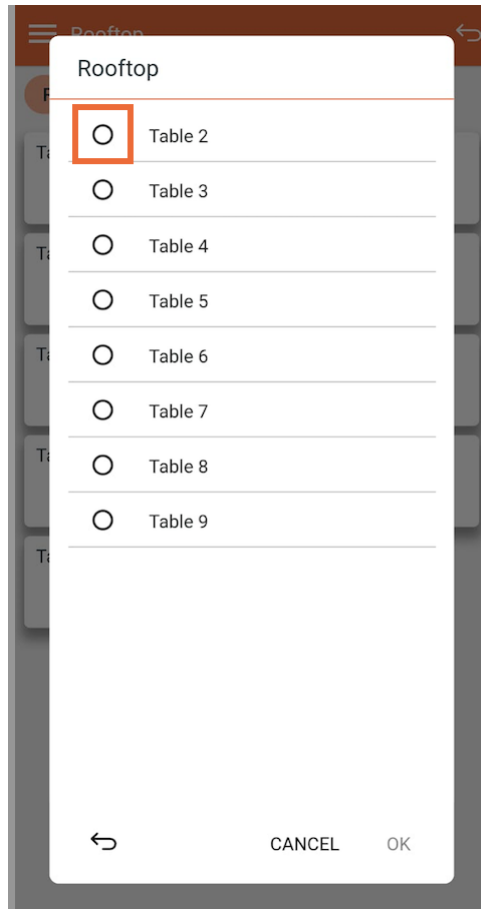

Then a pop-up window will appear with multiple options. Tap on **Move order**, to move the items to another table.

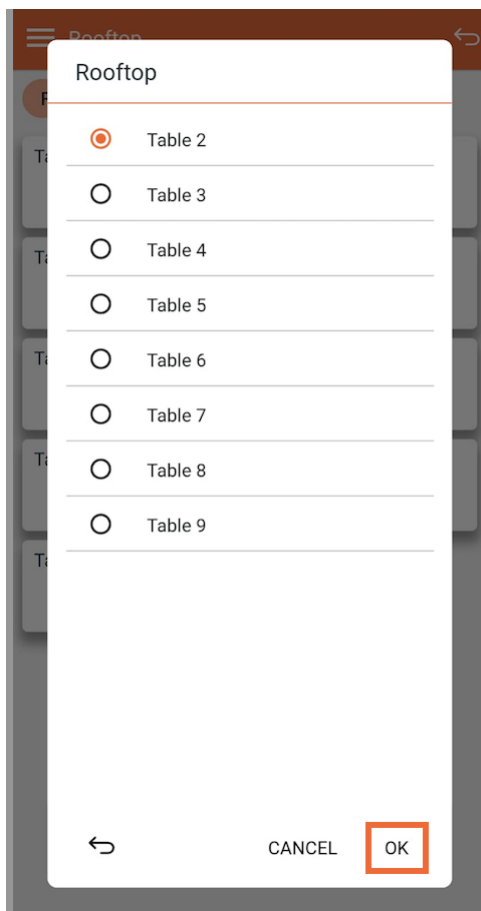

Afterwards select the table you wish to move your order to, by setting the respective **checkmark**.

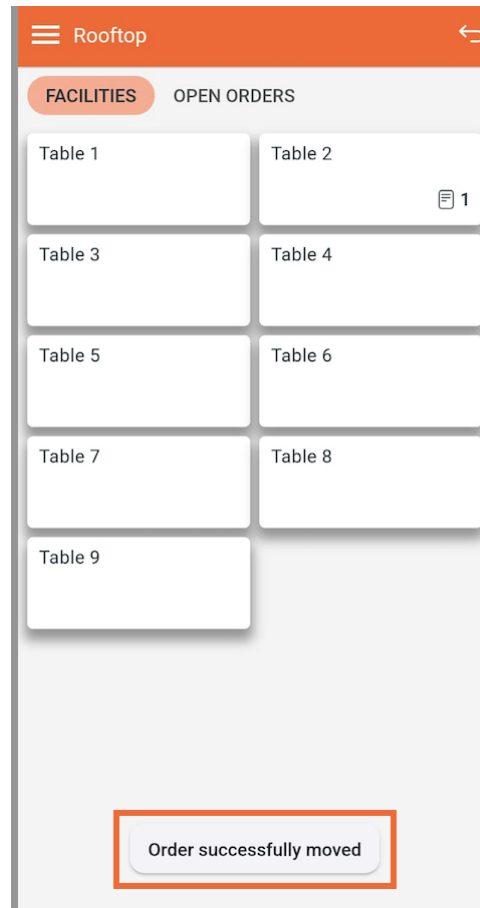

And confirm your choice by tapping on **OK**.

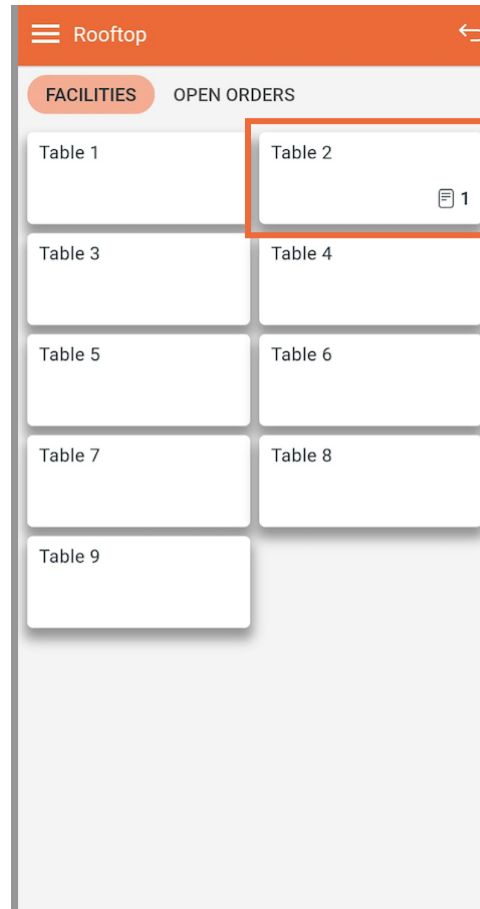

Now a **pop-up** will appear notifying you that your order has been moved successfully.

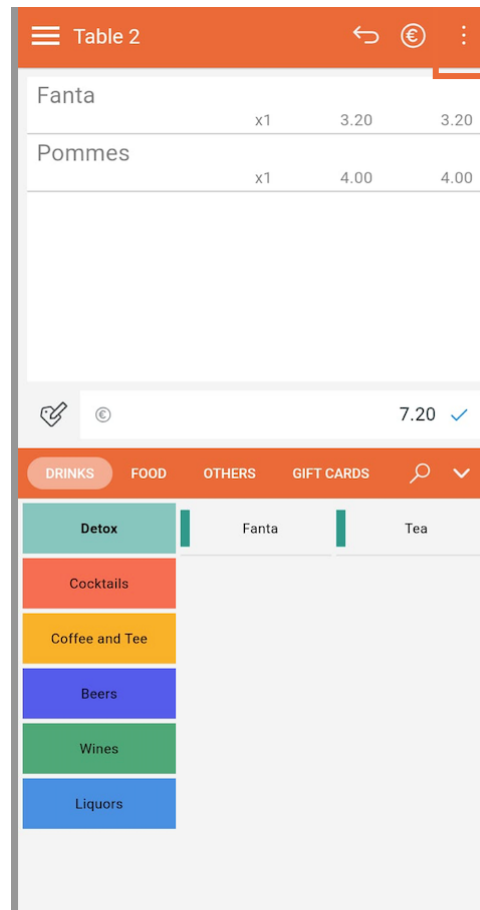

To split a table, first tap the **table** you want to split.

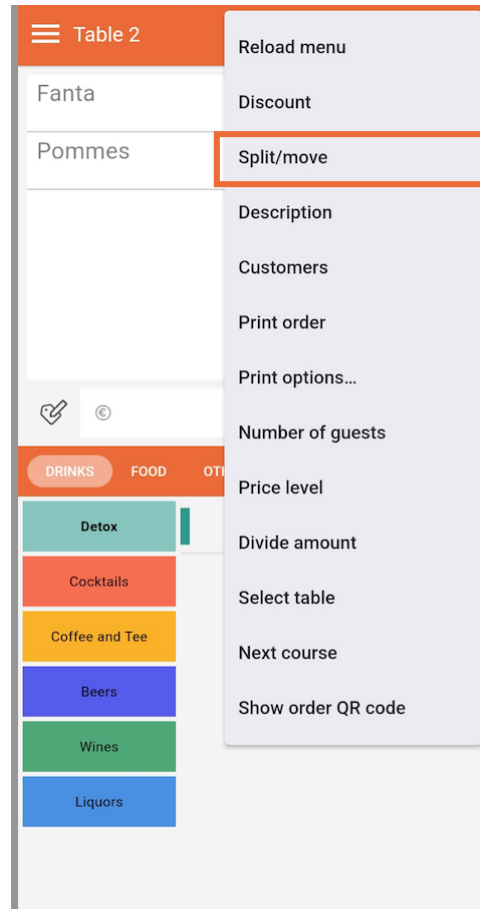

You are now in the open order of the selected table. From here, open the **options' menu** in the top right corner.

Now select **Split/move**.

To split the items on the handheld and let them be paid separately, you need to move the according items to another table. To do so, select the respective **items**.

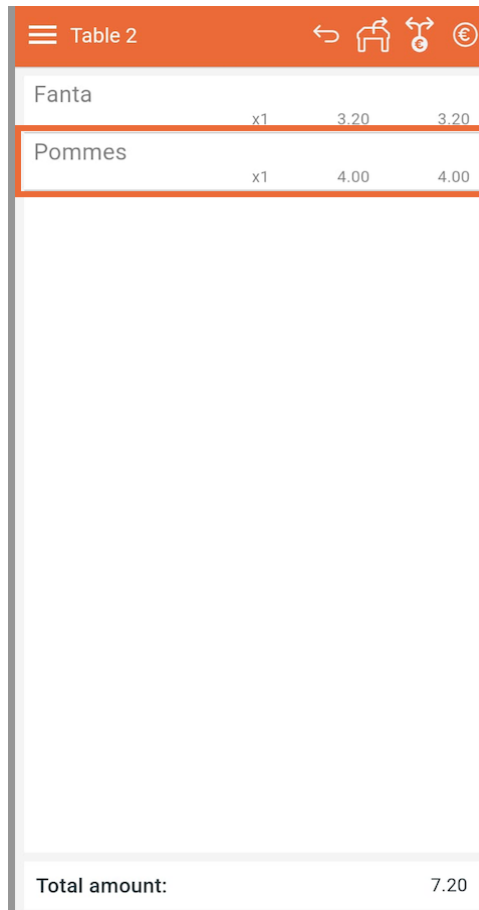

Table 2			
Fanta	x1	3.20	3.20
Pommes	x1	4.00	4.00
Total amount:			7.20

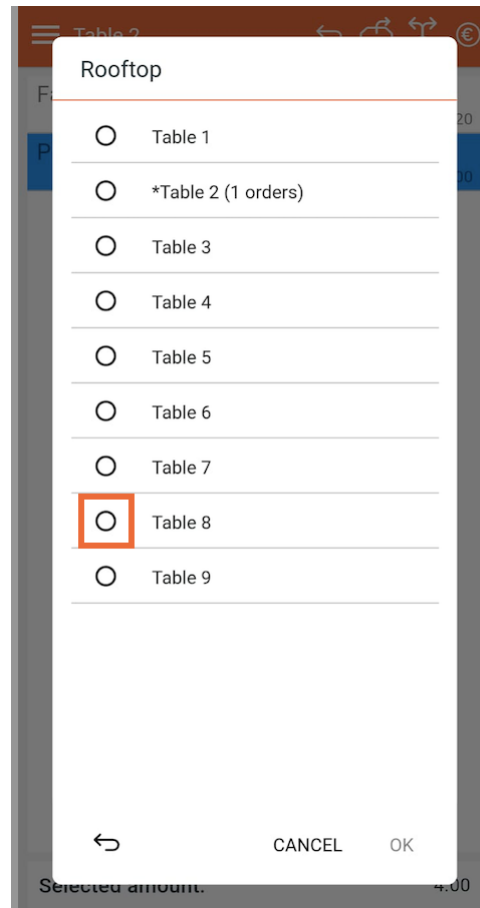

And tap on the **move order icon**.

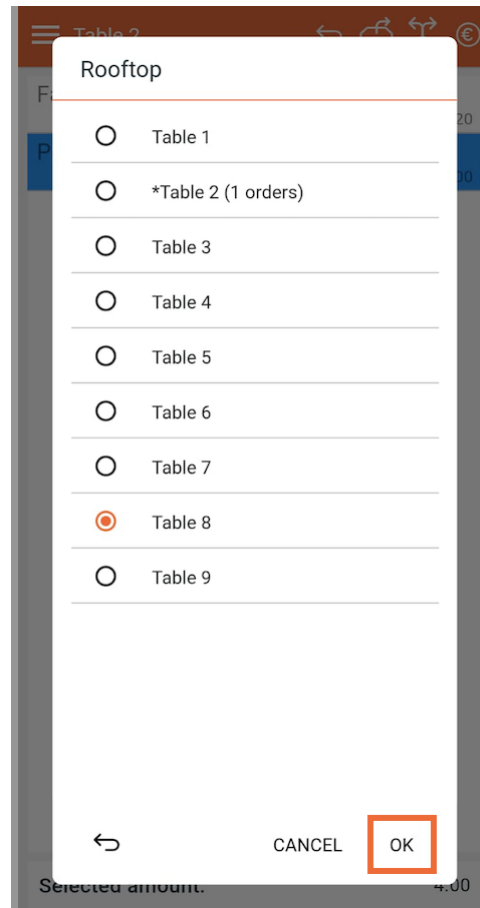

Then select the table you want to move the selected items to, by setting the respective **checkmark**.

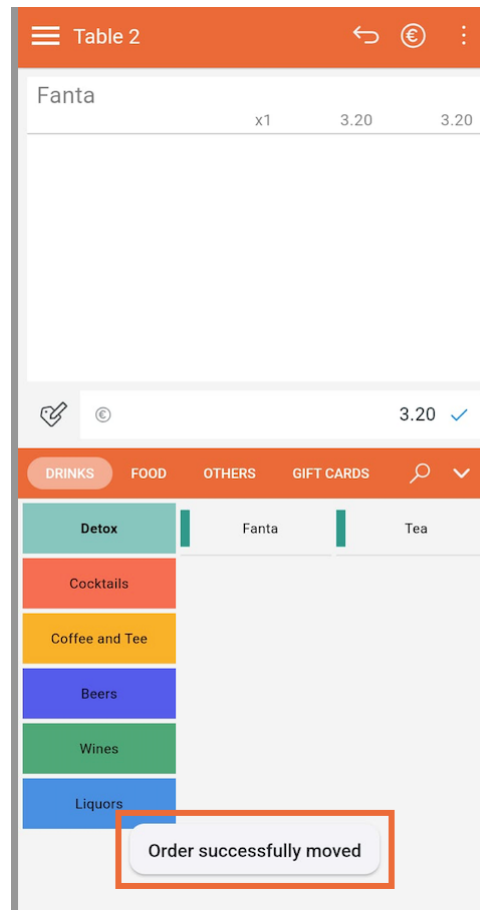

Then proceed, by tapping on **OK**.

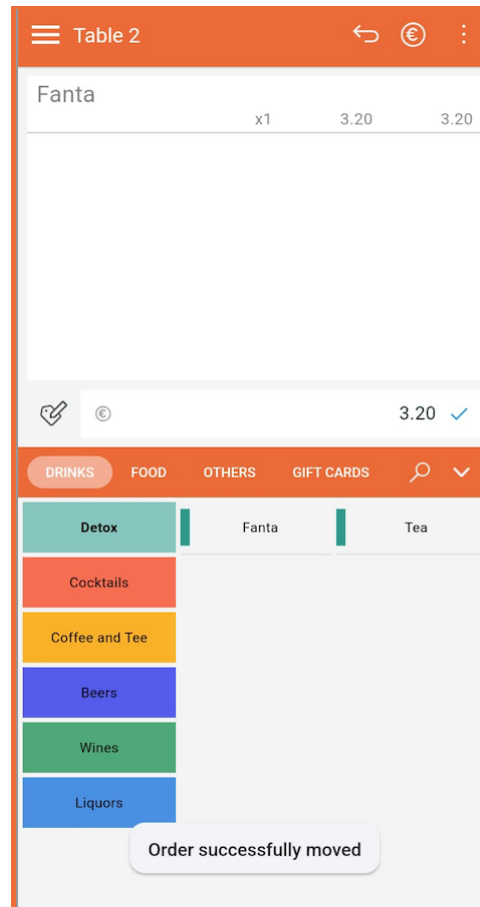

Again, a **pop-up** will appear notifying you that your order has been moved successfully. Now, the selected item has been removed from the original order and is assigned to the new table.

That's it. You completed the tutorial and now know **how to split and move a table.**
